**Sustainable Development** Sunday Udoh, G. O. Akpa, 1997 *The Role of Regional Organizations in the Context of Climate Change* Michael H. Glantz, 2013-06-29 The past two decades have seen a remarkable broadening of interest in global warming from a research concern on the part of a limited number of scientists to a political problem on a worldwide scale The nature of this transformation would itself be a fruitful study for a mixed team of social scientists and natural scientists It would be valuable to assess the differing nature of the staging posts along this road the First World Climate Conference in 1979 which was a meeting of scientists talking to scientists the Villach Assessment of 1985 which was a meeting of scientists whose report was given attention by the policy advisers of a number of governments the Second World Climate Conference of 1990 which consisted of a scientific meeting followed by a Ministerial Meeting and the United Nations Framework Convention on Climate Change of 1992 signed by 158 countries at the UN Conference on Environment and Development in June 1992 The present publication is a welcome contribution of the followup to UNCED By focusing on a specific problem it

avoids the pitfall of undue generalization and provides the basis for fruitful discussion between natural scientists social scientists and policymakers To choose as the area of concentration a particular scale also helped to produce meaningful discussion likely to lead to action     WRM '95 ,1995     Advanced Technologies in Meteorology Rajendra Kumar Gupta,S. J. Reddy,1999     *Nigeria Regional Land and Water Resources Development Planning Study* ,1998     *Environmental Technology and Biosphere Management* H. D. Kumar,2002 This text aims to cover all aspects of global regional and local environment and point the way for effective management of environmental issues in the light of available technologies both old and new Contrary to conventional economic wisdom the author argues that most of the value in the planetary economy does not come from extracting things out of nature rather it comes from the normal functioning of healthy rivers forests and fields The book shows how this may be achieved by the application and use of appropriate technologies It stresses the need for combining the ecological prudence of traditional technologies with contemporary bio information space and renewable energy technologies so as to effectively and sustainably manage ecosystems pests forests farms wildlife villages cities water bodies and other components of the planetary environment     Water in Our Common Future J. Jordaan,1993 This report conveys the message that economic development has been in conflict with development and that if this trend continues the ultimate downfall of human civilizations under the cumulative effects of population increase resources depletion and degradation of the environment is only a question of time     Journal of Applied Social Sciences ,1998     **Knowledge for Sustainable Development** Unesco,2002     *Observing the World's Environment* James P.
