Orchids Of Asia:

Medicinal Orchids of Asia Eng Soon Teoh, 2016-08-30 This unique book brings together a wealth of data on the botanical, ethno medicinal and pharmacological aspects of over 500 species of Asian medicinal orchids. It starts off by explaining the role and limitations of complimentary and herbal medicines and how traditional Asian medicine differs from Western scientific medicine. The different Asian medical traditions are described as well as their modes of preparing herbal remedies. The core of the book presents individual medicinal orchid species arranged by genera. Each species is identified by its official botanical name, synonyms and local names. Its distribution, habitat and flowering season, uses and pharmacology are described. An overview sums up the research findings on all species within each genus. Clinical observations are discussed whenever available and possible therapeutic applications are highlighted. The book closes with chapters on the conservation of medicinal orchids and on the role of randomized clinical trials.

Orchid Species from Himalaya and Southeast Asia Vol. 1 (A - E) Eng Soon Teoh, 2021-02-26 A presentation of 491 popular orchid species with 13 varieties and 3 natural hybrids in 51 genera with names beginning with A to E, carefully detailed with beautiful photographs and concise descriptions of the plants, their distribution and habitats by a well known author and photographer.
