Power And Need In Africa:

Power and Need in Africa Benjamin Wisner, 1989 Ben Wisner makes an impassioned case for giving the poor of Africa the means to develop their own future He shows how a new African renaissance could spring from a radical basic needs approach A renaissance which has as its constituent elements environmental sustainability women's emancipation and social justice

Power in Africa Patrick Chabal, 2016-07-27 This book will rightfully head many a reading list C Allen British Book News Power in Africa casts a fresh look at contemporary Black African politics It reviews the merits and failings of existing interpretations of Africa's post colonial society and offers a new approach to its understanding It has two main aims First to present a comparative conceptual framework which places Africa's politics within its appropriate historical context Second to offer an explanation of what is actually happening in Africa beyond the clichés of a dark continent perennially in crisis

Independent Power Projects in Sub-Saharan Africa Anton Eberhard, Katharine Gratwick, Elvira Morella, Pedro Antmann, 2016-04-18 Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in Sub Saharan Africa Simply put Africa does not have enough power Despite the abundant low carbon and low cost energy resources available to Sub Saharan Africa the region's entire installed electricity capacity at a little over 80 GW is equivalent to that of the Republic of Korea Looking ahead Sub Saharan Africa will need to ramp up its power generation capacity substantially The investment needed to meet this goal largely exceeds African countries already stretched public finances Increasing private investment is critical to help expand and improve electricity supply Historically most private sector finance has been channeled through privately financed independent power projects IPP supported by nonrecourse or limited recourse loans with long term power purchase agreements with the state utility or another off taker Between 1990 and 2014 IPPs have spread across Sub Saharan Africa and are now present in 17 countries Currently there are 125 IPPs with an overall installed capacity of 10.7 GW and investments of 24.6 billion However private investment could be much greater and less concentrated South Africa alone accounts for 67 IPPs 4.3 GW of capacity and 14.4 billion of investments the remaining projects are concentrated in a handful of countries The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment At the core of this analysis is a reflection on whether IPPs have in fact benefited Sub Saharan Africa and how they might be improved The analysis is based primarily on in depth case studies carried out in five countries including Kenya Nigeria South Africa Tanzania and Uganda which not only have the most numerous but also among the most extensive experience with IPPs

Africa's Power Infrastructure Orvika Rosnes, Maria Shkaratan, 2011 Africa's Power Infrastructure Investment Integration Efficiency is based on the most extensive data collection exercise ever undertaken on infrastructure in Africa the Africa Country Infrastructure Country Diagnostic AICD Data from this study have provided new insights on the extent of a power crisis in the region characterized by insufficient capacity low electricity connection rates high costs and poor reliability and

on what can be done about it The continent faces an annual power sector financing gap of about 21 billion with much of the existing spending channeled to maintain and operate high cost power systems leaving little for the huge investments needed to provide a long term solution Meanwhile the power crisis is taking a heavy toll on economic growth and productivity This book asserts that the current impediments to economic growth and development need to be tackled through policies and investment strategies that renew efforts to reform state owned utilities build on the lessons of private participation in infrastructure projects retarget electrification strategies expand regional power trade and mobilize new funding resources Further development of regional power trade would allow Africa to harness larger scale and more cost effective energy sources reducing energy system costs by US 2 billion and carbon dioxide emissions by 70 million tons annually But reaping the promise of regional trade depends on a handful of major exporting countries raising the large volumes of finance needed to develop generation capacity for export it also requires a large number of importing countries to muster the requisite political will With increased utility efficiency and regional power trade in play power costs would fall and full cost recovery tariffs could become affordable in much of Africa This will make utilities more creditworthy and help sustain the flow of external finance to the sector which is essential to close the huge financing gap Understanding Soft Power in Africa

Oluwaseun Tella,2025-10-21 Negative images of Africa which define the continent as being riven with poverty crime or war are increasingly being challenged Examples of soft power such as Nigeria s Nollywood athletic successes in Kenya Rwanda s commercial diplomacy and South Africa s liberal constitution are all reasserting African agency and shaping more positive understandings of the continent This book considers the role and impact of soft power in the African context and how it relates to the 21st century scramble for Africa Bringing together leading scholars in the field this book delves into various aspects of soft power in Africa shedding light on how the continent s attractiveness is shaped by soft power in the continent s biggest states the small states and also the regional organisations such as the African Union AU Economic Community of West African States ECOWAS Southern African Development Community SADC and East African Community EAC The book then goes on to assess the ways in which great powers most notably China the United States the United Kingdom Brazil and France are themselves deploying soft power in Africa in order to vie for influence resources and strategic advantages Understanding Soft Power in Africa will be an important read for researchers in political science international relations African studies and cultural studies as well as for African policymakers *States and Power in Africa* Jeffrey

Power and Politics in Africa: A Boundary Generator Takuo Iwata,2025-01-07 Africa s potential and challenges in the 21st century make it a focal point for global attention The continent s political landscape is now more diverse with a mix of democracy authoritarianism peace and conflict Understanding the dynamics of African politics is crucial This comprehensive

book delves into African Politics and International Relations exploring power through the lenses of politics geography sociology and anthropology It is based on the author s three decades of fieldwork and research across Africa Asia and the West Ideal for academic scholars students diplomats government officials journalists and NGO staff seeking to deepen their understanding of African politics and international relations Medicine, Mobility, and Power in Global Africa Hansjörg Dilger, Abdoulaye Kane, Stacey A. Langwick, 2012-10-08 Recent political social and economic changes in Africa have provoked radical shifts in the landscape of health and healthcare Medicine Mobility and Power in Global Africa captures the multiple dynamics of a globalized world and its impact on medicine health and the delivery of healthcare in Africa and beyond Essays by an international group of contributors take on intractable problems such as HIV AIDS malaria and insufficient access to healthcare drugs resources hospitals and technologies The movements of people and resources described here expose the growing challenges of poverty and public health but they also show how new opportunities have been created for transforming healthcare and promoting care and healing **Africa's Infrastructure** World Bank, 2009-12-01 Sustainable infrastructure development is vital for Africa s prosperity And now is the time to begin the transformation This volume is the culmination of an unprecedented effort to document analyze and interpret the full extent of the challenge in developing Sub Saharan Africa s infrastructure sectors As a result it represents the most comprehensive reference currently available on infrastructure in the region The book covers the five main economic infrastructure sectors information and communication technology irrigation power transport and water and sanitation Africa s Infrastructure A Time for Transformation reflects the collaboration of a wide array of African regional institutions and development partners under the auspices of the Infrastructure Consortium for Africa It presents the findings of the Africa Infrastructure Country Diagnostic AICD a project launched following a commitment in 2005 by the international community after the G8 summit at Gleneagles Scotland to scale up financial support for infrastructure development in Africa The lack of reliable information in this area made it difficult to evaluate the success of past interventions prioritize current allocations and provide benchmarks for measuring future progress hence the need for the AICD Africa s infrastructure sectors lag well behind those of the rest of the world and the gap is widening Some of the main policy relevant findings highlighted in the book include the following infrastructure in the region is exceptionally expensive with tariffs being many times higher than those found elsewhere Inadequate and expensive infrastructure is retarding growth by 2 percentage points each year Solving the problem will cost over US 90 billion per year which is more than twice what is being spent in Africa today However money alone is not the answer Prudent policies wise management and sound maintenance can improve efficiency thereby stretching the infrastructure dollar There is the potential to recover an additional US 17 billion a year from within the existing infrastructure resource envelope simply by improving efficiency For example improved revenue collection and utility management could generate US 3.3 billion per year Regional power trade could reduce annual costs by US 2 billion And deregulating the trucking industry could reduce

freight costs by one half So raising more funds without also tackling inefficiencies would be like pouring water into a leaking bucket Finally the power sector and fragile states represent particular challenges Even if every efficiency in every infrastructure sector could be captured a substantial funding gap of 31 billion a year would remain Nevertheless the African people and economies cannot wait any longer Now is the time to begin the transformation to sustainable development

Chinese Television and Soft Power in Africa Angela Lewis, 2023-08-18 This book examines the phenomenal growth over recent years of StarTimes a Chinese pay TV company with around 30 million subscribers providing satellite television to 20 African countries The broadcaster whose markets include demographic groups deemed uneconomic by Western television providers combines entertainment such as Chinese drama and Kung Fu content dubbed into African languages with Chinese state programming thus making the station at least partially a public diplomacy instrument At the same time the channel provides new indigenous language channels widened access to television in rural areas and sponsors African soccer brands The book considers all aspects of StarTimes how it fits into China's development assistance programmes its structure as a private company nonetheless financed by Chinese banks and based on extensive interview research in Ghana Kenya and Zambia how the station is perceived by media professionals Overall the book shows how this major Chinese international media expansion both contributes very significantly to African development in a way which is sensitive to local concerns and at the same time enhances China's international image

Understanding Violence Against Women in Africa Francis Onditi, Josephine Odera, 2021-08-22 This textbook provides students across Social Sciences Humanities Politics and International Studies with an in depth understanding of the issues policies and strategies for addressing the symptoms and root causes of violence against women VAW in sub Saharan Africa This text uses the United Nations Security Council's Resolution 1325 UNSCR 1325 on Women Peace and Security in Eastern and Southern Africa as a framework to present the causes and impacts of VAW and to trace the journey of sub Saharan African countries toward gender equality It also provides an overview of the policy and legislative frameworks that underpin the progress challenges and achievements of addressing VAW based on four key pillars prevention protection participation and relief and recovery Chapters provide a wealth of knowledge as the book draws on academic literature national regional and international legislations and data collected from field research and makes use of end of chapter discussion questions and quick study guides Students will come away equipped with the tools resources and knowledge necessary to address and fix VAW in sub Saharan Africa and beyond

Public-Private Partnerships in Sub-Saharan Africa James Leigland, 2020-05-07 Expectations are high regarding the potential benefits of public private partnerships PPPs for infrastructure development in low income countries The development community led by the G20 the United Nations and others expects these partnerships between governments and private companies in infrastructure service

provision to aid transformational mega projects as well as efforts to achieve the Sustainable Development Goals Yet PPPs have been widely used only since the 1990s and discussion of their efficacy is still dominated by best practice guidance academic studies that focus on developed countries or ideological criticism Meanwhile practitioners have quietly accumulated a large body of empirical evidence on the actual performance of PPPs The purpose of this book is to summarize and consolidate what this critical mass of evidence based research indicates about PPPs in low income countries and thereby develop a more realistic perspective on the practical value of these mechanisms With a primary focus on Sub Saharan Africa though drawing on critical insights from other regions it demonstrates that the benefits of such partnerships will only be realised if expectations remain modest and projects are subject to transparent evaluation and competition **Political**

Economy in the Middle East and North Africa Rachid Mira,2024-12-20 Many countries in the Middle East and North Africa continue to face major economic and political challenges including volatile economic growth low economic diversification high unemployment levels and in some cases pervasive authoritarian regimes These economic and political challenges are interdependent and reform is needed in both spheres if structural long lasting change is going to be achieved This book combines the World Bank s concept of good governance with other analytical tools of political economy including rent seeking theory political settlements approach the resource curse and Dutch Disease to explore how government institutions in the region affect economic reforms and vice versa The book also examines the role of institutions and performance of governance on rent distribution evaluating how governments manage their sometimes abundant natural resources In some rentier states governments are clearly utilizing these resources for their own political ends even at the cost of negatively impacting economic growth job creation and social service provision Economic growth is also constrained by low flows of both private and public investment toward productive sectors that need it The book analyzes the differences between countries in the Middle East and North Africa in their economic and political structures to show how sustainable economic growth and a level of political democratization can be achieved through enhancing governance institutions This book will be invaluable reading for researchers on the political economy of the Middle East and institutional economics

China-Africa Relations in an Era of Great Transformations Li Xing,Abdulkadir Osman Farah,2016-05-23 This collection juxtaposes a variety of approaches about China and Africa and their interrelations seeking to go beyond early simplistic formulations Perspectives informed by Polanyi advance nuanced analysis of varieties of capitalisms and double movements It seeks to put contemporary China Africa relations in critical comparative context and in doing so it will go beyond descriptions of inter regional trade and investment large and small scale sectors to ask whether structural change is underway Already it is apparent that the growing presence of China in Africa presents the latter with some novel options but whether these will generate a new embeddedness remains problematic Highlighting the varieties of capitalisms in the new century given the undeniable difficulties of extreme neo liberalism in the US and UK by contrast to the apparent ebullience of

the emerging economies in the global South this book examines such implications for international relations international political economy development studies and policies China's Media and Soft Power in Africa X. Zhang,H. Wasserman,W. Mano,2016-04-08 This volume brings together scholars from different disciplines and nations to examine and assess the effectiveness of China s soft power initiatives in Africa It throws light not only on China s engagement with Africa but also on how China s increasing influence is received in the African media Power Sector Reform in SubSaharan Africa J. Turkson,2000-03-02 As part of the wave of liberalisation sweeping most parts of the world power sectors around the globe are coming under intense scrutiny with some being restructured This book presents six country case studies to examine the process and implementation experiences of power sector reform in Subsaharan Africa **Courts and Power in Latin America and Africa** B. Wilson,S. Gloppen,R. Gargarella,Morten Kinander,E. Skaar,2016-04-30 Why do courts hold political power holders accountable in some democratic and democratizing countries but not in others And why do some courts remain very timid while others under seemingly similar circumstances become hyper active This is valuable contribution to the ongoing debate over the issue of democratic accountability *West African Studies Africa's Urbanisation Dynamics 2022 The Economic Power of Africa's Cities* OECD,United Nations Economic Commission for Africa,African Development Bank,2022-04-26 This report provides a new perspective on Africa s urban economies that is unique in its breadth and level of detail Based on data from more than 4 million individuals and firms in 2 600 cities across 34 countries it presents compelling evidence that urbanisation contributes to better economic outcomes and higher living standards
