Reclaiming Democracy:

Reclaiming Democracy Meta Mendel-Reyes, 2013-10-11 Meta Mendel Reyes provides a critical look at our fascination with the sixties discusses the ways in which democratic participation was at the heart of sixties politics and explores the interrelationship between the history and memory of the sixties and contemporary democratic politics Mendel Reyes stresses that if told properly the story of the sixties could help open our eyes to the possibility that ordinary people can take democratic action and do have the ability to make a difference in nineties politics In a time of cynicism about the American government's ability to solve the crises of inequality poverty and racism Mendel Reyes puts the decline of political participation in historical context and provides hope for the coming decades

We Are Not Able to Live in the Sky Mara Kardas-Nelson, 2024-06-11 Shortlisted for the J Anthony Lukas Prize A deeply reported work of journalism that explores the promises and perils of microfinance told through the eyes of international lenders and women borrowers in West Africa In the mid 1970s Muhammad Yunus an American trained Bangladeshi economist met a poor female stool maker who needed money to expand her business In an act widely known as the beginning of microfinance Yunus lent 27 to forty two women hoping small credit would help the women pull themselves out of poverty Soon Yunus's Grameen Bank was born and the idea of giving very small high interest loans to poor people took off In 2006 Yunus and the Grameen Bank won the Nobel Peace Prize for efforts to create economic and social development from below But there's a problem with this story There are mounting concerns that these small loans are as likely to bury poor people in debt as they are to pull them from poverty with borrowers from India to Kenya facing consequences such as jail time and forced land sales Reportedly hundreds have even committed suicide What happened Did microfinance take a wrong turn or was it flawed from the beginning Mara Kardas Nelson's *We Are Not Able to Live in the Sky* is about unintended consequences blind optimism and the decades long ramifications of seemingly small policy choices The book is rooted in the stories of women borrowers in Sierra Leone West Africa Their narratives woven through a deep history of modern international development are set against the rise of Yunus's vision that tiny loans would put poverty in museums Kardas Nelson asks What is missed with a single financially focused solution to global inequity that ignores the real drivers of poverty Who stands to benefit and more important who gets left behind

Historical Dictionary of the Arab Uprisings Aomar Boum, Mohamed Daadaoui, 2020-03-10 The Arab uprisings that swept the Middle East and North Africa in the period from 2011-2012 left an indelible mark on the socio-political landscape of the region But that mark was not consistent across the region while some countries underwent dramatic popular social and political changes others teetered on the brink or were left with the status quo intact Street revolutions toppled despotic regimes in Tunisia Libya and momentarily in Egypt while mounting serious challenges to authoritarian regimes in Syria and Yemen Algeria's entrenched bureaucratic cum military authoritarian system proved resilient until the recent events of early 2019 which forced the resignation of President Abdelaziz Bouteflika before the end of his term on 28 April 2019 As in Algeria protestors in Sudan succeeded after months of demonstrations in overthrowing the government of Omar al-Bashir Several Arab monarchies still appear stable and have managed to weather the tempest of the Arab revolutions albeit not without fissures showing in the

edifice of their states accompanied by some minor constitutional changes Where Tunisians Egyptians Yemenis Syrians and Libyans demanded regime changes in their political systems protesters in the Arab monarchies have called on the kings and emirs to reform their political system from the top down indicating the sizeable monarchical advantage Historical Dictionary of the Arab Uprisings contains a chronology an introduction and an extensive bibliography The dictionary section has over 500 cross referenced entries on the terms persons and events that shaped the Arab Spring uprisings This book is an excellent resource for students researchers and anyone wanting to know more about the Arab Uprisings **The Will to Empower**

Barbara Cruikshank, 2019-06-30 How do liberal democracies produce citizens who are capable of governing themselves In considering this question Barbara Cruikshank rethinks central topics in political theory including the relationship between welfare and citizenship democracy and despotism and subjectivity and subjection Drawing on theories of power and the creation of subjects Cruikshank argues that individuals in a democracy are made into self governing citizens through the small scale and everyday practices of voluntary associations reform movements and social service programs She argues that our empowerment is a measure of our subjection rather than of our autonomy from power Through a close examination of several contemporary American technologies of citizenship from welfare rights struggles to philanthropic self help schemes to the organized promotion of self esteem awareness she demonstrates how social mobilization reshapes the political in ways largely unrecognized in democratic theory Although the impact of a given reform movement may be minor the techniques it develops for creating citizens far extend the reach of governmental authority Combining a detailed knowledge of social policy and practice with insights from poststructural and feminist theory The Will to Empower shows how democratic citizens and the political are continually recreated **Constituting Economic and Social Rights**

Katharine G. Young, 2012-08-23 Food water health housing and education are as fundamental to human freedom and dignity as privacy religion or speech Yet only recently have legal systems begun to secure these fundamental individual interests as rights This book looks at the dynamic processes that render economic and social rights in legal form It argues that processes of interpretation enforcement and contestation each reveal how economic and social interests can be protected as human and constitutional rights and how their protection changes public law Drawing on constitutional examples from South Africa Colombia Ghana India the United Kingdom the United States and elsewhere the book examines innovations in the design and role of institutions such as courts legislatures executives and agencies in the organization of social movements and in the links established with market actors This comparative study shows how legal systems protect economic and social rights by shifting the focus from minimum bundles of commodities or entitlements to processes of value based deliberative problem solving Theories of constitutionalism and governance inform the potential of this approach to reconcile economic and social rights with both democratic and market principles while addressing the material inequality poverty and social conflict caused in part by law itself Political Theory and the Enlarged Mentality

Stephen Acreman, 2017-10-20 In this book Stephen Acreman follows the

development and reception of a hitherto under analyzed concept central to modern and postmodern political theory the Kantian *ein erweiterte Denkungsart* or enlarged mentality While the enlarged mentality plays a major role in a number of key texts underpinning contemporary democratic theory including works by Arendt Gadamer Habermas and Lyotard this is the first in depth study of the concept encompassing and bringing together its full range of expressions A number of attempts to place the enlarged mentality at the service of particular ideals the politics of empathy of consensus of agonistic contest or of moral righteousness are challenged and redirected In its exploration of the enlarged mentality the book asks what it means to assume a properly political stance and in giving as the answer facing reality together it uncovers a political theory attentive to the facts and events that concern us and uniquely well suited to the ecological politics of our time
