Recognizing The Autonomy Of Nature Theory And Practice:

Recognizing the Autonomy of Nature Thomas Heyd, 2005-11-09 How do the ways in which we think about and describe nature shape the use and protection of the environment Do our seemingly well intentioned efforts in environmental conservation reflect a respect for nature or our desire to control nature s wildness The contributors to this collection address these and other questions as they explore the theoretical and practical implications of a crucial aspect of environmental philosophy and policy the autonomy of nature In focusing on the recognition and meaning of nature s autonomy and linking issues of metaphysics epistemology ethics and policy the essays provide a variety of new perspectives on human relationships to nature The authors begin by exploring what is meant by nature in what sense it can be seen as autonomous and what respect for the autonomy of nature might entail They examine the conflicts that arise between the satisfaction of human needs food shelter etc and the natural world The contributors also consider whether the activities of human beings contribute to nature s autonomy In their investigation of these issues they not only draw on philosophy and ethics they also discuss how the idea of nature s autonomy affects policy decisions regarding the protection of agricultural rural and beach areas The essays in the book s final section turn to management and restoration practices The essays in this section pay close attention to how efforts at environmental protection alter or reinforce the traditional relationship between humans and nature More specifically the contributors examine whether management practices as they are applied in nature conservation actually promote the autonomy of nature or whether they turn the environment into a client for policymakers

Recognizing the Autonomy of Nature Thomas Heyd, 2005 The contributors to this collection address what is meant by nature and in what sense it can be seen as autonomous They then consider the conflicts that arise between the satisfaction of human needs and interests and respect for nature s autonomy The essays in the book s final section turn to management and restoration practices investigating whether they promote the autonomy of nature or represent further attempts to dominate the natural world

Hermeneutics of Human-Animal Relations in the Wake of Rewilding Mateusz Tokarski, 2019-05-21 In consequence of significant social political economic and demographic changes several wildlife species are currently growing in numbers and recolonizing Europe While this is rightly hailed as a success of the environmental movement the return of wildlife brings its own issues As the animals arrive in the places we inhabit we are learning anew that life with wild nature is not easy especially when the accumulated cultural knowledge and experience pertaining to such coexistence have been all but lost This book provides a hermeneutic study of the ways we come to understand the troubling impacts of wildlife by exploring and critically discussing the meanings of ecological discomforts Thus it begins the work of rebuilding the culture of coexistence The cases presented in this book range from crocodile attacks to mice infestations and their analysis consequently builds up an ethics that sees wildlife as active participants in the shaping of human moral and existential reality This book is of interest not only to environmental philosophers who will find here an original contribution to the established

ethical discussions but also to wildlife managers and even to those members of the public who themselves struggle to make sense of encounters with their new wild neighbors

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13

While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

Real Green Manuel Arias-Maldonado, 2016-03-23 What would a sustainable society look like How could it be achieved By challenging conventional wisdom about the ecological crisis and reframing the traditional values of green politics Real Green Sustainability after the End of Nature offers new answers to the key questions of the environmental debate In this ground breaking and challenging work Manuel Arias Maldonado convincingly argues that since nature has now been transformed into a part of the human environment it can be seen to no longer exist Ecological problems thus become an inevitable and normal feature of our relationship with nature Hence a post natural environmentalism realistic and liberal while remaining green is advocated In this framework sustainability democracy and liberalism become mutually reinforcing elements rather than conflicting ones Only by combining them can a green society be realised

Rethinking the Environment for the Anthropocene Manuel Arias-Maldonado, Zev Trachtenberg, 2019-01-15 This book brings together the most current thinking about the Anthropocene in the field of Environmental Political Theory EPT It displays the distinctive contribution EPT makes to the task of thinking through what the environment means in this time of pervasive human influence over natural systems Across its chapters the book helps develop the idea of socionatural relations an idea that frames the environment in the Anthropocene in terms of the interconnected relationship between human beings and their surroundings Coming from both well established and newer voices in the field the chapters in the book show the diversity of

points of view theorists take toward the Anthropocene idea and socionatural relations more generally However all the chapters exemplify a characteristic of work in EPT the self conscious effort to provide normative interpretations that are responsive to scientific accounts The Introduction explains the complicated interaction between science and EPT showing how it positions EPT to consider the Anthropocene And the Afterword by a pioneer in the field relates all the chapters to a perspective that has been deeply influential in EPT This book will be of interest to scholars already engaged in EPT But it will also serve as an introduction to the field for students of Political Theory Philosophy Environmental Studies and related disciplines who will learn about the EPT approach from the Introduction and then see it applied to the pressing question of the Anthropocene in the ensuing chapters The book will also help readers interested in the Anthropocene from any disciplinary perspective develop a critical understanding of its political meanings

Wild Solveig Bøe, Hege Charlotte Faber, Eivind Kasa, 2022-10-20 In this interdisciplinary work philosophers from different specialisms connect with the notion of the wild today and interrogate how it is mediated through the culture of the Anthropocene They make use of empirical material like specific artworks films and other cultural works related to the term wild to consider the aesthetic experience of nature focusing on the untamed the boundless the unwieldy or the unpredictable in other words aspects of nature that are mediated by culture This book maps out the wide range of ways in which we experience the wildness of nature aesthetically relating both to immediate experience as well as to experience mediated through cultural expression A variety of subjects are relevant in this context including aesthetics art history theology human geography film studies and architecture A theme that is pursued throughout the book is the wild in connection with ecology and its experience of nature as both a constructive and destructive force

The Antipodean Philosopher Graham Oppy, N. N. Trakakis, Lynda Burns, Steven Gardner, Fiona Leigh, 2011-02-22 Philosophy in both Australia and New Zealand has been experiencing for some time now something of a golden age exercising an influence in the global arena that is disproportionate to the population of the two countries To capture the distinctive and internationally recognised contributions Australasian philosophers have made to their discipline a series of public talks by leading Australasian philosophers was convened at various literary events and festivals across Australia and New Zealand from 2006 to 2009 These engaging and often entertaining talks attracted large audiences and covered diverse themes ranging from local histories of philosophy in particular the fortunes of philosophy in Melbourne Sydney Brisbane Adelaide and New Zealand to discussions of specific topics including love free will religion ecology feminism and civilisation especially as these have featured in the Australasian philosophy and to examinations of the intellectual state of universities in Australasia at the beginning of the twenty first century These talks are now collected here for the first time to provide not only students and scholars but also the wider community with a deeper appreciation of the philosophical heritage of Australia and New Zealand

The Antipodean Philosopher Graham Robert Oppy, Graham Oppy, Nick Trakakis, 2011-01-01 This volume presents an accessible and engaging collection of essays by prominent

Australasian philosophers covering a wide array of topics and drawn from a series of public lectures on Philosophy in Australia and Zealand convened over a period of four years The essays explore the rich philosophical past of Australasia while also illustrating why philosophy in Australasia ranks highly in influence and esteem *Technofutures, Nature and the Sacred* Celia Deane-Drummond, Sigurd Bergmann, Bronislaw Szerszynski, 2016-03-03 The capacity of human beings to invent construct and use technical artifacts is a hugely consequential factor in the evolution of society and in the entangled relations between humans other creatures and their natural environments Moving from a critical consideration of theories to narratives about technology and then to particular and specific practices *Technofutures Nature and the Sacred* seeks to arrive at a genuinely transdisciplinary perspective focusing attention on the intersection between technology religion and society and using insights from the environmental humanities It works from both theoretical and practical contexts by using newly emerging case studies including geo engineering and soil carbon technologies and breaks open new ground by engaging theological scientific philosophical and cultural aspects of the technology religion nature nexus Encouraging us to reflect on the significance and place of religious beliefs in dealing with new technologies and engaging critical theory common in sociological political and literary discourses the authors explore the implicit religious claims embedded in technology
