Reconstituting The Global Liberal Order Legitimacy And Regulation:

Reconstituting the Global Liberal Order Kanishka Jayasuriya, 2006-02-01 The events of September 11 2001 were a significant watershed in the emerging global order However the nature and consequences of this changing global order remain unclear This book argues that this new order is as much the result of issues relating to the evolving methods and forms of governance as of the new role and position of the United States in the world system Using an innovative framework derived from the work of Carl Schmitt Kanishka Jayasuriya explores the nexus between domestic political and constitutional structures and the global order and examines how the post war framework of international liberalism is crumbling under the new pressures of globalization As well as looking at the implications of 9 11 for the global order this new study relates the events of 9 11 to the deep transformations of the post war global order emphasizes the importance of the rise of the new regulatory state examines the new politics of fear in liberal democracies including the US UK and Australia studies the appropriation of the language of the left by conservative forces explores the illiberal outcomes of actions undertaken in the name of liberalism This unique and timely study will be of great interest to students and researchers of international political economy globalization and international political theory

Governing Asian International Mobility in Australia Xianlin Song, Greg McCarthy, 2019-08-12 This book examines the governance of Asian student and academic mobility which has transformed the higher education landscape While campuses are experiencing an unprecedented level of diversity knowledge creation remains explicitly Eurocentric and dominated by the Global North The authors advocate for a new educational paradigm that takes into account the transcultural flow of knowledge on campus as a public good capitalises on Asian students and academics multilingual competencies and offers them equal access to creating quality orientated education The book argues that international higher education must be grounded in both a plurality of knowledges and the ethics of cognitive justice and that the governing policies should facilitate the higher education sector to build a platform of internationalising affect and effect on campus

India in South Asia Sinderpal Singh, 2013-09-02 South Asia is one of

the most volatile regions of the world and India's complex democratic political system impinges on its relations with its South Asian neighbours. Focusing on this relationship, this book explores the extent to which domestic politics affect a country's foreign policy. The book argues that particular continuities and disjunctures in Indian foreign policy are linked to the way in which Indian elites articulated Indian identity in response to the needs of domestic politics. The manner in which these state elites conceive India's region and regional role depends on their need to stay in tune with domestic identity politics. Such exigencies have important implications for Indian foreign policy in South Asia. Analysing India's foreign policy through the lens of competing domestic visions at three different historical eras in India's independent history, the book provides a framework for studying India's developing nationhood on the basis of these ideas of India. This approach allows for a deeper and a more nuanced interpretation of the motives for India's foreign policy choices than the traditional realist or neo-liberal framework and provides a useful contribution to South Asian Studies, Politics and International Studies.

Interregionalism and International Relations Heiner Hänggi, Ralf Roloff, Jürgen Rüland, 2006. Interregionalism, the institutionalized relations between world regions, is a new phenomenon in international relations. It is also a new layer of development in an increasingly differentiated global order. This volume examines the structure of this phenomenon and the scholarly discourse it is generating. It takes stock of empirical facts and theoretical explanations, bringing together with clarity and concision the latest research on this key area. This essential new book traces the emergence of interregionalism and reviews the latest literature, provides a conceptual and theoretical framework for study, includes case studies of inter-regional relations between Asia and America, Asia and Europe, Europe and America, and Europe and Africa, delivers comparative analyses and special cases such as continental summits and interregional relationships beyond the Triad, summarizes and evaluates the findings of each chapter, providing a basis for further research. This is a key reference book for students and researchers of regionalism, global governance and international relations.

Profits, Security, and Human Rights in Developing Countries James Rochlin, 2015-06-19. The extractive sector is a particular area of expertise for Canada, and more than half of Canada's mining assets abroad are located in Latin America, specifically in Brazil, Peru, Chile, and Colombia. The Canada-Colombia accord was the first free trade agreement in the world to include annual Human Rights Impact Assessments (HRIA) and also includes a labour side accord where abuse complaints can be formally registered. Using Colombia as a case study, James Rochlin and his international and multidisciplinary line-up of Canadian and Colombian scholars and activists working in the area of human rights and the judiciary explore what is the best way to identify and operationalize for mutual benefit the concentric space between the interests of extractive corporations in profit and security on the one hand and the interests of the host communities in the promotion of human rights and human security on the other. What can the four emblematic and diverse cases in Colombia—Meta, Sergio, Marmato, and Bolívar—La Guajira tell us about how to fine-tune and improve a newly implemented governmental HRIA to render it an increasingly useful global instrument to promote simultaneously corporate

security and human security for host communities What is the most efficient and effective way to design and implement Corporate Social Responsibility Programs in a manner that promotes simultaneously corporate security and community human security Written in a clear and accessible style Profits Security and Human Rights presents practical lessons on how to promote both corporate security and human security in communities where the extractive sector operates in the Global South

Ethics, Liberalism and Realism in International Relations Mark D. Gismondi,2007-09-17 This book explores the complex issue of international ethics in the two dominant schools of thought in international relations Liberalism and Realism Both theories suffer from an inability to integrate the ethical and pragmatic dimensions of foreign policy Liberal policy makers often suffer from moral blindness and a tendency toward coercion in the international arena whilst realists tend to be epistemic sceptics incorporating Nietzsche s thought directly or indirectly into their theories Mark Gismondi seeks to resolve the issues in these two approaches by adopting a covenant based approach as described by Daniel Elazar s work on the covenant tradition in politics to international relations theory The covenant approach has three essential principles policy makers must have a sense of realism about the existence of evil and its political consequences power must be shared and limited liberty requires a basis in shared values Ethics Realism and Liberalism in International Relations will be of interest to students and researchers of politics philosophy ethics and international relations
