Reconstructing Conservation Ben A. Minter, Robert E. Manning, 2003-10 Focusing not just on the tensions that have marked the deconstructivist debate over wilderness and environmentalism this book represents a larger and ultimately more constructive discussion over the proper course of future conservation scholarship and action *General Technical Report NRS-P*, 2006 *The Protected Landscape Approach*

Jessica Brown, Nora J. Mitchell, Michael Beresford, 2005 The traditional patterns of land use that have created many of the world's cultural landscapes contribute to biodiversity support ecological processes provide important environmental services and have proven sustainable over the centuries Protected landscapes can serve as living models of sustainable use of land and resources and offer important lessons for sustainable development Examples of these landscapes and the diverse strategies needed to maintain this essential relationship between people and the land are provided

Why Conservation Is Failing and How It Can Regain Ground Eric T. Freyfogle, 2008-10-01 Critics of environmental laws complain that such rules often burden people unequally restrict individual liberty and undercut private property rights In formulating responses to these criticisms the conservation effort has stumbled badly says Eric T Freyfogle in this thought provoking book Conservationists and environmentalists haven't done their intellectual homework he contends and they have failed to offer an understandable compelling vision of healthy lands and healthy human communities Freyfogle explores why the conservation movement has responded ineffectually to the many cultural and economic criticisms leveled against it He addresses the meaning of good land use describes the many shortcomings of sustainability and outlines six key tasks that the cause must address Among these is the crafting of an overall goal and a vision of responsible private ownership The book concludes with a stirring message that situates conservation within America's story of itself and with an extensive annotated bibliography of conservation's most valuable voices and texts important information for readers prepared to take conservation more seriously

CRM, 2003 [Material Culture in America](#) Helen Sheumaker, Shirley Wajda, 2007-11-07 The first encyclopedia to look at the study of material culture objects images spaces technology production and consumption and what it reveals about historical and contemporary life in the United States Reaching back 400 years *Material Life in America* An Encyclopedia is the first reference showing what the study of material culture reveals about American society revelations not accessible through traditional sources and methods In nearly 200 entries the encyclopedia traces the history of artifacts concepts and ideas industries peoples and cultures cultural productions historical forces periods and styles religious and secular rituals and traditions and much more Everyone from researchers and curators to students and general readers will

find example after example of how the objects and environments created or altered by humans reveal as much about American life as diaries documents and texts The City Natural Shen Hou,2010-11-23 The weekly magazine Garden and Forest existed for only nine years 1888 1897 Yet in that brief span it brought to light many of the issues that would influence the future of American environmentalism In The City Natural Shen Hou presents the first biography of this important but largely overlooked vehicle for individuals with the common goal of preserving nature in American civilization As Hou s study reveals Garden and Forest was instrumental in redefining the fields of botany and horticulture while also helping to shape the fledgling professions of landscape architecture and forestry The publication actively called for reform in government policy urban design and future planning for the preservation and inclusion of nature in cities It also attempted to shape public opinion on these issues through a democratic ideal that every citizen had the right and need to access nature These notions would anticipate the conservation and city beautiful movements that followed in the early twentieth century Hou explains the social and environmental conditions that led to the rise of reform efforts organizations and publications such as Garden and Forest She reveals the intellectual core and vision of the magazine as a proponent of the city natural movement that sought to relate nature and civilization through the arts and sciences Garden and Forest was a staunch advocate of urban living made better through careful planning and design As Hou shows the publication also promoted forest management and preservation not only as a natural resource but as an economic one She also profiles the editors and contributors who set the magazine s tone and follows their efforts to expand America s environmental expertise Through the pages of Garden and Forest the early period of environmentalism was especially fruitful and optimistic many individuals joined forces for the benefit of humankind and helped lay the foundation for a coherent national movement Shen Hou s study gives Garden and Forest its due and adds an important new chapter to the early history of American environmentalism

Correction Lines Curt Meine,2013-04-10 The last fifteen years have been a period of dramatic change both in the world at large and within the fields of ecology and conservation The end of the Cold War the dot com boom and bust the globalizing economy and the attacks of September 11 among other events and trends have reshaped our worldview and the political environment in which we find ourselves At the same time emerging knowledge needs and opportunities have led to a rapid evolution in our understanding of the scientific foundations and social context of conservation Correction Lines is a new collection of essays from one of our most thoughtful and eloquent writers on conservation putting these recent changes into perspective and exploring the questions they raise about the past present and future of the conservation movement The essays explore interrelated themes the relationship between biological and social dimensions the historic tension between utilitarian and preservationist approaches the integration of varied cultural perspectives the enduring legacy of Aldo Leopold the contrasts and continuities between conservation and environmentalism the importance of political reform and the need to retool conservation to address twentyfirst century realities Collectively the essays assert that we have reached a critical

juncture in conservation a correction line of sorts Correction Lines argues that we need a more coherent and comprehensive account of the past if we are to understand our present circumstances and move forward under unprecedented conditions Meine brings together a deep sense of history with powerful language and compelling imagery yielding new insights into the origins and development of contemporary conservation Correction Lines will help us think more clearly about the forces that have changed and are changing conservation and inspire us to address current realities and future needs
