The Role of International Law in Rebuilding Societies After Conflict Brett Bowden, Hilary Charlesworth, Jeremy Matam Farrall, 2009-04-16 The genesis of this book was a workshop entitled Empire or Empowerment The Role of International Law in Building Democracy and Justice after Conflict held at the Australian National University in Canberra on 9-10 August 2007

Reconstructing Post-Saddam Iraq Sultan Barakat, 2007-08-16 Previously published as a special issue of Third World Quarterly this volume seeks to analyze to what extent the controversial US policy of democratizing the Middle East with pre-emptive invasions was justified or effective Post 9/11 the US developed a policy of War on Terror taking the decision to democratize the Middle East with pre-emptive in Southern Society and Its Transformations, 1790-1860 Susanna Delfino, Michele Gillespie, Louis M. Kyriakoudes, 2011-07-29 In Southern Society and Its Transformations a new set of scholars challenge conventional perceptions of the antebellum South as an economically static region compared to the North Showing that the pre-Civil War South was much more complex than once thought the essays in this volume examine the economic lives and social realities of three overlooked but important groups of southerners the working poor non-slaveholding whites and middling property holders such as small planters professionals and entrepreneurs The nine essays that comprise Southern Society and Its Transformations explore new territory in the study of the slave era South conveying how modernization took shape across the region and exploring the social processes involved in its economic developments The book is divided into four parts each analyzing a different facet of white southern life The first outlines the legal dimensions of race relations exploring the effects of lynching and the significance of Georgia's vagrancy laws Part II presents the advent of the market economy and its effect on agriculture in the South including the beginning of frontier capitalism The third section details the rise of a professional middle class in the slave era and the conflicts provoked The book's last section deals with the financial aspects of the transformation in the South including the credit and debt relationships at play and the presence of corporate entrepreneurship Between the dawn of the nation and the Civil War constant change was afoot in the American South Scholarship has only begun to explore these progressions in the past few decades and has given too little consideration to the economic developments with respect to the working class experience These essays show that a new generation of scholars is asking fresh questions about the social aspects of the South's economic transformation Southern Society and Its Transformations is a complex look at how whole groups of traditionally ignored white southerners in the slave era embraced modernizing economic ideas and actions while accepting a place in their race-based world This volume will be of interest to students of Southern and U.S. economic and social history

Mathematical Communities in the Reconstruction After the Great War 1918-1928 Laurent Mazliak, Rossana Tazzioli, 2021-03-27 This book is a consequence of the international meeting organized in Marseilles in November 2018 devoted to the aftermath of the Great War for mathematical communities It features selected original research presented at the meeting offering a new perspective on a period the 1920s not

extensively considered by historiography After 1918 new countries were created and borders of several others were modified Territories were annexed while some countries lost entire regions These territorial changes bear witness to the massive and varied upheavals with which European societies were confronted in the aftermath of the Great War The reconfiguration of political Europe was accompanied by new alliances and a redistribution of trade commercial intellectual artistic military and so on which largely shaped international life during the interwar period These changes also had an enormous impact on scientific life not only in practice but also in its organization and communication strategies The mathematical sciences which from the late 19th century to the 1920s experienced a deep disciplinary evolution were thus facing a double movement internal and external which led to a sustainable restructuring of research and teaching Concomitantly various areas such as topology functional analysis abstract algebra logic or probability among others experienced exceptional development This was accompanied by an explosion of new international or national associations of mathematicians with for instance the founding in 1918 of the International Mathematical Union and the controversial creation of the International Research Council Therefore the central idea for the articulation of the various chapters of the book is to present case studies illustrating how in the aftermath of the war many mathematicians had to organize their personal trajectories taking into account the evolution of the political social and scientific environment which had taken place at the end of the conflict

Rebuilding Communities After Displacement Mo Hamza,Dilanthi Amaratunga,Richard Haigh,Chamindi Malalgoda,Chathurangane Jayakody,Anuradha Senanayake,2023-02-19 This book presents a collection of double blind peer reviewed papers under the scope of sustainable and resilient approaches for rebuilding displaced and host communities Forced displacement is a major development challenge not only a humanitarian concern A surge in violent conflict as well as increasing levels of disaster risk and environmental degradation driven by climate change has forced people to leave or flee their homes both internally displaced as well as refugees The rate of forced displacement befalling in different countries all over the world today is phenomenal with an increasingly higher rate of the population being affected on daily basis than ever These displacement situations are becoming increasingly protracted many lasting over 5 years Therefore there is a need to develop more sustainable and resilient approaches to rebuild these displaced communities ensuring the long term satisfaction of communities and enhancing the social cohesion between the displaced and host communities Accordingly chapters are arranged around five main themes of rebuilding communities after displacement Response management for displaced communities The Built environment in resettlement planning Governance of displacement Socio Economic interventions for sustainable resettlement

Reconstructing Spain Dacia Viejo-Rose,2011 This book explores the role of cultural heritage in post conflict reconstruction whether as a motor for the prolongation of violence or as a resource for building reconciliation The research was driven by two main goals to understand the post conflict reconstruction process and to identify how this process evolves in the medium term and the impact it has on society The Spanish Civil War 1936 39 and

its subsequent phases of reconstruction provides the primary material for this exploration In pursuit of the first goal the book centers on the material practices and rhetorical strategies developed around cultural heritage in post civil war Spain and the victorious Franco regime s reconstruction The analysis captures a discursively complex set of practices that made up the reconstruction and in which a variety of Spanish heritage sites were claimed rebuilt or restored and represented as signs of historical narratives political legitimacy and group identity The reconstruction of the town of Gernika is a particularly emblematic instance of destruction and a significant symbol within the Basque regions of Spain as well as internationally By examining Gernika it is possible to identify some of the trends common to the reconstruction as a whole along with those aspects that pertain to its singular symbolic resonance In order to achieve the second goal the book examines the processes of selection value change and exclusionary dynamics of reconstruction Exploring the possible impact of post civil war reconstruction in the medium term is conducted in two time frames the period of political transition that followed General Franco s death in 1975 and the 2004 2008 period when Rodriguez Zapatero s government undertook initiatives to recover the historic memory of the war and dictatorship Finally the observations made of the Spanish reconstruction are analyzed in terms of how they might reveal general trends in post conflict reconstruction processes in relation to cultural heritage These insights are pertinent to the situations in Cambodia Bosnia and Herzegovina Afghanistan and Iraq

Violence and Post-war Reconstruction Christina Steenkamp, 2009-05-30 The uncomfortable truth about peace accords is that often they do not bring about a real and lasting peace while the conflict is officially over civilians still live with the daily threat of violence It is generally assumed that this does not pose a threat to the peace process yet the author shows how in reality violence that occurs at this time and within this context has a unique potential to cause damage In this much needed and pioneering study the author shows the impact of continuing physical insecurity upon the postwar reconstruction process Examining the type of violence when it occurs and the identity of those who commit it she reveals the serious implications for the reconstruction of state polity and society and for the quality of peace that emerges She shows how the use of violence to address everyday problems becomes increasingly acceptable explores the use of violence by organized groups in society and pays particular attention to civilian reactions to post accord insecurity In a final chapter she identifies a range of important considerations for the better understanding of a vital yet often neglected aspect of postwar reconstruction
