Recycling And The Politics:

Recycling and the Politics of Urban Waste Matthew Gandy, 2014-06-03 The affluence of western society has given rise to unprecedented quantities of waste presenting one of the most intractable environmental problems for contemporary society This book examines recycling and municipal waste management in three major cities London New York and Hamburg A range of political and economic issues are examined to illustrate how any reduction in the size of the waste stream in order to achieve more equitable and environmentally sustainable patterns of resource use is incompatible with the current emphasis in the use of the market for environmental protection The case studies show how contrary to the hopes of many environmentalists and policy makers municipal waste management is moving steadily towards the profitable option of incineration with energy recovery rather than the recycling of materials or waste reduction at source The evidence suggests that the achievement of a more sustainable pattern of recycling and waste management policy would demand a fundamental change in public policy to give government a more active role in environmental protection *Politics of Sustainable*

Development Susan Baker, 2012-08-08 The concept of sustainable development was popularised by the 1987 Brundtland Report and became a central theme in the EU's Fifth Environmental Action Programme It dominated the Rio Earth Summit and its promotion has been much in evidence in the subsequent **World Scientific Handbook Of Transboundary Water Management: Science, Economics, Policy And Politics (In 4 Volumes)**, 2025-01-10 The impacts of population growth climate change and water scarcity and variability on a country's economy or society in addition to the sheer need to harness international rivers for domestic and regional purposes have made the management of transboundary freshwater a subject of great import Over the past several decades research in various disciplines utilizing a variety of methodologies has explored these issues focusing on freshwater's strategic importance as well as conflict cooperation and negotiation over shared water bodies rivers lakes aquifers This multi volume set seeks to contribute to this still burgeoning body of literature by focusing on several key themes that can help explain and recognize successes and failures in transboundary freshwater management In particular the set seeks to bring together original scholarship focusing on international law technology institutions formal and informal and the interplay of domestic and international affairs Each edited volume in the set aims to build on extant research while also fostering new paths of inquiry Overall the set seeks to become a guide for both academics and practitioners hoping to better understand the joint management of this precious natural resource from socio political legal economic and technological perspectives Volume 1 explores international law for shared freshwater resources both surface and subsurface waters from a multidisciplinary perspective It explains the role of international water law IWL and or specific norms within particular contexts case studies and critically examines that role and its relative success or failure in achieving the intended objectives Volume 2 explores the roles of and limitations of technologies and their applications in the management of transboundary water and wastewater It presents case studies and legal and political analyses that focus on

the potential or actual roles and implications of the technologies in transboundary policy and management rather than detailed explications of the technologies themselves Volume 3 contributes to the growing literature seeking to understand how when and if institutions broadly defined impact states abilities to address their joint water disputes The volume presents a combination of single comparative and empirical analyses of cases across the world about the role of institutions in facilitating collaboration over transboundary water resources and mitigating conflict Volume 4 seeks to make sense of the interplay of domestic transnational and international dynamics in explaining conflict and cooperation over water through single or comparative case studies as well as analyses of on the ground transboundary water management experiences arising from these complex political dimensions

The Politics of Waste Management in Greater China Natalie Wai Man Wong, 2021-04-20 The growth of municipal waste is a common challenge found in the urbanised cities of Greater China but the question of how to manage municipal waste is controversial Wong examines the politics of managing municipal waste in three cities of Greater China Guangzhou Taipei and Hong Kong She looks at the controversies that arise from the issue and the consequent politicisation of the various solutions that are adopted Focusing particularly on the dynamics of policy actors in the three cities she compares the different political situations in each with the others This provides a valuable lens through which to explore the larger issue of the political transformation of Environmental Management in the Greater China region A compelling insight into environmental policymaking in Greater China for scholars studying the dynamics of Chinese politics

The Politics of the Elite Modesto Gayo, María Luisa Méndez, 2023-11-24 This book is a study of class formation at the top of the social hierarchies during the turbulent and changing early twenty first century Contrary to perceptions that privileged individuals exist according to little more than market and economic logics the book provides evidence that they are by no means absent from politics and civic engagement Adopting a focus on reproduction distinction and politics it delves into the complex relationship between cohesion and fragmentation that exists within the most privileged groups formed over the course of the contemporary neoliberal period By knitting a dialogue between spatial analysis multiple correspondence analysis and in depth interviews the book provides insights into the intricate relations between institutions and political subjectivities and the role of space and mothering in the political socialisation of Chile s most privileged families The result is a dense description of a social class fragmented by subtle ideological lines based upon economic inheritance socialisation within homogeneous family environments paths into the labour market and social and political activities This book will constitute a much needed research resource for academics students and professionals in areas such as elite studies social stratification inequality social reproduction accumulation political socialisation and contemporary conservative progressive views

Transatlantic Environment and Energy Politics Stacy D VanDeveer, Mr Henrik Selin, Professor Miranda A Schreurs, 2013-03-28 Environmental and energy policies have become increasingly significant in European and North American politics This fascinating book uses a wide range of case studies that embrace climate change product standards

chemical regulations renewable energy policies food safety and genetically modified organisms to examine areas of conflict and cooperation in the transatlantic relationship While there are many areas where the European Union and the United States are following divergent policy paths there are also many signs that a more cooperative transatlantic relationship could emerge in the future Transatlantic Environment and Energy Politics is highly relevant to understanding how the European Union and North America can cooperate more effectively in meeting today's many global environmental and energy policy challenges It is essential reading for all advanced students and scholars **What is Radical Politics Today?** J.

Pugh,2010-07-15 A crisis makes you rethink your life The recent economic crisis is no exception All of us are now thinking how the world could be run differently Despite this a radical alternative has hardly emerged to mobilize the masses Written for the public and students this book explores the character and spirit of radical politics in our times The Globalization of World Politics John Baylis,Steve Smith,Patricia Owens,2020 The best selling introduction to international relations offers the most comprehensive coverage of the key theories and global issues in world politics written by the leading experts in the field **Environmental Politics** Shannon O'Lear,2010-08-19 Shannon O Lear brings a geographer's perspective to environmental politics The book considers issues of climate change energy food security toxins waste and resource conflict to explore how political economic ideological and military power have contributed to the generation of environmental issues and the formation of dominant narratives about them The book encourages the reader to think critically about the power dynamics that shape and limit how we think about environmental issues and to expand the reader's understanding of why it matters that these issues are discussed at particular spatial scales Applying a geographer's sense of scale and power leads to a better understanding of the complexity of environmental issues and will help formulate mitigation and adaptation strategies The book will appeal mainly to advanced students and researchers from a geography background but also to social and political scientists who wish to look at the topic from this different perspective Post/humanitarian Border Politics between Mexico and the US V. Squire,2015-03-12 The author assesses the politics of different humanitarian interventions in the Mexico US border region developing a unique perspective on the significance of people places and things to contemporary border struggles
