**African-Americans in Defense of the Nation** James T. Controvich, 2011-03-28 The role of the African American in American history has been documented but sometimes ignored by historians This work is intended to assist researchers in locating the wealth of material that has been published African Americans in Defense of the Nation builds on a long list of early bibliographies concerning the subject This work brings together a broad spectrum of titles related to the African American participation in America s wars It covers

both the military exploits as African Americans have been involved in every American conflict since the Revolution and their participation in the homefront support in building the weapons that the armed forces used. Organized both chronologically and topically, chapters cover the various conflicts from the Revolutionary War to the Post World War II era and branches of the military as well as the role of African American women in the United States military. This extensive reference work is the most comprehensive listing of African American units available. Additionally, a listing of juvenile titles will assist parents and teachers in locating material.

*The Armed Forces and American Social Change* Troy Mosley, 2021-10-04. The Armed Forces and American Social Change is a powerful depiction of black Americans' struggle for equality told through the lens of uniformed military service. Troy Mosley uses superb storytelling, personal vignettes, and historical examples to show how millions of Americans have lifted themselves from oppression through opportunities gleaned from military service. Collectively, these efforts exerted positive outward pressure on American society, which by and large has resisted social change. One unique aspect of combat is that rarely are Americans more equal than when thrust into harm's way. It has been said there are no atheists in combat; similarly, racism, sexism, and homophobia quickly go by the wayside when under enemy fire. Yet in the 19th century and well into the 21st, America's military policies regarding the use of manpower could best be described as an awkward attempt to balance the requirement to win the nation's wars while supporting a socio-political caste system. President Harry Truman signed Executive Order 9981 on July 26, 1948, in response to police violence perpetrated against black veterans. His actions broke this trend and set the military on the path toward true meritocracy. Today, retired General Lloyd Austin is the first black American Secretary of Defense, in part due to the barriers broken down by those who served before him. The armed services fiercely resisted integration, gender equality, and LGBTQ equality but over time have grown to value America's wellspring of diversity as a strategic and operational advantage. Under the Trump administration, many military policies supporting transgender inclusion were reversed. This reversal thrust the U.S. military, among other institutions, into the ideological tug of war that lies at the heart of present-day polarization in American society. This ideological divide is the crux of the public discourse surrounding Critical Race Theory, America's racist and sexist past, and how we contextualize our history going forward for the betterment of the nation. As far as America has come, we still have work to do for Truman's vision of equality of opportunity to become a reality for all Americans. Join this thought-provoking narrative that celebrates brave American military pioneers and challenges us all to continue pushing for a better expression
