Red Bird Of Ireland:

The Birds of Ireland Jim Wilson, Mark Carmody, 2013-09-04 An important tool of a birdwatcher is a good identification guide. Most cover the birds of Europe and few deal exclusively with Ireland. This first photographic identification guide to the birds of Ireland has over 1 600 photos of more than 260 species in an easy quick reference format. With eight to fifteen images per species the key identification features of each bird are shown with concise descriptions and pointers to indicate important features. This guide is produced in association with BirdWatch Ireland, Ireland's leading bird conservation organisation. The purchase of this guide contributes funds to BirdWatch Ireland's conservation and education initiatives to help protect and promote Ireland's wild birds and habitats similar to Ireland's Garden Birds by Jim Wilson and Oran O'Sullivan.

The Complete Guide to Ireland's Birds Eric Dempsey, Michael O'Clery, 2002 The Complete Guide to Ireland's Birds includes the most up to date distribution maps and full descriptions of males, females, immatures, voice, diet and preferred habitat of over 300 species.

The Birds of Ireland Richard John Ussher, Robert Warren, 1900

Birds in Ireland Clive Hutchinson, 2010-10-30 Birdwatching has become an increasingly popular pastime in Ireland as elsewhere. Nor is all of the birdwatching done by the Irish. Many professional ornithologists from Britain and Western Europe find good reason to study Ireland's birds as do the numerous birdwatching visitors each year. Clive Hutchinson, a leading Irish ornithologist, has compiled this comprehensive review of birds in the Republic and Northern Ireland to coincide with the 21st anniversary year of the Irish Wildbird Conservancy's foundation and he has had the IWC's active support throughout. Knowledge about the status and distribution of birds in Ireland has increased greatly since the 1960s and this is reflected in the detailed species accounts which form the major part of the book. Factors which led to this greater knowledge, recent changes in bird distribution and status and reasons for the absence of some species are topics discussed in the book's introductory chapters. Other subjects covered are Ireland's topography, climate and habitats, a review of ornithology and ornithologists in Ireland over the last 100 years and conservation programmes of more recent times. John Busby's superb illustrations, more than 100, are a feature of the book, helping to set the Irish scene as well as depict its birds.

The Atlas of Wintering Birds in Britain and Ireland Peter Lack, 2010-11-30 This companion volume to *The Atlas of Breeding Birds of Britain and Ireland* is derived from surveys of birds present in Britain and Ireland during the three winters 1981-82, 1982-83 and 1983-84. The surveys were organised by the British Trust for Ornithology and the Irish Wildbird Conservancy as were the earlier breeding birds surveys. The Winter Atlas maps 200 species, 192 of which have full page two colour maps, faced by a page of text. The texts, written by over 100 specialists, comment on the survey results, the species generally and the distribution and abundance as mapped. In addition, there are introductory chapters on the maps, the weather in the three winters, bird patterns and movements and appendices describing the planning, organisation, field methods and processing of the survey data from record cards to computer output.
