Red Spike Bucklow,2016-06-15 Blood rust lava wine the flush of passion and the glow of approaching night no color arrests our attention more than the color red Today it is the flag of danger and seduction of spirit and revolution but throughout nearly all of human history it has held a special place in our aesthetics In this book Spike Bucklow brings us into the heart of this fiery hue to better understand the unique powers it has had over us Bucklow takes us from a thirty four thousand year old shaman burial dress to the iPhone screen exploring the myriad of purposes we have put red to as well as the materials from which we have looked to harvest it And we have looked for it everywhere from insects to tree resin to tar to excitable gasses Bucklow also details how our pursuit of the color drove medieval alchemy and modern chemistry alike and he shows us red s many symbolic uses its association with earth blood and fire its coloring of caves and the throne rooms of goddesses as well as national flags fire trucks power grids and stoplights The result is a material and cultural history that makes one see this color afresh beating with vibrancy a crucial part of the human visual world

The Functional Treatment of Parsing René Leermakers,2012-12-06 Parsing technology traditionally consists of two branches which correspond to the two main application areas of context free grammars and their generalizations Efficient deterministic parsing algorithms have been developed for parsing programming languages and quite different algorithms are employed for analyzing natural language The Functional Treatment of Parsing provides a functional framework within which the different

traditional techniques are restated and unified The resulting theory provides new recursive implementations of parsers for context free grammars The new implementations called recursive ascent parsers avoid explicit manipulation of parse stacks and parse matrices and are in many ways superior to conventional implementations They are applicable to grammars for programming languages as well as natural languages The book has been written primarily for students and practitioners of parsing technology With its emphasis on modern functional methods however the book will also be of benefit to scientists interested in functional programming The Functional Treatment of Parsing is an excellent reference and can be used as a text for a course on the subject

Smokechasing Stephen J. Pyne, 2022-05-31 Painting architecture politics even gardening and golf all have their critics and commentators observes Stephen Pyne Fire does not Aside from news reports on fire disasters most writing about fire appears in government reports and scientific papers and in journalism that has more in common with the sports page than the editorial page Smokechasing presents commentaries by one of America s leading fire scholars who analyzes fire the way another might an election campaign or a literary work Smokechasing is an American coinage describing the practice of sending firefighters into the wild to track down the source of reported smoke Now a self described friendly fire critic tracks down more of the history and lore of fire in a collection that focuses on wildland fire and its management Building on and complementing a previous anthology World Fire this new collection features thirty two original articles and substantial revisions of works that have previously appeared in print Pyne addresses many issues that have sparked public concern in the wake of disastrous wildfires in the West such as fire ecology federal fire management and questions relating to fire suppression He observes that the mistake in fire policy has been not that wildfires are suppressed but that controlled fires are no longer ignited yet the attempted forced reintroduction of fire through prescribed burning has proved difficult and sometimes damaging There are Pyne argues many fire problems some have technical solutions some not But there is no evading humanity s unique power and responsibility what we don t do may be as ecologically powerful as what we do Throughout the collection Pyne makes it clear that humans and fire interact at particular places and times to profoundly shape the world and that understanding the contexts in which fire occurs can tell us much about the world s natural and cultural landscapes Fire s context gives it its meaning and Smokechasing not only helps illuminate those contexts but also shows us how to devise new contexts for tomorrow s fires

[The Screen Is Red](#) Bernard F. Dick, 2016-03-14 *The Screen Is Red* portrays Hollywood's ambivalence toward the former Soviet Union before during and after the Cold War In the 1930s communism combated its alter ego fascism yet both threatened to undermine the capitalist system the movie industry's foundational core value Hollywood portrayed fascism as the greater threat and communism as an aberration embraced by young idealists unaware of its dark side In *Ninotchka* all a female commissar needs is a trip to Paris to convert her to capitalism and the luxuries it can offer The scenario changed when Nazi Germany invaded the Soviet Union in 1941 making Russia a short lived ally The Soviets were quickly glorified in such films as *Song of Russia* *The North Star* *Mission to Moscow* *Days of Glory* and *Counter Attack* But once the Iron Curtain fell on Eastern Europe the scenario changed again America was now swarming with Soviet agents attempting to steal some crucial piece of microfilm On screen the atomic detonations in the Southwest produced mutations in ants locusts and spiders and revived long dead monsters from their watery tombs The movies did not blame the atom bomb specifically but showed what horrors might result in addition to the iconic mushroom cloud Through the lens of Hollywood a nuclear war might leave a handful of survivors *Five none On the Beach Dr Strangelove* or cities in ruins *Fail Safe* Today the threat is no longer the Soviet Union but international terrorism Author Bernard F Dick argues however that the Soviet Union has not lost its appeal as evident from the popular and critically acclaimed television series *The Americans* More than eighty years later the screen is still red

Red Sky at Night Elly MacKay, 2018-05-01 A memorable collection of weather sayings beautifully arranged in story form and illustrated by renowned paper artist Elly MacKay *Red sky at night sailor's delight* And the next morning when the dew is on the grass no rain will come to pass These are the perfect conditions for a grandfather to take his grandchildren out on a fishing trip Especially since as the saying goes when the wind is from the West then the fishes bite the best The family takes a boat out on the lake fishing and swimming and eventually camping out on a nearby island taking full advantage of the gorgeous weather But the next day red sky in the

morning sailors take warning The family ventures back home just in time to avoid a rainstorm But not to worry the more rain the more rest Fair weather s not always best Acclaimed paper artist Elly MacKay illustrates a lovely family narrative through the use of weather aphorisms creating a beautiful and informational story which will appeal to children s timeless fascination with the natural world

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The Secret History is a brilliant and thrilling novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
