**Redefining Politics** Adrian Leftwich, 2013-04-15 This book challenges conventional conceptions of politics which focus largely on the institutions of government and the associated struggles for power around them It argues that politics is involved in all the activities of cooperation and conflict whereby people organize the use production and distribution of human natural and material resources Found in all human groups institutions and societies politics everywhere influences and reflects the structures of power social organization culture and ideology These central themes are illustrated by drawing on a wide range of societies including the Kung hunter gatherers the pre Columbian Aztecs and the Pastoral Maasai as well as modern Britain and Third World societies from Chile to China Other examples of village communities a typical university department and the World Bank show how institutions may also be analyzed in terms of the definition of politics used here It is equally central to the argument that many of the most critical problems occurring in societies can be attributed to their politics and this theme is explored looking at such problems as poverty famines epidemics violence and unemployment in Britain and throughout the world

**Innovations for Land Management, Governance, and Land Rights for Sustainable Urban Transitions** Ahmed M. Soliman,Ramin Keivani,2024-07-27 The transformation of the built environment during the last few decades has placed enormous demands for land About 7 7 billion people live on the planet which is expected to increase by 2 5 3 0 billion in just 30 years with the highest growth projected to be in less developed regions The spreading of urban informality in cities of the Global South leads to chaotic informal economies and an inability to capitalize on urban rural economies of scale and exchange The combination of socioeconomic and climate change vulnerability in urban centres is having a double impact on already poverty stricken and marginalized groups especially women racialized and ethnic minority groups leading to what has come to be known as climate injustice Land constitutes a main component of urban development and is the main asset for informal urban communities in the Middle East region The State and urban planners can aim to regulate the growth of informal land markets or represent the interests of the citizens However in reality the increasing retreat or absence of the public authorities the crisis of confidence between the governed and governing and the deficit of urban policies to address the multitude of generated challenges cannot be concealed This volume examines three main themes land management and governance in the era of sustainability Legal informal and illegal land tenures and the broader socioeconomic changes impacting land and housing delivery It investigates the correlations transitions and interactions between the various forces and multi stakeholders that control and adjust the land delivery system for low income groups and the urban poor This includes exploring mechanisms for correcting urban inequalities between central and peripheral quarters and the modes of shared governance Finally the volume also discusses developing national land policies based on legal instruments that connect the implementation of the SDGs land and tenure security as critical drivers for more sustainable land delivery realization

*The Politics of the Excluded, c. 1500-1850* Tim Harris,2017-03-14 This collection of essays seeks to shed light on the politics of those people who are normally thought of as being excluded from the political

nation in early modern England If by political nation we mean those who sat in parliament the governors of counties and towns and the enfranchised classes in the constituencies then the excluded would be those who were neither actively involved in the process of governing nor had any say in choosing those who would rule over them the bulk of the population at this time Yet this volume shows that these people were not in fact excluded from politics Not only did the masses possess political opinions which they were capable of articulating in a public forum but they were also often active participants in the political process themselves and taken seriously in that capacity by the governmental elite The various essays deal with topics as wide ranging as riots rumours libels seditious words public opinion the structures of local government and the gendered dimensions of popular political participation and cover the period from the eve of the Reformation to the Industrial Revolution They challenge many existing assumptions concerning the nature and significance of public opinion and politics out of doors in the early modern period and show us that the people mattered in politics and thus why we as historians cannot afford to ignore them Politics was more participatory in this undemocratic age than one might have thought The contributors to this volume show that there was a lively and engaged public sphere throughout this period from Tudor times to the Georgian era

**The Permanence of the Political** Joseph M. Schwartz, 1995-11-13 Why have radical political theorists whose thinking inspired mass movements for democracy been so suspicious of political plurality According to Joseph Schwartz their doubts were involved with an effort to transcend politics Mistakenly equating all social difference with the harmful way in which particular interests dominated marketplace societies radical thinkers sought a comprehensive set of true human interests that would completely abolish political strife In extensive analyses of Rousseau Hegel Marx Lenin and Arendt Schwartz seeks to mediate the radical critique of democratic capitalist societies with the concern for pluralism evidenced in both liberal and postmodern thought He thus escapes the authoritarian potential of the radical position while appropriating its more democratic implications In Schwartz's view a reconstructed radical democratic theory of politics must sustain liberalism's defense of individual rights and social pluralism while redressing the liberal failure to question structural inequalities In proposing such a theory he criticizes communitarianism for its premodern longing for a monolithic virtuous society and challenges the politics of difference for its failure to question the undemocratic terrain of power on which difference is constructed In conclusion he maintains that an equitable distribution of power and resources among social groups necessitates not the transcendence of politics but its democratic expansion

**Language and the Complex of Ideology** Mohamed Douifi, 2018-06-26 This book undertakes a systematic analysis of the workings of ideology in discourse using an interdisciplinary approach that links language cognition and society Through examination of two corpora a collection of British newspaper articles and a set of political speeches the author examines Britain's involvement in the Iraq War 2003 and critically assesses the language practices which constructed a pro war ideology under Tony Blair's premiership Drawing on a constellation of concepts from van Dijk's socio cognitive model this book carries out both

qualitative and quantitative analyses and conceptualises discourse as a nonlinear highly discursive and socio cognitive phenomenon This innovative work will appeal to students and scholars of Cognitive Linguistics Quantitative Linguistics Social Constructivism Critical Discourse Analysis Political Sciences and Communication Studies *The Politics of Migration in Indonesia and Beyond* Riwanto Tirtosudarmo,2019-01-22 This book examines the social and political dimensions of migration from a perspective between the realms of demography and politics It approaches the issue of migration by highlighting the important power relations that have previously been neglected in studies in the area The book starts by investigating Indonesian migration to provide an understanding of internal migration It then looks beyond its national borders for a wider understanding of Asia and showcases several case studies both in Indonesia and beyond to illustrate the intricate politics of migration Further it considers the politics of migration from the sending country perspective and unravels the link between migration and security The book provides reviews of the wider literature relating to population mobility and distribution and shows readers how to adopt a new perspective in the study of movement of people an issue that is becoming increasingly important as movement of people unfolds globally in terms of both volume and direction This book is a valuable resource for students academics and researchers in the area of demography and social politics especially those interested in migration and refugees It also offers insights for those interested in understanding decentralization in greater depth

in Africa the nature of and reasons for state deterioration and the mechanisms and policies for coping with state malfunction
