Reducing Poverty An Institutional Perspective:

Reducing Poverty Lawrence F. Salmen, 1992 *Business, Entrepreneurship and Innovation Toward Poverty Reduction* Steven Si, David Ahlstrom, Wei Jiang, John Cullen, 2021-07-26 Ways in which poverty can be reduced in both countries and regions through business entrepreneurship and government has been a hot issue for researchers and policymakers in recent years. Governments can play an important role in helping the poor people by non-profit organizations and others that help to seed business among the poor. Businesses increasingly also see the large number of people in severe poverty not only as an issue for social concern but also as a potentially large untapped market of consumers for goods and services. Some scholars have called for poverty reduction through entrepreneurship owing to the fact that it can be an efficient path to also change the poor's attitudes and behaviours from a passive mode to a more active mode towards poverty reduction economically and socially. In addition, the sharing economy brings opportunities where everyone is a micro entrepreneur. There is a recognition that these types of entrepreneurship above could offer the greatest single potential means to move individuals out of poverty in the nations and regions in the next 5-10 years. This book provides new and valuable analyses of poverty and business entrepreneurship and innovation in current nations and regions including developing and developed countries. As business entrepreneurship and innovation can help to generate greater business activity in settings of severe poverty, they will help to solve poverty as individuals in severe poverty are able to both generate greater incomes and accumulate greater assets as they participate with large firms in those activities. The chapters in this book were originally published as a special issue of the *Entrepreneurship Regional Development* Institutional Development Ronald McGill, 2016-07-27 This book reviews the theoretical perspectives on institutional development (ID) and third world city management. It considers the practice of ID in city management by reviewing two related cases on organizational strengthening and building a planning capability both in local government. The synthesizing chapters offer some guidelines on and tests for ID in city management practice. The book therefore seeks to identify some general principles to guide the ID process in relation to third world city management.

Seeing Like an International Organization André Broome, Leonard Seabrooke, 2017-12-22 This book contributes to the study of International Organizations (IOs) by providing a sharp focus on how IOs' analytic institutions interact with states over key policy issues. Analytic institutions include the areas departments, committees, adjudicatory bodies and others housed by or linked to IOs that develop the cognitive framework for identifying, understanding and solving policy problems. Analytic institutions make the state legible to IOs and are the key means for how IOs see their member states, shaping how international political and economic problems are understood. This book investigates why 'seeing like an IO' matters through cases on leading organizations for global economic governance including the International Monetary Fund, the World Bank, the Bank for International Settlements, the Organisation for Economic Co-operation and Development and the World Trade Organization. The contributors demonstrate the benefits of studying IOs from the inside out to enrich our understanding of

why issues in the international political economy are governed the way they are This book was published as a special issue of New Political Economy *Policy Reform for Sustainable Development in the Caribbean* Michele Garrity, Louis A. Picard, 1996 The Caribbean countries and many other Third World countries in Latin America Asia and Africa have been under the yoke of structural adjustment measures for more than a decade Numerous studies have addressed the inequality of North South relations the lack of transparency in negotiations that have led to the signature of agreements the absence of a clear definition of responsibilities of the parties engaged the inadequacy and inadaptation of policies with regard to the socio cultural context and especially the refusal to take into account the social demands of the most deprived The criticisms formulated in this book can only find a beginning of solutions by the setting up of a solid administrative organization in which the public officials are made accountable and who once aware of the national and international stakes can confront the constraints involved in State international negotiation relations The book is a very rich presentation of the concept and the problems of structural adjustment and institutional development in the developing countries Beside the impressive introduction and the convincing conclusion the articles on these prerequisites for institutional sustainability present the most important empirical research results The contents is a clear description of problems failures and results in institutional reforms

Institutional Analysis and Praxis Tara Natarajan, Wolfram Elsner, Scott Fullwiler, 2009-09-03 There has never been a better time for the social fabric matrix As this book is being published the idea that unregulated market capitalism leads to the best of all possible worlds has been thoroughly discredited A series of economic and social problems have come to the forefront of national discussion and policy debates There is now widespread acceptance that human activity particularly the consumption of nonrenewable energy resources has contributed to global warming The lack of oversight of the financial industry encouraged reckless practices that endangered the stability of the entire financial system prompting bailout efforts based on the fragile interdependence of the financial and economic systems The shortcomings of our health care system are increasingly evident including the growing number of uninsured citizens the difficulties for businesses in offering health insurance and the effects of health and health care on the ability of individuals and families to maintain a decent standard of living Perhaps the best illustration of a complex system that cries out for coordinated policy making is in the critical area of energy where public and private decisions on energy policy not only have direct effects on consumer costs but also have effects on global warming local ecosystems international relations the health of our citizens and the sustainability of companies and communities In short there is growing recognition of the interdependence of the economic system with the environment and the broader institutions of society

Institutional Analysis and Economic Policy Marc R. Tool, Paul Dale Bush, 2012-12-06 The purpose of this volume is to demonstrate how contemporary institutional economic analysis can be applied to the resolution of economic problems All of the essays in this book challenge the conventional wisdom in the problem areas addressed They advocate policy positions that often run contrary to views widely held by academic economists and policy makers alike The general literature of institutional economics is unorthodox beginning with its methodological foundations and continuing through the kind of policy analysis found in these pages The orthodox tradition in economics is commonly characterized as neoclassical economics Neoclassical economics fosters the myth that only the market can efficiently allocate a society's economic resources and equitably distribute its income It provides the intellectual defense for in which free markets are championed over democratic capitalist ideology policy formation which it contends is neither efficient nor equitable For both professional economists and policy makers of a conservative political persuasion neoclassical economics writes the script for a morality play in which the market is the good guy and the government is the bad guy As such it undermines the belief that free societies can enhance economic welfare through the use of democratic processes in the formulation of economic policies
