Reed College Creative Review Spring 2005:

Constructing Black Education at Oberlin College Roland M. Baumann,2014-07-31 In 1835 Oberlin became the first institute of higher education to make a cause of racial egalitarianism when it decided to educate students irrespective of color Yet the visionary college s implementation of this admissions policy was uneven In Constructing Black Education at Oberlin College A Documentary History Roland M Baumann presents a comprehensive documentary history of the education of African American students at Oberlin College Following the Reconstruction era Oberlin College mirrored the rest of society as it reduced its commitment to black students by treating them as less than equals of their white counterparts By the middle of the twentieth century black and white student activists partially reclaimed the Oberlin legacy by refusing to be defined by race Generations of Oberlin students plus a minority of faculty and staff rekindled the college s commitment to racial equality by 1970 In time black separatism in its many forms replaced the integrationist ethic on campus as African Americans sought to chart their own destiny and advance curricular change Oberlin s is not a story of unbroken progress but rather of irony of contradictions and integrity of myth and reality and of imperfections Baumann takes readers directly to the original sources by including thirty complete documents from the Oberlin College Archives This richly illustrated volume is an important contribution to the college s 175th anniversary celebration of its distinguished history for it convincinglydocuments how Oberlin wrestled over the meaning of race and the destiny of black people in American society

Adamson, 2013-01-15 While architects have been the subject of many scholarly studies we know very little about the companies that built the structures they designed This book is a study in business history as well as civil engineering and construction management It details the contributions that Charles I Pankow a 1947 graduate of Purdue University and his firm have made as builders of large often concrete commercial structures since the company's foundation in 1963 In particular it uses selected projects as case studies to analyze and explain how the company innovated at the project level The company has been recognized as a pioneer in design build a methodology that involves the construction company in the development of structures and substitutes negotiated contracts for the bidding of architects plans The Pankow companies also developed automated construction technologies that helped keep projects on time and within budget The book includes dozens of photographs of buildings under construction from the company s archive and other sources At the same time the author analyzes and evaluates the strategic decision making of the firm through 2004 the year in which the founder died While Charles Pankow figures prominently in the narrative the book also describes how others within the firm adapted the business so that the company could survive a commercial market that changed significantly as a result of the recession of the 1990s Extending beyond the scope of most business biographies this book is a study in industry innovation and the power of corporate culture as well as the story of one particular company and the individuals who created it.
