Reference And Referent Accessibility Pragmatics And Beyond New Series:

Reference and Referent Accessibility Thorstein Fretheim, Jeanette K. Gundel, 1996-06-26 The papers in this volume are concerned with the question of how a speaker's intended referent is interpreted by the addressee Topics include the interpretation of coreferential vs disjoint reference the role of intonation syntactic form and animacy in reference understanding and the way in which general principles of utterance interpretation constrain possible interpretations of referring expressions The collection arises from a workshop on reference and referent accessibility which was held at the 4th International Pragmatics Conference in Kobe Japan July 25-30 1993

Grammaticalization and Language Change Kristin Davidse, Tine Breban, Lieselotte Brems, Tanja Mortelmans, 2012-10-30 This collective volume focuses on the latest developments in the study of grammaticalization and related processes of change such as degrammaticalization constructionalization lexicalization and petrification It addresses topical issues relating to the motivations sources defining features and outcomes of these changes New theoretical reflections are offered on the pragmatic motivation of grammaticalization paths process oriented differences between grammaticalization lexicalization and degrammaticalization the question of gradualness and pace of grammaticalization and deictics as a distinct source of grammaticalization The articles describe various constructional and distributional changes affecting deictics determiners reflexives clitics nouns affixes adverbs and auxiliary verbs mainly in the Germanic and Romance languages The volume will be of great interest to historical linguists working on grammaticalization and related changes and to all linguists working on the interface between morphosyntax semantics pragmatics and discourse

Definiteness across languages Ana Aguilar-Guevara, Julia Pozas Loyo, Violeta Vázquez-Rojas Maldonado, 2019 Definiteness has been a central topic in theoretical semantics since its modern foundation However despite its significance there has been surprisingly scarce research on its cross linguistic expression With the purpose of contributing to filling this gap the present volume gathers thirteen studies exploiting insights from formal semantics and syntax typological and language specific studies and crucially semantic fieldwork and cross linguistic semantics in order to address the expression and interpretation of definiteness in a diverse group of languages most of them understudied The papers presented in this volume aim to establish a dialogue between theory and data in order to answer the following questions What formal strategies do natural languages employ to encode definiteness What are the possible meanings associated to this notion across languages Are there different types of definite reference Which other functions besides marking definite reference are associated with definite descriptions Each of the papers contained in this volume addresses at least one of these questions and in doing so they aim to enrich our understanding of definiteness

Pragmatics in 2000 Enikő Németh T., 2001 *Historical Pragmatics* Andreas H. Jucker, 1995-01-01 Until very recently pragmatics has been restricted to the analysis of contemporary spoken language while historical linguistics has studied historical texts and language change in a decontextualized way This has now radically changed and scholars from around the

world are trying to build a new theoretical framework that integrates recent advances both in pragmatics and in historical linguistics The volume which contains 22 original articles starts with an introduction that is both a state of the art account of historical pragmatics and a programmatic statement of its future potential and its different subfields Part I contains seven pragmaphilological papers that deal with historical texts and their interpretations by paying close attention to the communicative context of these texts The second and third parts comprise papers in diachronic pragmatics The ten papers of part II take a linguistic form as their starting point e g particular lexical items or syntactic constructions and study their pragmatic functions at different times diachronic form to function mappings while the four papers of part III take a particular pragmatic function as their starting point e g discourse strategies or politeness and study their linguistic realisation at different times diachronic function to form mappings

Portuguese Missionary Grammars in Asia, Africa and Brazil, 1550-1800 Otto Zwartjes, 2011-11-23 From the 16th century onwards Europeans encountered languages in the Americas Africa and Asia which were radically different from any of the languages of the Old World Missionaries were in the forefront of this encounter in order to speak to potential converts they needed to learn local languages A great wealth of missionary grammars survives from the 16th century onwards Some of these are precious records of the languages they document and all of them witness their authors attempts to develop the methods of grammatical description with which they were familiar to accommodate dramatically new linguistic features This book is the first monograph covering the whole Portuguese grammatical tradition outside Portugal Its aim is to provide an integrated description analysis and evaluation of the missionary grammars which were written in Portuguese Between them these grammars covered a huge range of languages in Asia Tamil four Indo Aryan languages and Japanese in Brazil Kipe and Tupinamb in Africa and the African diaspora Kimbundu and Sena from the modern Angola and Mozambique respectively Each text is placed in its historical context and its linguistic context is analyzed with particular attention to orthography the parts of speech system morphology and syntax Whenever possible pedagogical features of the grammars are discussed together with their treatment of language variation and pragmatics and the evidence they provide for the missionaries attitude towards the languages they studied

On the Compositional Nature of States E. Matthew Husband, 2012-06-27 This monograph pursues a structural analogy between the availability of an existential interpretation in states and the telicity of events Focusing on evidence from both verbal and adjectival predicates it argues that quantization forms the basis of a unified theory of aktionsart and provides a theory in which the availability of an existential interpretation in states is like the telicity of events determined compositionally by the predicate and the quantization of its internal argument Quantization is further argued to reflect the internal temporal constitution of the stages of an individual which is tied to the generation of an existential interpretation This monograph will be of interest to syntacticians and semanticists who are specifically concerned with compositional approaches to eventualities and to those who have a more general interest in the role linguistic theory can play in determining core

properties of the mind The Semantics of Generics in Dutch and Related Languages Albert Oosterhof, 2008 This monograph is a comprehensive study of the various ways in which genericity can be expressed in Dutch dialects of Dutch and languages related to Dutch On the basis of empirical corpus and questionnaire based data a wide range of topics are discussed which have been addressed in the literature on the semantics and pragmatics of generics The empirical data presented in this book shed new light on issues crucial to the study of genericity A number of widely accepted ideas are shown to be problematic For example arguments are presented against the well known claim that progressive forms typically exclude characterizing interpretations Furthermore the author shows that speakers do not agree in their judgements of the acceptability of bare plurals as well as other noun phrase types in generic contexts Such data are a problem for the influential thesis that bare plurals refer to kinds unambiguously **Referring Expressions, Pragmatics, and Style** Kate Scott, 2020 A relevance theoretic account of reference with a focus on its role in creating stylistic attitudinal and emotional effects Referring in a Second Language Jonathon Ryan, Peter Crosthwaite, 2020-03-19 The introduction and tracking of reference to people or individuals known as referential movement is a central feature of coherence and accounts for about every third word of discourse Located at the intersection of pragmatics and grammar reference is now proving a rich and enduring source of insight into second language development The challenge for second language L2 learners involves navigating the selection and positioning of reference in the target language continually shifting and balancing the referential means used to maintain coherence while remaining acutely sensitive to the discourse and social context The present volume focuses on how L2 learners meet that challenge bringing together both eminent and up and coming researchers in the field of L2 acquisition The chapters address a range of problems in second language acquisition SLA e g form function mapping first language L1 influence developmental trajectories and do so in relation to various theoretical approaches to reference e g Accessibility Theory Givenness Hierarchy The global outlook of these studies relates to the L2 acquisition of English French Japanese Korean and Spanish and covers a diverse range of situational contexts including heritage language learning English as a medium of instruction and the development of sociolinguistic competence **The Functional Perspective on Language and Discourse** María de los Ángeles Gómez González, Francisco José Ruiz de Mendoza Ibáñez, Francisco González García, Angela Downing, 2014-05-15 Over the last forty years the functionalist approach to linguistic description and explanation has given rise to several major schools of thought that share two crucial assumptions i form is not independent of meaning function or language use and ii linguistic description and explanation need to take into account the communicative function of language This volume offers readers interested in functional linguistics a selected sample of studies that jointly prove the efficacy of the analytical tools and procedures broadly accepted within the functionalist tradition in order to investigate language and discourse with special focus on key pragmatic discourse notions such as contextualization grammaticalisation reference politeness in directness discourse markers speech acts subjective evaluation

and sentiment analysis in texts among others In addition this volume offers specific corpus based techniques for the objective contextualisation of linguistic data which is crucial given the central role allotted to context in both functional linguistics and pragmatics discourse analysis **The Cumulative Book Index** ,1997 A world list of books in the English language
