Reflections Notes Of A Psychologist

Michael G. Johnson, Tracy B. Henley

Reflections Notes Of A Psychologist:

Reflections on the Principles of Psychology Michael G. Johnson, Tracy B. Henley, 2013-04-15 This important volume looks back to 1890 and 100 years later asks some of the same questions William James was asking in his *Principles of Psychology*. In so doing it reviews our progress toward their solutions. Among the contemporary concerns of 1990 that the editors consider are the nature of the self and the will, conscious experience, associationism, the basic acts of cognition and the nature of perception. Their findings, although the developments in each of these areas during the last 100 years have been monumental, James' views as presented in the *Principles* still remain viable and provocative. To provide a context for understanding James, some chapters are devoted primarily to recent scholarship about James himself, focusing on the time the *Principles* was written, relevant intellectual influences and considerations of his understanding of this new science of psychology. The balance of this volume is devoted to specific topics of particular interest to James. One critical theme woven into almost every chapter is the tension between the role of experience or phenomenological data within a scientific psychology and the viability of a materialistic or biologically reductive account of mental life. Written for professionals, practitioners and students of psychology in all disciplines.
