Mead* Filipe Carreira da Silva, 2013-04-26 G H Mead is rightly considered to be one of sociology s founding fathers yet to date there have been surprisingly few books devoted to his life and work This book fills the gap by introducing Mead s ideas to a younger generation of social scientists Beginning with a biographical account of the main events in Mead s career Filipe Carreira da Silva provides a thorough examination of Mead s social theory of the self the reception of his ideas into sociology and the relevance of his work to the contemporary social sciences He focuses in detail on the core ideas associated with Mead s work including gesture and the significant symbol the I me distinction and the generalized other as well as exploring less well known aspects of his writing This comprehensive introduction to Mead s thinking will appeal to students across the social sciences providing a refreshing perspective on the social nature of the individual self      **The Oxford Handbook of Compassion Science** Emma M. Seppälä, Emilianina Simon-Thomas, Stephanie L. Brown, Monica C. Worline, C. Daryl Cameron, James R. Doty, 2017-09-26 How do we define compassion Is it an emotional state a motivation a dispositional trait or a cultivated attitude How does it compare to altruism and empathy Chapters in this Handbook present critical scientific evidence about compassion in numerous conceptions All of these approaches to thinking about compassion are valid and contribute importantly to understanding how we respond to others who are suffering Covering multiple levels of our lives and self concept from the individual to the group to the organization and culture The Oxford Handbook of Compassion Science gathers evidence and models of compassion that treat the subject of compassion science with careful scientific scrutiny and concern It explores the motivators of compassion the effect on physiology the co occurrence of wellbeing and compassion training interventions Sectioned by thematic approaches it pulls together basic and clinical research ranging across neurobiological developmental evolutionary social clinical and applied areas in psychology such as business and education In this sense it comprises one of the first multidisciplinary and systematic approaches to examining compassion from multiple

*Beyond the Systems Paradigm* Luciano L'Abate, 2013-05-30 This monograph owes its origins to the decades old proposal by David Bakan 1968 about the duality of human experience He proposed that community and agency would be two necessary and sufficient constructs to classify and to encompass most human relationships This dichotomy has been found to be valid by a variety of contributions over the last half a century L Abate 2009 L Abate Cusinato Maino Colesso Scilletta 2010 Additionally the purpose of this book is to argue and assert that two important fields of psychology family and personality psychologies if not already dead are conceptually empirically and practically moribund They are being superseded respectively by perhaps more appropriate perhaps more specific and more likely verifiable concepts and constructs such as intimacy and identity The traditional family still conceived as composed by two parents and two children of different gender is responsible for only one fourth of all domiciles in USA Singles same sex couples and completely different family organization complete the remaining 100% Difficulties in defining what is personality require a change in perspective and advance toward a comprehensive theory of human relationships that can and should fulfill requirements necessary to achieve an undoubtedly grandiose and ambitious universal status
