Reform in Detroit: Hazen S. Pingree and Urban Politics Melvin G. Holli, 1969 **Black Mayors and School Politics** Wilbur C Rich, 2021-12-12 First Published in 1996 Some people believe that if inner city black children had excellent schools they would perform better in them Granted schools are a part of the problem but they are not all of the solution Schools are only buildings where teachers administrators and students interact Learning is a more much complex process There are many forces arrayed against an inner city child that preclude him her from mastering the education process Among these forces are poverty family instability disruptive classroom environments and incompetent teachers There seems to be no end to research and speculation about how to overcome these forces However the author asserts that the gap between black and white children continues to widen With research beginning in 1989 exploring three school systems for this study Detroit Michigan Gary Indiana and Newark New Jersey The book presents a systematic survey of school politics in these three cities giving particular emphasis to local reform efforts **Reform in Detroit** Melvin G. Holli, 1969 *Mayors in the Middle* Jeffrey R. Henig, Wilbur C. Rich, 2020-12-08 Desperate to jump start the reform process in America s urban schools politicians scholars and school advocates are looking increasingly to mayors for leadership But does a stronger mayoral role represent bold institutional change with real potential to improve big city schools or just the latest in the copycat world of school reform du jour Is it democratic Why have efforts to put mayors in charge so often generated resistance along racial dividing lines Public debate and scholarly analysis have shied away from confronting such issues head on Mayors in the Middle brings together for students of education policy and urban politics as well as scholars and school advocates the most thoughtful and original analyses of the promise and limitations of mayoral takeovers of schools Reflecting on the experience of six cities Baltimore Boston Chicago Detroit Cleveland and Washington D C ten of the nation s leading experts on education politics tackle the question of whether putting mayors in charge is a step in the right direction Through the case studies and the wide ranging essays that follow and build upon them the contributors Stefanie Chambers Jeffrey R Henig Kenneth J Meier Jeffrey Mirel Marion Orr John Portz Wilbur C Rich Dorothy Shipps and Clarence N Stone begin the process of answering questions critical to the future of inner city children the prospects for urban revitalization and the shape of American education in the years to come **Reinterpreting Urban School Reform** Louis F. Miron, Edward P. St. John, 2012-02-01 Have urban schools failed or has reform failed urban schools This book examines existing urban school programs ranging from desegregation to reading improvement in light of available historical empirical and case study evidence Miron and St John and their contributors probe the underlying theoretical normative and political assumptions embedded in specific reform initiatives They explore how reforms might be reconstructed to better address the underlying challenges and they demonstrate that reforms can be constructively critiqued throughout the stages of implementation arguing that greater attention should be paid to ethnic and cultural traditions within urban educational settings Contributors include Leetta Allen

Rape Law Reform Cassia Spohn, Julie Horney, 2013-11-27

This book evolved from our interest in rape as feminists and as social scientists As feminists we were concerned about the treatment of rape victims and the attrition in rape cases under traditional rape law and we welcomed legal reforms designed to improve the situation As social scientists we wondered about the efficacy of legal changes aimed at an inherently resistant court system We also were curious about the lack of studies examining the impact of these changes we were particularly surprised to find that no one had attempted to analyze the impact of the reforms in more than one jurisdiction Convinced that untangling the effects of the reforms from the effects of contextual factors required a multijurisdictional study we decided to undertake the project We quickly discovered that evaluating rape law reform in several jurisdictions would be no easy task We had decided that such an evaluation would require monthly data on the outcome of rape cases before and after the reforms were implemented as well as qualitative data on the attitudes of criminal justice officials toward the reforms Because states do not generate monthly data on case outcomes we would have to collect the data ourselves from court records maintained by individual jurisdictions To obtain an adequate number of cases for the time series analysis we would have to select our sites from large urban jurisdictions scattered throughout the United

States States of Siege Bert Useem, Peter Kimball, 1991-07-18 This book examines case studies of recent prison riots in five states including the 1971 radical uprising in Attica New York and the infamous 1981 bloodbath at the New Mexico Penitentiary The most extensive and detailed work yet written on US prison riots the authors explain the occurrence and variations of riots as a reflection of the administrative breakdown of the prison system within a changing ideological context A theoretical appendix helps make this work an ideal introduction to sociological theories of collective action **The Failed Promise of the American High School, 1890-1995** David L. Angus, Jeffrey Mirel, 1999 This provocative new study of the American high school examines the historical debates about curriculum policy and also traces changes in the institution itself as evidenced by what students actually studied Contrary to conventional accounts the authors argue that beginning in the 1930s American high schools shifted from institutions primarily concerned with academic and vocational education to institutions mainly focused on custodial care of adolescents Claiming that these changes reflected educators racial class and gender biases the authors offer original suggestions for policy adjustments that may lead to greater educational equality for our ever growing and ever more diverse population of students **Report** Michigan. Reformatory, Ionia, 1882 **The Charter School Challenge** Bryan C. Hassel, 2011-05-01 Charter schools have become a national phenomenon garnering praise from both Democrats and Republicans Because they appear to sidestep both political stalemate and the practical difficulty of implementing widespread change the traditional barriers to improvement in American public education charter schools hold great promise as an educational reform Now with charter laws on the books in more than thirty states Bryan Hassel investigates whether charter schools have been able to avoid the pitfalls that have tripped up so many other revolutionary school reforms After a broad overview of how charter laws have been adopted nationwide this book focuses in depth on charter schools in Colorado Georgia Massachusetts and Michigan Hassel reviews the four states implementation of charter laws and whether their programs are providing sufficient autonomy resources and potential to influence the broader education system all essential components for charter schools success He concludes that if states want to give charter schools a full test they should empower nonlocal entities to approve charter schools establish the schools as distinct local entities allow full per pupil funding to go with students to the charter schools and impose minimal constraints on the source and number of charter schools The schools themselves will need to improve their infrastructure and charter granting agencies will have to rebuild the systems for monitoring schools academic results and compliance with regulations These policies are vital if charter schools are to realize their potential as a significant educational reform **Neoliberalism, Cities and Education in the Global South and North** Kalervo N. Gulson, Thomas C. Pedroni, 2016-04-08 Across the world cities are being reshaped in myriad ways by neoliberal forms of globalization a process of urban restructuring with significant implications for educational policy and practices The chapters in this collection speak to two complementary but analytically distinguishable aspects of the interplay between education globalization cities and neoliberalism The first aspect

relates to the macro relationships between these powerful global forces on the one hand and cities and their schools on the other. In particular, the book considers the stratifying dynamics that exacerbate already existing inequalities related to race, ethnicity, language, class, and gender inequalities, entailing differential access to the city's various resources. The second aspect deals with the cultural politics and logics of these changes in the city. This recognises that globalization is not simply imposed on the city but rather becomes insinuated into its fabric through the actions and the agency of local actors and social movements. Against this backdrop, the chapters document how the educational politics of urban contexts in the United States, India, Canada, South Africa, and Brazil should be understood as sites in which neoliberal forms of globalization are localised, reproduced, and potentially contested. This book was originally published as a special issue of *Discourse Studies* in the *Cultural Politics of Education*.
