## **Reform Our Study:**

**Reform Our Study** Zedong Mao,1955      Reforming Our Universities David Horowitz,2010-08-31 For far too long our colleges and universities have been allowed to ignore their chartered responsibilities to educate rather than indoctrinate. Instead of providing a forum for the free exchange of ideas they intimidate students into ideological submission to leftist professors rather than pursuing meaningful research they proselytize for radical causes. Here author David Horowitz tells the story of his ongoing campaign for an Academic Bill of Rights to protect students who refuse to conform to radical orthodoxies. Horowitz means to recall higher education to its better self to become as it once was a place where students and teachers were not afraid to question opinions create their own and engage in Socratic dialogue. **Education Reform** United States. General Accounting Office,1989 Results of a multistate study of a variety of education reforms on academic achievement dropout rates and enrollment patterns of educationally disadvantaged secondary school students      The Struggle to Reform Our Colleges Derek Bok,2017-08-28 Why efforts to improve American higher educational attainment haven't worked and where to go from here. During the first decade of this century many commentators predicted that American higher education was about to undergo major changes that would be brought about under the stimulus of online learning and other technological advances. Toward the end of the decade the president of the United States declared that America would regain its historic lead in the education of its workforce within the next ten years through a huge increase in the number of students earning quality college degrees. Several years have elapsed since these pronouncements were made yet the rate of progress has increased very little if at all in the number of college graduates or the nature and quality of the education they receive. In The Struggle to Reform Our Colleges Derek Bok seeks to explain why so little change has occurred by analyzing the response of America's colleges, the influence of students, employers, foundations, accrediting organizations and government officials and the impact of market forces and technological innovation. In the last part of the book Bok identifies a number of initiatives that could improve the performance of colleges and universities. The final chapter examines the process of change itself and describes the strategy best calculated to quicken the pace of reform and enable colleges to meet the challenges that confront them.      Collections of United States Joint Publications Research Service Translations in the Social Sciences Emanating from Communist China United States. **Chinese Thought as Global Theory** Leigh Jenco,2016-05-12 With a particular focus on Chinese thought this volume explores how and under what conditions so called non Western traditions of thought can structure generally applicable social and political theory Reversing the usual comparison between local Chinese application and universal theory the work demonstrates how Chinese experiences and ideas offer systematic insight into shared social and political dilemmas Contributors discuss how medieval Chinese understandings of causal heterogeneity can relieve impasses within contemporary historiography how current economic and social conditions in China respond proactively to the future configuration of world markets and how hybrid modes of cross cultural engagement offer new foundations for the enterprise of learning from cultural others Each chapter works from Chinese perspectives to theorize the location of knowledge its conditions of production and the modes through which its content or adequacy is legitimated challenged and sustained Rather than reproducing Eurocentric knowledge production in Chinese form the mobilization of Chinese thought as a generally applicable body of theory actually breaks down clear boundaries between Chinese and non Chinese thought

**Building Sustainable Peace** Arnim Langer,Graham K. Brown,2016-06-16 Countries emerging from civil war or protracted violence often face the daunting challenge of rebuilding their economy while simultaneously creating the political and social conditions for a stable peace The implicit assumption in the international community that rapid political democratisation along with economic liberalisation holds the key to sustainable peace is belied by the experiences of countries such as Iraq and Afghanistan Often the challenges of post conflict reconstruction revolve around the timing and sequencing of different reform that may have contradictory implications Drawing on a range of thematic studies and empirical cases this book examines how post conflict reconstruction policies can be better sequenced in order to promote sustainable peace The book provides evidence that many reforms that are often thought to be imperative in post conflict societies may be better considered as long term objectives and that the immediate imperative for such societies should be people centred policies
