Reforming the European Union Daniel Finke, 2012-07-29 For decades the European Union tried changing its institutions but achieved only unsatisfying political compromises and modest incremental treaty revisions In late 2009 however the EU was successfully reformed through the Treaty of Lisbon *Reforming the European Union* examines how political leaders ratified this treaty against all odds and shows how this victory involved all stages of treaty reform negotiations from the initial proposal to referendums in several European countries The authors emphasize the strategic role of political leadership and domestic politics and they use state of the art methodology applying a comprehensive data set for actors reform preferences They look at how political leaders reacted to apparent failures of the process by recreating or changing the rules of the game While domestic actors played a significant role in the process their influence over the outcome was limited as leaders ignored negative referendums and plowed ahead with intended reforms The book's empirical analyses shed light on critical episodes strategic agenda setting during the European Convention the choice of ratification instrument intergovernmental bargaining dynamics and the reaction of the German Council presidency to the negative referendums in France the Netherlands and Ireland

Reforming the European Union G.Wyn Rees, N. (Department Of Law, University Of Leicester) Neuwahl, P. (Department Of Politics, University Of Leicester) Lynch, 2014-05-12 Analyses the likely future of the EU following next year's Intergovernmental Conference IGC which is likely to be even more significant for the future of Europe than the Maastricht Treaty Since Maastricht it has become clear that future developments are less certain with regard to the EU and integration The IGC will have to try and resolve tensions such as widening Europe to include former communist countries whilst also trying to deepen Europe with increased political and economic integration providing a framework which is acceptable to a core of countries Benelux Germany France who favour more integration and an early move to monetary union with countries such as the UK which does not

Reforming the European Commission Michael W. Bauer, 2013-10-18 Many international and supranational organisations have lately been busy modernising their internal administration But nowhere has management change received a similar amount of attention than in the case of the European Commission Although the perception prevails that the Commission has been losing out in recent years this vivid interest academic as well as public in the so called Kinnock reform suggests that this organisation still remains at the heart of the Union The proposition of this book thus is simple If it remains true that the Commission is an essential part within the

admittedly complex equation of EU policy making changes of the administration basis of this actor are likely to have broader implications Consequently this special issue poses three crucial questions about the recent administrative reform of the European Commission why was such a comprehensive reform possible what are its specific implications for the Commission as an organisation and what is the likely impact for the policy process In short this book puts the organisational base of EU policy making centre stage In the quest for answers the authors of the subsequent chapters take distinct perspectives use various research strategies and methods and attempt to solve diverse empirical puzzles But all attempt to add to our understanding of this organisational base and how to systematically study it This book was published as a special issue of the Journal of European Public Policy
