Tax Reform in Developing Countries Wayne R. Thirsk, 1997 Tax Reform in Developing Countries carefully examines the experience of eight developing countries that have undergone and in some instances are still undergoing significant and comprehensive tax reform The countries are Bolivia Colombia Indonesia Jamaica Korea Mexico Morocco and Turkey It draws on their experiences to find lessons learned and to see how they may be applied to other countries on the road to tax reform Equal attention is given to the process of tax reform how it is implemented and the substance or results of reform efforts Throughout the focus is on the practical rather than the theoretical aspects of tax reform

Tax and Development Aid Modalities for Strengthening Tax Systems OECD, 2013-03-06 This report provides an overview of the aid modalities available to donors in promoting domestic resource mobilisation through more effective tax systems

Reforming Tax Systems Vahram Stepanyan, 2003-09-01 Starting in the early 1990s the Baltics Russia and other BRO countries of the former Soviet Union initiated tax reforms that varied widely at the later stages Recently some of the BRO countries basing decisions on the proposition that lowering of the top marginal income tax rate would significantly benefit economic development and increase tax compliance have initiated a new stage of tax reforms This paper reviews country experiences and suggests that i overall there seems to be little evidence of a substantial improvement in income tax revenues resulting simply from a reduction in the top marginal tax rates and ii in the BRO countries the elasticity of the behavior of economic agents in terms of labor supply saving and investment with respect to income tax rates is not large and a reduction of the existing income tax rates is unlikely to lead to a notable expansion of economic activity

The Corporate Income Tax System Mark P. Keightley, Molly F. Sherlock, 2012-10-22 Many economists and policymakers believe that the U S corporate tax system is in need of reform There is however disagreement over why the corporate tax system needs to be reformed and what specific policy measures should be included in a reform To assist policymakers in designing and evaluating corporate tax proposals this report 1 briefly reviews the current U S corporate tax system 2 discusses economic factors that may be considered in the corporate tax reform debate and 3 presents corporate tax reform policy options including a brief discussion of current corporate tax reform proposals The current U S corporate income tax system generally taxes corporate income at a rate of 35% This tax is applied to income earned domestically and abroad although taxes on certain income earned abroad can be deferred indefinitely if that income remains overseas The U S corporate tax system also contains a number of deductions exemptions deferrals and tax credits often referred to as tax expenditures Collectively these provisions reduce the effective tax rate paid by many U S corporations below the 35% statutory rate In 2011 the sum of all corporate tax expenditures was 158.8 billion The significance of the corporate tax as a federal revenue source has declined over time At its post WWII peak in 1952 the corporate tax generated 32.1% of all federal tax revenue In 2010 the corporate tax accounted for 8.9% of federal tax revenue The decline in corporate revenues is a combination of decreasing effective tax rates an increasing fraction of business activity that is being carried out by pass

through entities particularly partnerships and S corporations which are not subject to the corporate tax and a decline in corporate sector profitability. A particular aspect of the corporate tax system that receives substantial attention is the 35% statutory corporate tax rate. Although the U.S. has the world's highest statutory corporate tax rate, the U.S. effective corporate tax rate is similar to the Organization for Economic Co-operation and Development (OECD) average. Further, the U.S. collects less in corporate tax revenue relative to Gross Domestic Product (GDP) (1.9% in 2009) than the average of other OECD countries (2.8% in 2009). This report discusses a number of economic considerations that may be made while evaluating various corporate tax reform proposals. These might include analyses of the likely effect on households of certain reforms also known as incidence analysis. Policymakers might also want to consider how certain corporate tax provisions contribute to the allocation of economic resources, choosing policies that promote an efficient use of resources. Other goals of corporate tax reform may include designing a system that is simple to comply with and administer while also promoting competitiveness of U.S. corporations. Commonly discussed corporate tax reforms include policies that would broaden the tax base (i.e., eliminate tax expenditures to finance reduced corporate tax rates). Concerns that the U.S. corporate tax system inefficiently imposes a double tax on corporate income has led some to consider an integration of the corporate and individual tax systems. The treatment of pass-through income (business income not earned by C corporations) has also received considerable attention in tax reform debates. How the U.S. taxes income earned abroad and the possibility of moving to a territorial tax system have emerged as important issues. Both the Obama Administration and the House Committee on Ways and Means Chairman David Camp have released tax reform proposals that would change the current tax treatment of U.S. multinationals.
