Current Developments in Glaucoma Surgery and MIGS J.R. Samples,I.I.K. Ahmed,2020-01-02 Successful interventional glaucoma remains a sought after goal for the glaucoma clinician for many reasons Medical costs compliance and adherence remain major barriers for the treatment of our patients A truly definitive treatment for glaucoma is most likely to be largely surgical as it is doubtful that patients will continue to use glaucoma drugs in the future for anything other than transient lowering of intraocular pressure In the coming era it seems probable that neuroprotection and neurorestoration will be combined with MIGS to lower pressure The different types of MIGS are increasing in proportion to their efficacy To date there are no fewer than 12 choices available to glaucoma specialists Choice of procedure depends on the underlying anatomy as well as the patient s individual characteristics Truthfully the number of available surgeries depends upon their taxonomy Most are based on the outflow system and the canal as illustrated in this book

**Glaucoma Surgery** R.N. Weinreb, P. Ramulu, F. Topouzis, K.H. Park, K. Mansouri, S.F. Lerner, 2019-10-04

Glaucoma surgery was the topic of the eleventh World Glaucoma Association Consensus meeting Glaucoma surgery in primary open angle glaucoma was also the topic of the second Consensus meeting held in 2005 For the current version angle closure and angle closure glaucoma as well as the secondary glaucomas were also included But the expansion of the subject matter is not the only reason for the timing of this new Consensus Perhaps even more important is the explosion of new surgical ideas and techniques which are revolutionizing the surgical approach to the glaucoma patient The idea of targeting anatomic outflow and inflow pathways and individualizing care has opened so many new possibilities for improving surgical outcomes Furthermore outcomes are no longer only focused on lowering intraocular pressure but also on enhancing health and vision related quality of life As with prior meetings it was a daunting task to seek and obtain consensus on a broad subject matter for which there are so many different opinions As it is unclear how each of us decides how we practice and the evidence to guide us often is sparse this consensus as well as the others is based not only on the published literature but also

on expert opinion Although consensus does not replace and is not a surrogate for scientific investigation it does provide considerable value especially when the desired evidence is lacking The goal of this consensus is to provide a foundation for glaucoma surgery and how it can be best done in clinical practice Identification of those areas for which we have little evidence and therefore the need for additional research always is a high priority We hope that this consensus report will serve as a benchmark of our understanding of what is known and what we would like to know However this Consensus Report is expected to be just a beginning that will be revised and improved with the emergence of new evidence and new and improved surgical procedures

*The Science of Glaucoma Management* Kevin Gillmann, Kaweh Mansouri, 2023-05-18 The Science of Glaucoma Management From Translational Research to Next Generation Clinical Practice bridges the gap between laboratory research and clinicians by bringing the latest promising research directly from researchers to clinicians long before they translate into clinical advances and often before they are presented at conferences Organized as a series of clinically relevant topics written by world leading experts this book summarizes the current state of laboratory and translational research and draws on the potential implications for day to day clinical practice It offers new insights and mind opening statements through contributions from some of the most respected glaucoma research groups The book allows glaucoma specialists to explore novel ways to refine and rethink their practice based on the latest discoveries in basic sciences and breakthrough technologies and to gain a better understanding on how their specialty is evolving and how research may shape tomorrow's practice Presents a detailed report on the latest translational research and breakthroughs that may transform glaucoma practice Overviews the specialty from a scientific and clinical point of view Written by world renowned clinicians and researchers in the field of glaucoma Includes insights opinions and recommendations from some of the most prominent scientists and ophthalmologists Covers hot topics and the latest technologies in glaucoma such as minimally invasive glaucoma surgery telemedicine gene therapy neuroprotection and artificial intelligence

Neovascular Glaucoma Mary Qiu, 2022-12-13 This book offers a comprehensive overview of neovascular glaucoma NVG which is an extraordinarily aggressive type of secondary glaucoma that has often been discussed as an afterthought rather than the focal subject in glaucoma reference books NVG is considered an end stage complication in patients with certain underlying retinal diseases most commonly diabetic retinopathy and retinal vein occlusions Historically NVG has been one of the most difficult types of glaucoma to manage with a high failure rate for traditional glaucoma surgery and often progression of the underlying retinal disease despite standard of care treatment Chapters cover advancements made in recent years in the management of the underlying ischemic retinal conditions that lead to NVG including the use of anti vascular endothelial growth factor anti VEGF medications Additionally chapters discuss glaucoma surgeries which have become less invasive in recent years with the advent of microinvasive glaucoma surgery MIGS This book offers an up to date reference regarding current concepts in the diagnosis as well as medical laser and surgical treatment of NVG in the anti VEGF era with attention
