**Refugee Scholars in America** Lewis A. Coser, *The Modern Jewish Experience* Jack Wertheimer, 1993-01-01 The pace of scholarly research and academic publication in fields of Judaica has quickened dramatically in the second half of the twentieth century. The major consumers and producers of this new scholarship are found in Jewish Studies programs that have proliferated at institutions of higher learning around the world since the 1960s. From the vantage point of the nineties it is difficult to fathom that until thirty years ago Jewish studies courses were mainly limited to a few elite universities, rabbinical seminaries and Hebrew teachers colleges. Today there are few colleges at public or private institutions of higher learning that do not sponsor at least some courses on aspects of Jewish study. In light of this explosion of research on Jewish topics, non-specialists and educators can benefit from guidance through the thicket of new monographs, source anthologies, textbooks and scholarly essays. *The Modern Jewish Experience*, the result of a multi-year collaboration between the International Center for the University Teaching of Jewish Civilization and the Jewish Theological Seminary of America, offers just such guidance on a range of issues pertaining to modern Jewish history, culture, religion and society. With contributions from two dozen leading scholars, *The Modern Jewish Experience* presents practical information and guidelines intended to expand the teaching repertoire for undergraduate courses on modern Jewish life as well as a means for college professors to enrich and diversify their courses with discussions on otherwise neglected Jewish communities, social and political issues, religious and ideological movements and interdisciplinary perspectives. Sample syllabi are also included for survey courses set in diverse linguistic settings. An indispensable resource for undergraduate instruction, this volume may also be used to great profit by educators of adults in synagogue and Jewish communal settings as well as by individual students engaged in private study.

**Refugees in the Age of Total War** Anna C. Bramwell, 2021-11-21 This book, first published in 1988, charts society's responses to the huge numbers of refugees in Europe and the Middle East during and after the Second World War. At the close of the war, large areas of Europe lay in ruins and large numbers of refugees faced upheaval and famine. Political considerations influenced the decisions as to who received assistance and refugees were forcibly repatriated or resettled, and in the analysis of these matters and more, both the refugee crises of the 1940s and their relevance today are highlighted.

Ellwood,2012-07-19 *The Shock of America* is based on the proposition that whenever Europeans of the last 100 years or more contemplated those margins of their experience where change occurred there sooner or later they would find America How Europeans have come to terms over the decades with this dynamic force in their midst and what these terms were is the story at the heart of this text Masses of Europeans have been enthralled by the real or imaginary prospects coming out of the USA Important minorities were at times deeply upset by them Sometime the roles were reversed or shaken up But nobody could be indifferent for long Inspiration provocation myth menace model all these categories and many more have been deployed to try to cope with the Americans Attitudes and stereotypes have emerged intellectual resources have been mobilised positions and policies developed all trying to explain and deal with the kind of radiant modernity America built over the course of the twentieth century David Ellwood combines political economic and cultural themes suggesting that American mass culture has provided the United States with a uniquely effective link between power and influence over time The book is structured in three parts a separation based on the proposition that America s influence as an unavoidable force for or against innovation was visible most conspicuously after Europe s three greatest military political conflicts of the contemporary era the Great War World War II and the Cold War It concludes with the emotional upsurge in Europe which greeted the arrival of Obama on the world scene suggesting that in spite of all the disappointments and frictions of the years the US still retained its privileged place as a source of inspiration for the future across the Western world *Scientific*

**The Routledge Handbook of the History and Sociology of Ideas** Stefanos Geroulanos, Gisèle Sapiro, 2023-09-26 The Routledge Handbook of the History and Sociology of Ideas establishes a new and comprehensive way of working in the history and sociology of ideas in order to obviate several longstanding gaps that have prevented a fruitful interdisciplinary and international dialogues. Pushing global intellectual history forward it uses methodological innovations in the history of concepts, gender history, imperial history and history of normativity many of which have emerged out of intellectual history in recent years and it especially foregrounds the role of field theory for delimiting objects of study but also in studying transnational history and migration of persons and ideas. The chapters also explore how intellectual history crosses the study of particular domains: law, politics, economy, science, life sciences, social and human sciences, book history, literature and emotions.

**Gender and Trauma since 1900** Paula A. Michaels, Christina Twomey, 2021-04-08 Is Trauma a transhistorical, transnational phenomenon? Gender and Trauma challenges the standard history that has led to our contemporary understanding of psychological trauma to answer this question and to explore the impact of gender in the experience and understanding of emotional distress. Bringing together eleven case studies from all over the world it draws on methods from history, gender and communication studies to consider how trauma has been understood over the 20th and 21st centuries. Encompassing histories from Australia, Britain, Indonesia, Italy, the Soviet Union, Timor-Leste, the United States and Vietnam, these examples demonstrate how gender and trauma are inextricably linked and how the term trauma has evolved over time. With chapters on war, political repression, displacement, rape and childbirth, the cases showcased in this volume highlight two pivotal transformations across the 20th century: First, the transformation of the trauma sufferer from perpetrator to victim and second, the increased understanding of psychological consequences of sexual assault and domestic violence. Together these diverse stories yield a more nuanced picture of what trauma is, how we have understood it alongside gender in the past and how this affects our understanding of it in the present.

Russia Abroad Marc Raeff, 1990-04-19 The dramatic events of the twentieth century have often led to the mass migration of intellectuals, professionals, writers and artists. One of the first of these migrations occurred in the aftermath of the Russian Revolution when more than a million Russians were forced into exile. With this book Marc Raeff, one of the world's leading historians of Russia, offers the first comprehensive cultural history of the Great Russian Emigration. He examines the social and institutional structure of the emigration and describes its rich cultural and intellectual life. He points out that what distinguishes this emigration from other such episodes in European history is the extent to which the emigres succeeded in reconstituting and preserving their cultural creativity in the West. The flourishing Russian communities of Paris

Berlin Prague and Kharbin not only enriched Russian arts and letters but also significantly influenced the culture of their Western hosts and Raeff concludes with an assessment of their impact on the development of modern Western and Soviet culture
