Regarding Hwange And Other Matters Of Perception:

Regarding Hwange Joshua Caine Anchors, 2004-04-01 In the heart of Zimbabwe safari country Siweti Mathe learns to translate his fear into art Lucky Mapfuwa feels the sweetness of liberation for a single day Steve and his family face the harsh realities of an unpredictable terrain Ellie Sibanda fights off hungry elephants and greedy headmasters to sustain her family and Anna discovers only emptiness in her escape to Africa This is a landscape where pangolins reflect on their meaning late into the night and family safari vacations go awry Touching upon many of the essential yet enigmatic relationships between humans and the land they live upon Regarding Hwange offers an indelible glimpse into a wilderness of perceptions that can be both illuminating and tragic

Changing Climate, Changing Worlds Meredith

Welch-Devine, Anne Sourdri, Brian J. Burke, 2020-04-07 This book explores how individuals and communities perceive and understand climate change using their observations of change in the world around them Because processes of climatic change operate at spatial and temporal scales that differ from those of everyday practice the phenomenon can be difficult to understand However flora and fauna which are important natural and cultural resources for human communities do respond to the pressures of environmental change Humans in turn observe and adapt to those responses even when they may not understand their causes Much of the discussion about human experiences of our changing climate centers on disasters and extreme events but we argue that a focus on the everyday on the microexperiences of change has the advantage of revealing how people see feel and make sense of climate change in their own lives The chapters of this book are drawn from Asia Europe Africa and South and North America They use ethnographic inquiry to understand local knowledge and perceptions of climate change and the social and ecological changes inextricably intertwined with it Together they illustrate the complex process of coming to know climate change show some of the many ways that climate change and our responses to it inflict violence and point to promising avenues for moving toward just and authentic collaborative responses

Kaitano Dube,Ikechukwu O. Ezeudji,Magdalena Petronella Swart,2025-06-30 Despite its potential to unlock socio economic benefits in rural and protected areas in a manner that addresses the Sustainable Development Goals SDG rural and protected areas tourism is yet to be thoroughly examined by academics scholars practitioners and policymakers This lack of exploration has undermined the potential benefits associated with tourism development in rural and protected areas Given the complexity of rural tourism this contributed volume explores current and future debates on the subject using cases in Southern Africa The book is useful for various audiences including tourism academics planners cultural and heritage practitioners and rural development planners The topics covered include gender transformation service delivery visitor experience wildlife tourism and host community tourism interaction **The Parks Belong to the People** Joe Weber,Selima Sultana,2024-04

In examining the 424 units of the U S national park system geographers Joe Weber and Selima Sultana focus attention on the historical geography of the system as well as its present distribution covering the diversity of places under the control of the National Park Service NPS This includes the famous national parks such as the Grand Canyon Yellowstone and Yosemite and the lesser known national monuments memorials lakeshores seashores rivers recreation areas preserves reserves parkways historic sites historic parks and a range of battlefields as well as more than twenty additional sites not fitting into any of these categories such as the White House The geographic view of The Parks Belong to the People sets it apart from others that have taken a solely historical approach Where parks are located what they are near where their visitors come from and how land use and activities are organized within parks are some of the fundamental issues discussed The majority of units in the NPS are devoted to recreation areas or historic sites such as battlefields archaeological sites or sites devoted to a specific person and this is reflected in the authors approach What we think of as a national park has

changed over the years and will continue to change Weber and Sultana emphasize changing social and political environments in which NPS units were created and the roles they serve such as protecting scenery providing wildlife habitats preserving history and serving as scientific laboratories and places for outdoor recreation The authors also focus on parks as public facilities and sites of economic activities National parks were created by people for people to enjoy at great cost and with great benefit They cannot be understood without taking this human context into account **Civil Engineering** ,1997

Tourism Geographies Jayne M. Rogerson, Gustav Visser, 2019-09-26 This book provides an overview of innovative and new directions being chartered in South African tourism geographies. Within the context of global change, the volume explores different facets and different geographies of tourism. Key themes under scrutiny include the sharing economy, the changing accommodation service sector, touring poverty, tourism and innovation, tourism and climate change, threats to sustainability, inclusive tourism, and a number of studies which challenge the present mindedness of much tourism geographical scholarship. The 18 chapters range across urban and rural landscapes in South Africa with sectoral studies which include adventure tourism, coastal tourism, cruise tourism, nature based tourism, sports tourism, and wine tourism. Finally, the volume raises a number of policy and planning issues in the global South, in particular relating to sustainability, local economic development, and poverty reduction. Outlining the impact of tourism expansion in South Africa and suggesting future research directions, this stimulating book is a valuable resource for geographers as well as researchers and students in the field of tourism studies.

Natural Resources, Tourism and Community Livelihoods in Southern Africa Moren T. Stone, Monkgogi Lenao, Naomi Moswete, 2019-11-19 This book examines the connections between natural resources, tourism, and community livelihood practices in Southern Africa, highlighting the successes and constraints experienced over the last 50 years. Questioning how natural resources, tourism, and community livelihoods relations can positively contribute towards development efforts, this book adopts an interdisciplinary approach to understand socio-ecological systems that characterize the dynamics for sustainable development. It explores the history of conservation and natural resource management in Southern Africa and traces the development and growth of nature based tourism. Boasting a wide range of tourism landscapes including national parks, wetlands, forests, and oceans, the book draws on case studies from a variety of Southern African countries including Botswana, Namibia, and South Africa, and considers the political challenges for implementing policies and practices. Furthermore, it analyses broader issues such as the impact of climate change, human-wildlife co-existence, and resulting conflicts, poor access to funding, and poverty in local communities. The book argues that the links between conservation and livelihoods can be best understood by considering the different approaches to reconciling the demands of conservation and livelihoods that have evolved over the past decades. Containing contributions from natural and social sciences, the book provides guidance for practitioners and policymakers to continue to shape policies and practices that are in line with the key tenets of sustainable development. It will also be of great interest to students and scholars researching Southern Africa, sustainable tourism, and conservation.
