Safe Delivery Protecting Your Baby During High Risk Pregnancy By Freeman:

Safe Delivery Roger K. Freeman, Susan C. Pescar, 1982 **Redefining Human Life** Robert H Blank, 2019-08-16 This book examines critical social policy issues emerging from recent developments in human reproductive technology. Although considerable attention has been focused on the ethical dimensions of these developments, the policy dimension has largely been obscured. Dr Blank now provides a far ranging overview of the cumulative impact on society of a wide array of new reproductive technologies and the social patterns that accompany or precede their application. The book begins with a description of the current context of reproductive decision making. Dr Blank demonstrates how emerging technologies are producing complex and intense social policy concerns, then reviews in detail human reproductive technologies and illustrates the significant consequences of technological innovations for political and legal concepts of rights and obligations. Examples include recent cases involving torts for wrongful life. He analyzes possible alterations in the moral and legal status of the fetus in light of apparent technological and social policy trends and presents a paradigm of fetal rights that reflects these changes. A final case is made for a comprehensive assessment of reproductive technologies as well as for the urgent need to refine concepts of human life that in the past have been taken for granted but that now are being challenged. **Journal of the Medical Society of New Jersey** Medical Society of New Jersey, 1983 Includes the society's Annual reports *A Good Birth, a Safe Birth* Diana Korte, Roberta Scaer, 1984 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1982 *Psychological Aspects of Women's Reproductive Health* Michael W. O'Hara, 1995 In this insightful text the editors and contributors explore the interrelationship between the psychology of women and their reproductive health. The volume discusses reproductive transitions in women's lives, addresses the psychology of gynecological problems including cancer and sexually transmitted diseases and focuses on issues in obstetrics including infertility and high risk pregnancy. The concluding chapter deals with medical decision making. This volume is of relevance and importance to psychiatrists, psychologists and counselors as well as nurses, social workers and other health professionals and students concerned with women's health. BOOK JACKET Title Summary field provided by Blackwell North America Inc. All Rights Reserved Contemporary Ob/gyn, 1982 Born Too Early Margaret Redshaw, Rodney Rivers, Deborah Rosenblatt, 1985 Preterm infants are surviving in increasing numbers and in better health and yet public knowledge is still limited. This book aims to bring together up to date knowledge and experience of paediatricians and psychologists. The book describes how premature babies differ from full term babies in physical appearance, behaviour and medical treatment required. Much of the book is devoted to the feelings and needs of parents, their anxieties, the problems of parenting in a hospital environment and the needs of their other children. Practical suggestions are offered on breast feeding, preparing to leave hospital and looking after the baby during the first weeks at home. The long term implications of premature birth, follow up visits, the prospects for good health and development and the possibility of handicaps are outlined. High risk pregnancies are considered and
