Safe Food:

Safe Food Marion Nestle, 2010-06-15 Food safety is a matter of intense public concern and for good reason Millions of annual cases of food poisonings raise alarm not only about the food served in restaurants and fast food outlets but also about foods bought in supermarkets The introduction of genetically modified foods immediately dubbed Frankenfoods only adds to the general sense of unease Finally the events of September 11 2001 heightened fears by exposing the vulnerability of food and water supplies to attacks by bioterrorists How concerned should we be about such problems Who is responsible for preventing them Who benefits from ignoring them Who decides Marion Nestle author of the critically acclaimed Food Politics argues that ensuring safe food involves more than washing hands or cooking food to higher temperatures It involves politics When it comes to food safety billions of dollars are at stake and industry government and consumers collide over issues of values economics and political power and not always in the public interest Although the debates may appear to be about science Nestle maintains that they really are about control Who decides when a food is safe She demonstrates how powerful food industries oppose safety regulations deny accountability and blame consumers when something goes wrong and how century old laws for ensuring food safety no longer protect our food supply Accessible informed and even handed Safe Food is for anyone who cares how food is produced and wants to know more about the real issues underlying today s headlines

Ensuring Safe Food Institute of Medicine and National Research Council, Board on Agriculture, Institute of Medicine, Committee to Ensure Safe Food from Production to Consumption, 1998-09-19 How safe is our food supply Each year the media report what appears to be growing concern related to illness caused by the food

consumed by Americans These food borne illnesses are caused by pathogenic microorganisms pesticide residues and food additives Recent actions taken at the federal state and local levels in response to the increase in reported incidences of food borne illnesses point to the need to evaluate the food safety system in the United States This book assesses the effectiveness of the current food safety system and provides recommendations on changes needed to ensure an effective science based food safety system Ensuring Safe Food discusses such important issues as What are the primary hazards associated with the food supply What gaps exist in the current system for ensuring a safe food supply What effects do trends in food consumption have on food safety What is the impact of food preparation and handling practices in the home in food services or in production operations on the risk of food borne illnesses What organizational changes in responsibility or oversight could be made to increase the effectiveness of the food safety system in the United States Current concerns associated with microbiological chemical and physical hazards in the food supply are discussed The book also considers how changes in technology and food processing might introduce new risks Recommendations are made on steps for developing a coordinated unified system for food safety The book also highlights areas that need additional study Ensuring Safe Food will be important for policymakers food trade professionals food producers food processors food researchers public health professionals and consumers

The Safe Food Imperative Steven Jaffee, Spencer Henson, Laurian Unnevehr, Delia Grace, Emilie Cassou, 2018-12-11 Food safety hazards are increasingly being recognized as a major public health problem worldwide yet among developing countries there is limited understanding of the wider ranging socio economic costs of unsafe food and the benefits of remedial or preventative measures This limited evidence base has led many countries to underinvest in food safety or invest inefficiently in reaction to serious outbreaks of foodborne illness other food scares or trade interruptions For many countries experiencing rapid urbanization and dietary changes the growing complexity of food safety hazards is outpacing if not overwhelming prevailing food safety management capacity both in government and in supply chains This report strengthens the economic case for increased public investment and other policy attention on food safety in developing countries It is directed primarily at policy makers although researchers development practitioners and food safety specialists will also find its content of value By synthesizing and interpreting the available evidence on the economic costs of unsafe food in relation to both domestic markets and trade the report positions food safety as an integral part of economic development and food system modernization It goes on to provide guidance on ways in which public policy and investment can improve food safety awareness and behavior from farm to fork

Science and Strategies for Safe Food Surender S. Ghonkrota, 2017-05-25 Food system has become complex with globalisation and there are stringent requirements from food business operators In this respect there is a need to bring together aspects of food security food safety management food quality management food analysis and risk analysis This book focuses on all these aspects hence it would find wide application amongst academia researchers food regulators auditors and consumers

Scientific Criteria to Ensure Safe

Food National Research Council, Institute of Medicine, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Food and Nutrition Board, Committee on the Review of the Use of Scientific Criteria and Performance Standards for Safe Food, 2003-09-29 Food safety regulators face a daunting task crafting food safety performance standards and systems that continue in the tradition of using the best available science to protect the health of the American public while working within an increasingly antiquated and fragmented regulatory framework Current food safety standards have been set over a period of years and under diverse circumstances based on a host of scientific legal and practical constraints Scientific Criteria to Ensure Safe Food lays the groundwork for creating new regulations that are consistent reliable and ensure the best protection for the health of American consumers This book addresses the biggest concerns in food safety including microbial disease surveillance plans tools for establishing food safety criteria and issues specific to meat dairy poultry seafood and produce It provides a candid analysis of the problems with the current system and outlines the major components of the task at hand creating workable streamlined food safety standards and practices Consumer demand and willingness to pay for safe food in Accra, Ghana: Implications for public and private sectors' roles in food safety management Ragasa, Catherine, Andam, Kwaw S., Amewu, Sena, Asante, Seth, 2019-01-10 Consumer demand for food safety is likely to be an important driver of public policies and industry led efforts to reduce information asymmetry on food attributes and improved food safety This paper examines the attribute demand for chicken meat and tilapia among 803 shoppers in Accra Ghana Freshness is the main attribute demanded by the overwhelming majority of shoppers followed by food safety price taste and size Consumers are willing to pay price premiums for food safety certifications i e those certified according to Hazard Analysis and Critical Control Point HACCP principles or certified as free of antibiotic residue However the price premium shoppers are willing to pay for improved food safety vary by shoppers type A third of tilapia shoppers and half of chicken meat shoppers are classified as food safety conscious shoppers and willing to pay a 10 to 12 percent higher price than noncertified products In comparison only a tenth of shoppers are considered to be price conscious and willing to pay a small premium 1 percent for certified safe foods We also tested an information treatment on the negative health implications of food contamination and its effect on shoppers decisions The information treatment randomly assigned to shoppers was a significant predictor of food safety attribute demand for chicken meat but not for tilapia which may be linked to greater awareness of and concern about antibiotic misuse in poultry production Our findings generally point to a concern about food safety and a strong demand and willingness among consumers to pay premiums for certified safe foods thus providing support for public or industry led schemes to provide food safety information to consumers *Safe Food for the Association of Southeast Asian Nations (ASEAN) - Engaging in Codex Standards setting*. Food and Agriculture Organization of the United Nations, 2021-11-05 This document has been created with the aim of highlighting the significant advances by the Association of Southeast Asian Nations ASEAN in engagement and support to its ten member countries in implementing their national

Codex activities The authors consolidated inputs provided by the national focal points together with FAO country offices This report supersedes the previous version entitled Status of National Codex Activities published in 2012 It also provides information for food safety competent authorities in the government sector outside of the ASEAN region In addition the intention is that the document will help to indirectly strengthen collaboration within the region through the discussion and benchmarking of good practices This document will also serve as the new baseline for the success of further projects and improvements made by the countries and FAO in strengthening capacities for enhancing Codex Alimentarius activities in ASEAN
