Safe Enough Managing Risk And Regulation:

Safe Enough? Fraser Institute (Vancouver, B.C.),2000 *Risk Regulation in the Single Market* Sebastian Krapohl,2008-10-31 This book demonstrates how the Thalidomide catastrophe of the 1960s and the BSE crisis of the 1990s led to regulatory regimes for pharmaceuticals and foodstuffs in Europe However the developmental paths of these regimes differ and so does the efficiency and legitimacy of regulatory policy making *War as Risk Management* Yee-Kuang Heng,2006-04-18 This book is about the reconfiguration of war as risk management in the post Cold War post September 11 era Confronted with ill defined wars against complex security risks such as terrorism and WMD proliferation the main aim is to suggest and critically analyse an innovative inter disciplinary approach to the transformation of war debate

Regulating Agricultural Biotechnology Richard E. Just,Julian M. Alston,David Zilberman,2006-12-26 This book presents the first thorough economic analysis of current agricultural biotechnology regulation The contributors most of whom are agricultural economists working either in universities or NGOs address issues such as commercial pesticides the costs of approving new products liability benefits consumer acceptance regulation and its impacts transgenic crops social welfare implications and biosafety *Forecasting, Warning and Responding to Transnational Risks* C. Meyer,2011-07-26 Assembling a high profile group of scholars and practitioners this book investigates the interplay of forecasting warnings about and responses to known and unknown transnational risks It challenges conventional accounts of failures of warning and preventive policy in both the academic literature and public debate **Drug Safety** Nigel S. B. Rawson,2016-11-08 With Big Pharma garnering an increasing number of negative headlines due to reports of adverse drug reactions and a surge in prescription drug addiction and overdose deaths many people are increasingly skeptical about the safety of modern pharmaceuticals and the moral integrity of the pharmaceutical industry This book was written to provide a balanced perspective on drug safety risks No therapeutic prescription drug is entirely risk free Before receiving marketing approval new drugs go through arduous and expensive testing processes that can take up to a decade and cost over two billion dollars While not perfect the process is far from a Wild West environment where big pharmaceutical companies ride roughshod over government regulators However author and pharmacoepidemiologist Nigel Rawson argues the antipathy that is common between governments pharmaceutical industry and academic experts in Canada needs to change to an environment of collaboration and partnership to enhance our ability to respond in a timely fashion to future pharmaceutical crises While directed mainly at students in the health sciences and pharmaceutical professionals this book will be of interest to anyone including lay people and policy makers who would like to know more about the evolution of the prescription drug evaluation and risk assessment process Although the book focuses primarily on Canada it makes comparisons with the United States and Europe and several of the author s recommendations for how to improve the prescription drug evaluation process are applicable worldwide EnvOping Fady J. Rahmé,2013-05 The operating environment is changing faster than ever

before and is threatening business survival Regulators and Public opinion have become major stakeholders for an increasing number of industries The 21st century will be the Time of Regulators and ever greater change within corporations What appears to be a particular challenge for highly regulated firms Tobacco Pharmaceutical Petroleum and Telecom will be in a very near future a major issue for most companies The business leaders feel it and rank this change as the number one threat to their business They seek a solution This book offers one under the name of EnvOping or managing the interaction with the Operating Environment of Corporations It is a new approach of Corporate Affairs and Communication CA C that moves this department from a marginal consulting role to a core function at the heart of the corporation s management from a technique to a science that can be taught in universities The book is a mixture of theories and live examples taken from the author s 30 years of professional experience and provides the tools to structure the role of the EnvOping manager It allows managers to look to the future and the coming changes with more confidence

International Trade and Health Protection Tracey Epps, 2008-01-01 This detailed and fully referenced text is a valuable resource both for practitioners and academics Michael Blakeney International Trade Law and Regulation Interspersing law with societal context this volume by Dr Epps stands out among WTO analysis The author offers a delightfully balanced view on the nature and origin of SPS measures including references to history whilst at the same time mastering the hard law of the SPS Agreement in detail Practitioners will enjoy the detailed analysis of WTO dispute settlement A reference book for practice and academia and also a very very good read Geert Van Calster Katholieke Universiteit Leuven Belgium This book examines and critiques the WTO s Agreement on the Application of Sanitary and Phytosanitary Measures SPS Agreement asking whether it strikes an appropriate balance between conflicting domestic health protection and trade liberalization objectives It pays particular attention to situations likely to occur but not yet fully examined either in the literature or in WTO law most importantly where public opinion demands regulation in the face of scientific uncertainty as to the existence or otherwise of a health risk Tracey Epps concludes that the SPS Agreement s science based framework is capable of dealing with the differing objectives of health and trade and that it provides countries with more flexibility to respond to scientific uncertainties and public sentiment than many critics contend This conclusion is strongly influenced by a positive analysis of domestic regulatory decision making which finds potential for regulatory capture by domestic protectionist interests and thus emphasizes the importance of ensuring that decisions are made on a sound and principled basis Including a historical overview of disputes over trade and health since the 1800s this book provides a comprehensive analysis of and new perspective on an important area of intersection between international trade law and domestic policy It will be of interest to a wide ranging audience including legal and non legal academics policy makers and analysts in the field of risk regulation trade law practitioners in governments and lawyers and analysts in international institutions

Roger G. Noll,2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 The Risk-Based Approach to Data Protection Raphaël Gellert,2020-10-06 The concept of a risk based approach to data protection came to the fore during the overhaul process of the EU s General Data Protection Regulation GDPR At its core it consists of endowing the regulated organizations that process personal data with increased responsibility for complying with data protection mandates Such increased compliance duties are performed through risk management tools This book provides a comprehensive analysis of this legal and policy development which considers a legal historical and theoretical perspective By framing the risk based approach as a sui generis implementation of a specific regulation model known as meta regulation this book provides a recollection of the policy developments that led to the adoption of the risk based approach in light of regulation theory and debates It also discusses a number of salient issues pertaining to the risk based approach such as its rationale scope and meaning the role for regulators and its potential and limits The book also looks at they way it has been undertaken in major statutes with a focus on key provisions such as data protection impact assessments or accountability Finally the book devotes considerable attention to the notion of risk It explains key terms such as risk assessment and management It discusses in depth the role of harms in data protection the meaning of a data protection risk and the difference between risks and harms It also critically analyses prevalent data protection risk management methodologies and explains the most important caveats for managing data protection risks **Transnational Narratives and Regulation of GMO Risks** Giulia Claudia Leonelli,2021-11-04

This book provides an innovative insight into the regulatory conundrum of genetically modified organisms GMOs deploying transnational legal analysis as a methodological framework to explore the most controversial area of risk governance The book deconstructs hegemonic and counter hegemonic transnational narratives on the governance of GMO risks cutting across US law EU law the WTO Agreement on Sanitary and Phytosanitary Measures and hybrid standard setting regimes

Should uncertain risks be run unless adverse effects have been conclusively established and should regulators only act where this is cost benefit effective Should risk managers make a convincing case that a product or process is safe enough for the relevant uncertain risks to be socially acceptable How can intractable transnational regulatory conflicts be solved The book complements a close analysis of regulatory frameworks and case law with a more encompassing perspective on the political socio economic and distributional implications of different approaches to the regulation of health and environmental risks at times of globalisation The GMO deadlock thus becomes a lens through which to investigate the underlying value systems goals and impacts of transnational discourses on risk governance Against this backdrop the normative strand of analysis points to the limited ability of science and procedural deliberation to generate authentic agreement and to identify normatively legitimate solutions in the absence of pre existing shared perspectives
