Courtenay, Matt Griffiths, 2009-10-01 The supply and administration of medicines is an area of practice in which a number of healthcare professionals e.g. nurses, pharmacists and allied health professionals are involved. Prescribing is a relatively new role which many of these healthcare professionals have adopted. Medication Safety focuses on promoting safety in the delivery of medicines. Chapters explore the various stages in the medication process including safety in prescribing, dispensing and administering drugs. Adverse reactions, parenteral administration, dosage calculations, safety with controlled drugs and reporting errors and near misses are all addressed in evidence-based contributions from a highly experienced team of contributors. This text is essential reading for all healthcare professionals involved in the delivery of medicines to patients.

Textbook of Periconceptual Medicine Nicholas Macklon, Ian Greer, Eric Steegers, 2008-12-19 A new subspecialty is growing at the interface of reproductive medicine and perinatology: infertility. Textbook of Periconceptual Medicine provides an authoritative and comprehensive reference resource for those providing medical care to women trying to conceive a healthy pregnancy. A revolutionary first edition, this text brings together a number of experts in the field. **Advanced Nanocarbon Materials** Sarika Verma, Raju Khan, Avanish Kumar Srivastava, 2022-05-04 This book provides a well-focused and comprehensive overview of the history and background of nanocarbon-based materials like carbon nanotubes, graphene and fullerenes. It discusses their structure, synthesis, properties and modifications for making various advanced materials. The authors focus on their use in the health care sector as therapeutic agents in pharmacy and medicine, in diagnosis and analysis in pharmacy and medicine as biosensors, gene and drug delivery, cancer therapy, biosensing and bioimaging, go-based antibacterial materials and as a promising antioxidant and GO-based scaffold for cell culture. The authors also showcase the application potential of advanced nanocarbon-based materials by examining the biomedical applications developed via novel advanced designing in which the technologies will be adopted and the end users can be benefited. Finally, the authors discuss the increasing research on carbon-based materials along with the challenges they are currently facing along with possible solutions that may result in the availability of the accessible, reliable and cost-efficient technology. The potential user for this book may be medical practitioners, biologists, pharmacists and chemists. This book covers in-depth knowledge of processing parameters for making nanocarbon-based material for high-end applications in the biomedical and pharmaceutical fields.
