Safeguarding The Uniqueness Of The Colorado Plateau An Ecoregional Assessment Of Biocultural Diversity:

Safeguarding the Uniqueness of the Colorado Plateau ,2002 A collection of papers offers strategies for preserving the biocultural diversity of the Colorado Plateau region The Colorado Plateau VI Laura Foster Huenneke,Charles van Riper,Kelley Ann Hays-Gilpin,2015-06-18 With a plethora of updates and insights into land conservation and management questions on the Colorado Plateau The Colorado Plateau VI shows how new technologies for monitoring spatial analysis restoration and collaboration improve our understanding management and conservation of outcomes at the appropriate landscape scale for the Colorado Plateau Provided by publisher Biocultural Diversity Conservation Luisa Maffi,Ellen Woodley,2012-09-10 The field of biocultural diversity is emerging as a dynamic integrative approach to understanding the links between nature and culture and the interrelationships between humans and the environment at scales from the global to the local Its multifaceted contributions have ranged from theoretical elaborations to mappings of the overlapping distributions of biological and cultural diversity to the development of indicators as tools to measure assess and monitor the state and trends of biocultural diversity to on the ground implementation in field projects This book is a unique compendium and analysis of projects from all around the world that take an integrated biocultural approach to sustaining cultures and biodiversity The 45 projects reviewed exemplify a new focus in conservation this is based on the emerging realization that protecting and restoring biodiversity and maintaining and revitalizing cultural diversity and cultural vitality are intimately indeed inextricably interrelated Published with Terralingua and IUCN The Colorado Plateau II Charles Van Riper,David John Mattson,2005 The publication of The Colorado Plateau Cultural Biological and Physical Research in 2004 marked a timely summation of current research in the Four Corners states This new volume derived from the seventh Biennial Conference on the Colorado Plateau in 2003 complements the previous book by focusing on the integration of science into resource management issues The 32 chapters range in content from measuring human impacts on cultural resources through grazing and the wildland urban interface issues to parameters of climate change on the Plateau The book also introduces economic perspectives by considering shifting patterns and regional disparities in the Colorado Plateau economy A series of chapters on mountain lions explores the human wildland interface These chapters deal with the entire spectrum of challenges associated with managing this large mammal species in Arizona and on the Colorado Plateau conveying a wealth of timely information of interest to wildlife managers and enthusiasts Another provocative set of chapters on biophysical resources explores the management of forest restoration from the micro scale all the way up to large scale GIS analyses of ponderosa pine ecosystems on the Colorado Plateau Given recent concerns for forest health in the wake of fires severe drought and bark beetle infestation these chapters will prove enlightening for forest service park service and land management professionals at both the federal and state level as well as general readers interested in how forest management practices will ultimately affect their recreation activities With broad coverage that touches on topics as diverse as movement

patterns of rattlesnakes calculating watersheds and rescuing looted rockshelters this volume stands as a compendium of cutting edge research on the Colorado Plateau that offers a wealth of insights for many scholars *Stitching the West Back Together* Susan Charnley, Thomas E. Sheridan, Gary P. Nabhan, 2014-09-10 News headlines would often have us believe that conservationists are inevitably locked in conflict with the people who live and work on the lands they seek to protect Not so Across the western expanses of the United States conservationists ranchers and forest workers are bucking preconceptions to establish common ground As they join together to protect the wide open spaces diverse habitats and working landscapes upon which people plants and animals depend a new vision of management is emerging in which the conservation of biodiversity ecosystem integrity and sustainable resource use are seen not as antithetical but as compatible even symbiotic goals Featuring contributions from an impressive array of scientists conservationists scholars ranchers and foresters *Stitching the West Back Together* explores that expanded inclusive vision of environmentalism as it delves into the history and evolution of Western land use policy and of the working landscapes themselves Chapters include detailed case studies of efforts to promote both environmental and economic sustainability with lessons learned descriptions of emerging institutional frameworks for conserving Western working landscapes and implications for best practices and policies crucial to the future of the West s working forests and rangelands As economic and demographic forces threaten these lands with fragmentation and destruction this book encourages a hopeful balance between production and conservation on the large interconnected landscapes required for maintaining cultural and biological diversity over the longterm **Ethnobotany and Conservation of Biocultural Diversity** Thomas J. S. Carlson, Luisa Maffi, 2004 The field of ethnobotany and more generally ethnobiology traces its roots to two distinct research traditions a long standing interest in how human societies around the world make use of plants and animals in their local environments and a more recent mid 1950 s onward interest in how humans perceive classify and name the natural world *Ethnobotany and Conservation of Biocultural Diversity* is based in part on a symposium by the same title held at the Sixteenth International Botanical Congress in Saint Louis Missouri August 17 1999 This volume showcases recent ethnobotanical research conducted by members of a new generation of ethnobiologists including case studies from the tropical environments of the Amazon Basin Africa and Asia Part 1 focuses on the contributions of traditional ecological knowledge and sustainable use of traditional plant resources Part 3 deals with ethical issues in ethnobiology *A Walk in the Park* Kevin Fedarko, 2024-05-28 A New York Times Bestseller Winner of the 2024 National Outdoor Book Award in Outdoor Literature Winner of the 2025 Andrew Carnegie Medal for Excellence in Nonfiction Named a Best Book of the Year by the New York Times Air Mail Smithsonian Magazine and Financial Times A triumph Fedarko doesn t describe awe he induces it The New York Times Book Review Passionate memorable life affirming The Wall Street Journal From the author of the beloved bestseller *The Emerald Mile* a rollicking and poignant account of an epic 750 mile odyssey on foot through the heart of America s most magnificent national park and the grandest wilderness on earth Two friends zero preparation one

dream A few years after quitting his job to follow an ill advised dream of becoming a guide on the Colorado River Kevin Fedarko was approached by his best friend National Geographic photographer Pete McBride with a vision as bold as it was harebrained Together they would embark on an end to end traverse of the Grand Canyon a journey that McBride promised would be a walk in the park Against his better judgment Fedarko agreed unaware that the small cluster of experts who had completed the crossing billed it as the toughest hike in the world The ensuing ordeal which lasted more than a year revealed a place that was deeper richer and far more complex than anything the two men had imagined and came within a hair s breadth of killing them both They struggled to make their way through a vertical labyrinth of thousand foot cliffs and crumbling ledges where water is measured out by the teaspoon and every step is fraught with peril and where even today there is still no trail along the length of the country s best known and most iconic park Along the way veteran long distance hikers ushered them into secret pockets invisible to the millions of tourists gathered on the rim where only a handful of humans have ever laid eyes Members of the canyon s eleven Native American tribes brought them face to face with layers of history that forced them to reconsider myths at the center of our national parks and exposed them to the threats of commercial tourism Even Fedarko s dying father who had first pointed him toward the canyon more than forty years earlier but had never set foot there himself opened him to a new way of seeing the landscape And always there was the great gorge itself austere and unforgiving but suffused with magic drenched in wonder and redeemed by its own transcendent beauty A singular portrait of a sublime place A Walk in the Park is a deeply moving plea for the preservation of America s greatest natural treasure The Vanishing Languages of the Pacific Rim Osahito Miyaoka,Osamu Sakiyama,Michael E.

Krauss,2007-04-12 This book presents the first comprehensive survey of the languages of the Pacific rim a vast region containing the greatest typological and genetic diversity in the world It includes the littoral regions of North and South America Australasia east and south east Asia and Japan as well as the Pacific itself As its languages decline and disappear sometimes without trace this rich linguistic heritage is rapidly eroding In The Vanishing Languages of the Pacific Rim distinguished scholars report on the current state of the region s languages and provides a critical survey of the current state of the region s languages They show what is currently known and recorded and what remains to be examined and documented They consider which languages are the most vulnerable to extinction and what steps that can be taken to save them Their analyses range from the regional to the local and focus on languages in a wide variety of social and ecological settings Together they make a compelling case for research throughout the region and show how and where this needs to be done Counting Species Rafi Youatt,2015-02-14 Three decades of biodiversity governance has largely failed to stop the ongoing environmental crisis of global species loss Yet that governance has resulted in undeniably important political outcomes In Counting Species Rafi Youatt argues that the understanding of global biodiversity has produced a distinct vision and politics of nature one that is bound up with ideas about species norms of efficiency and apolitical forms of technical

management Since its inception in the 1980s biodiversity's political power has also hinged on its affiliation with a series of political concepts Biodiversity was initially articulated as a moral crime against the intrinsic value of all species In the 1990s and early 2000s biodiversity shifted toward an association with service provision in a globalizing world economy before attaching itself more recently to the discourses of security and resilience Even as species extinctions continue biodiversity's role in environmental governance has become increasingly abstract Yet the power of global biodiversity is eventually always localized and material when it encounters nonhuman life In these encounters Youatt finds reasons for optimism tracing some of the ways that nonhuman life has escaped human social means Counting Species compellingly offers both a political account of global biodiversity and a unique approach to political agency across the human nonhuman divide **Natural Resources Journal**, 2003 **Reinventing Navajo Grazing** Fawn Scheer, 2007 Woodlands in Crisis Gary Paul Nabhan, Marcelle Coder, Susan Jane Smith, 2004 In recent years the American West has suffered from unprecedented stand replacing wildfires and the government has invested more money in preventative forest thinning than ever before The crisis for Western forests and woodlands has spurred heated policy debates about thinning controlled burns and other restoration activities p 1 **Ecological Restoration of Southwestern Ponderosa Pine Forests** Peter Friederici, Northern Arizona University. Ecological Restoration Institute, 2003-05-16 Brings together the writings of practitioners and thinkers from a variety of fields including forestry biology philosophy ecology political science archaeology botany and geography to synthesize what is known about ecological restoration in ponderosa pine forests and to consider the factors involved in developing and implementing a successful restoration effort **Journal of Food Law & Policy**, 2015 Ford Foundation Annual Report Ford Foundation, 2005 The president's report to the trustees and statement of grants **Advances in Economic Botany**, 1984 **River and Desert Plants of the Grand Canyon** Kristin Huisinga, Lori Makarick, Kate Watters, 2006 The Grand Canyon's isolation great elevational range and position at the convergence of three North American deserts the Mojave Sonoran and Great Basin have created unique habitats for an unusual assemblage of plants Some grow only at seeps and springs others emerge from cracks in the bedrock and some live only in the Grand Canyon for example Roaring Springs prickly poppy and Grand Canyon flaveria River and Desert Plants of the Grand Canyon the first comprehensive field guide devoted to plants that live below the canyon rims is bursting with beautiful color photographs and detailed line drawings of more than 250 ferns grasses forbs shrubs and trees Narratives organized by life form and common family name describe each plant and its natural history and thumbnail photographs arranged by flower color and shape offer a key for easy identification Essays by contributing experts explore such topics as Grand Canyon ecology desert plant adaptations biological soil crusts plant pollination invasive species and domesticated plants of the canyon's indigenous people **Ecologically Meaningful Toponyms** Karen Sue Rolph, 2006 **Ethnobiology for the Future** Gary Paul Nabhan, 2016-04-15 The book centers on a call to define/redefine the field of ethnobiology and the need for doing so It points

a major way forward for ethnobiology toward engagement with people and communities that are saving ecosystems and lifestyles through reviving traditional agricultural items and techniques and integrating them into the contemporary world

Provided by publisher **Ethnobiology and Biocultural Diversity** John R. Stepp, Felice S. Wyndham, Rebecca K.

Zarger, 2002-01-01 The most comprehensive collection of papers in the field to date this volume presents state of the art research and commentary from more than fifty of the world's leading ethnobiologists Covering a wide range of ecosystems and world regions the papers center on global change and the relationships among traditional knowledge biological diversity and cultural diversity Specific themes include the acquisition persistence and loss of traditional ecological knowledge intellectual property rights and benefits sharing ethnobiological classification medical ethnobotany ethnoentomology ethnobiology and natural resource management homegardens and agriculture and traditional knowledge The volume will be of interest to scholars in anthropology ecology and related fields and also to professionals in conservation and indigenous rights organizations
