Evertson,Carol S. Weinstein,2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher

educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management

**Bullying and Teasing** Gayle L. Macklem,2012-12-06 Current research demonstrates that bullying affects all children in schools not simply the several students who may be most visibly involved in an individual incident In order to prevent escalation or to stop the action something different must happen The victim or bully must change but this may not be easy Importantly the classmates or the adults who witness the interaction have the power to change the interaction as well Bullying and Teasing Social Power in Children s Groups frames bullying and teasing as part of the critical foundations of elementary and middle school planning that will allow children to experience the sense of personal safety needed to learn and grow Bullying and Teasing is designed for school psychologists and other school mental health workers including school counselors social workers and school nurses who want to address the ways bullying and teasing impact both individual students and the school as a whole The book will also be of interest to school administrators health coordinators special educators and school board members

RtI involves evaluating the degree that students master academic material in response to effective instruction and demonstrate appropriate prosocial behavior in response to effective classroom management. When students are not progressing or responding academically or behaviorally to effective instructional conditions, RtI includes a functional assessment problem solving process to determine the reasons for the lack of success and the implementation of strategic interventions to help those students progress and be successful. At an operational level, RtI is often described as working within a flexible three-tiered system that is guided by students' academic and behavioral outcomes. The goal ultimately is to facilitate learning and mastery by ensuring effective instruction and classroom management for all students. Tier 1 and by speeding early and effective interventions to those students who need more strategic interventions. Tier 2 or more intensive interventions. Tier 3 interventions see the diagram below. Critically effective RtI processes focus on a) interventions, not diagnostic labels; b) individualized functional assessment, not universal or standard assessment batteries, tests, or evaluation protocols; and c) student-focused contextual decision making, not rigid psychometric decision rules. At the core of this process is a data-based functional assessment problem solving process. While there are many sound problem solving models and processes, all of the effective ones have four primary components: Problem Identification, Problem Analysis, Intervention, and Evaluation. While some utilize more steps or different semantic terms, all of the research-based models can be distilled down to these four primary components. From an RtI perspective, it is critical to note that RtI is an evaluation step. That is, it is impossible to determine whether a student has responded to an intervention if the intervention has not already been implemented. This Electronic Book (E-Book) focuses on describing the critical components of effective RtI systems and approaches at the school, district, and state levels, as well as the step-by-step Data-based Functional Assessment Problem Solving process that has been used nationally by Project ACHIEVE as the SPRINT School Prevention Review and Intervention Team process. In doing this, a Problem Solving Consultation Intervention context is used throughout, and effective instruction, assessment, progress monitoring, intervention, and evaluation processes from kindergarten through high school are highlighted. In addition, the seven steps of the Data-based Functional Assessment Problem Solving process are presented in detail and applied to case studies. Readers will learn how to scientifically clarify and identify referred student problems, how to generate hypotheses to explain why these problems exist, how to test and validate, how to invalidate these hypotheses, and then how to link confirmed hypotheses to evidence-based interventions and to evaluate students' responsiveness to them. Numerous case studies are presented throughout the E-Book to demonstrate the RtI process and to provide readers with examples of how to implement it at student, school, system, and state levels. Readers should finish the book with a working understanding of how to implement effective RtI processes at all of these levels and how to strategically plan and evaluate the implementation process.

Losen, 2015 Educators remove over 3.45 million students from school annually for disciplinary reasons despite strong evidence that school suspension policies are harmful to students. The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today's profound inequities in educational opportunity and outcomes. Part I explores how suspensions flow along the lines of race, gender, and disability status. Part II examines potential remedies that show great promise, including a district-wide approach in Cleveland, Ohio, aimed at social and emotional learning strategies. *Closing the School Discipline Gap* is a call for action that focuses on an area in which public schools can and should make powerful improvements in a relatively short period of time. Contributors include Robert Balfanz, Jamilia Blake, Dewey Cornell, Jeremy D. Finn, Thalia Gonzalez, Anne Gregory, Daniel J. Losen, David M. Osher, Russell J. Skiba, and Ivory A. Toldson. *Closing the School Discipline Gap* can make an enormous difference in reducing disciplinary exclusions across the country. This book not only exposes unsound practices and their disparate impact on the historically disadvantaged but provides educators, policymakers, and community advocates with an array of remedies that are proven effective or hold great promise. Educators, communities, and students alike can benefit from the promising interventions and well-grounded recommendations. Linda Darling-Hammond, Charles E. Ducommun, Professor of Education, Stanford University. For over four decades, school discipline policies and practices in too many places have pushed children out of school, especially children of color. *Closing the School Discipline Gap* shows that adults have the power and responsibility to change school climates to better meet the needs of children. This volume is a call to action for policymakers, educators, parents, and students. Dr. Howie Knoff, 2009-02-02 Today's school-wide Positive Behavioral Support approaches are more specific, integrated, effective, and comprehensive than ever before. This Electronic Book (E-Book) describes the components and specific elements of Project ACHIEVE's evidence-based Positive Behavioral Self-Management System (PBSS) that addresses the prevention, intervention, and intensive needs of challenging students and is fully consistent with NCLB and IDEA. Project ACHIEVE is a national award-winning school improvement program that has been designated as an evidence-based approach by two federal agencies—for example, the Department of Health and Human Services. Teaching teachers the instructional self-management skills that they need to run positive, effective classrooms that consistently hold students accountable for their behavior and that result in student learning and behavioral growth and teaching school staff organizational self-management skills so that they develop the systemic approaches needed for identifying resources and building capacity to independently sustain successful building-wide services for the prevention, strategic intervention, and intensive support needs of all students.
