Intelligent Systems and Applications Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2018-11-07. Gathering the Proceedings of the 2018 Intelligent Systems Conference. IntelliSys 2018. This book offers a remarkable collection of chapters covering a wide range of topics in intelligent systems and computing and their real world applications. The Conference attracted a total of 568 submissions from pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double blind peer review process after which 194, including 13 poster papers, were selected to be included in these proceedings. As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes, they have made it possible to tackle many problems more effectively. This branching out of computational intelligence in several directions and the use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue for reporting on cutting edge innovations and developments. This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope. Readers are sure to find the book both interesting and valuable as it presents state of the art intelligent methods and techniques for solving real world problems along with a vision of future research directions.

Construction Industry Digest United States. Occupational Safety and Health Administration, 2002. *Annual Report on the Big Data of New Energy Vehicle in China (2023)* Zhenpo Wang, 2024-07-31. This open access book based on static indicators and dynamic big data from local electric vehicles is the first research annual report on the Big Data of New Energy Vehicles (NEVs) in China. Using the real time big data collected by China's National Monitoring and Management Platform for NEVs, this book delves into the main annual technological progress of NEVs, the vehicle operating characteristics, and it also anticipates the trend of NEVs industry. Various graphs and charts and detailed data in this book will familiarize readers with the operation characteristics and

practical application of China's NEVs industry and popularize the concept of automobile electrification. Besides this book also makes an objective evaluation of the current situation and technological improvement of China's NEVs industry presenting sensible suggestions for the development of the industry. This book is written for government staff, researchers, college staff and technical staff of automobile and spare parts enterprises which serves as an important reference for the decision making of government departments and strategic decisions of automotive companies.

Worker Protection Programs in Construction Meridian Research, Inc, 1994 *Construction Industry Field Guide* Safety and Health Bureau, 2016-12-31. The Construction Industry safety and health standards contained in this booklet are to aid employers, supervisors and safety and health personnel in their efforts toward achieving compliance with OSHA standards in the workplace. Although the digest does not contain all OSHA Construction Industry safety and health standards, those presented are 1) standards most frequently overlooked by the employer and 2) standards covering particularly hazardous situations. The standards are presented alphabetically followed by the reference to the appropriate regulation. With few exceptions, standards in this digest are from Title 29 of the Code of Federal Regulations, CFR Part 1926.

Handbook of Construction Safety, Health and Well-being in the Industry 4.0 Era Patrick Manu, Gao Shang, Paulo Jorge Silva Bartolo, Valerie Francis, Anil Sawhney, 2023-05-12. This Handbook seeks to examine and advance current understanding of the confluence of construction health, safety and well-being and the broad range of Industry 4.0 technologies in use in the architecture, engineering and construction (AEC) industry. Globally, the construction sector accounts for more than 100,000 occupational fatalities annually. In many countries, reports of work-related accidents, injuries and illnesses are commonplace and there is an urgent need to improve the occupational safety and health (OSH) outlook of the construction sector. The fourth industrial revolution presents opportunities to leverage modern technologies, e.g. big data, artificial intelligence, automation, sensors, AR, VR and robotics to improve the poor OSH performance of the construction industry. However, embracing such technologies could also induce unintended adverse consequences for the safety, health and well-being of construction workers. Therefore, the realisation of the opportunities as well as the mitigation of potentially adverse consequences requires research-informed, holistic insights around the union of Industry 4.0 and construction occupational safety and health management. This cutting-edge volume addresses a significant gap in literature by bringing together experienced academics and researchers to highlight the drivers, opportunities and drawbacks of the merging of Industry 4.0 with construction health, safety and well-being. After a detailed introductory section which highlights key issues and challenges, section one covers the application of a broad range of digital technologies, then section two discusses the application of industrial production and cyber-physical systems in the context of construction safety and health management. Readers from a broad range of AEC backgrounds as well as safety professionals and technologists will come to understand how the technologies are applied and the resulting OSH benefits as well as potential drawbacks.
