Kennedy,2023-08-10 The Earliest English Poetry 1971 offers a critical survey of Old English poetry that is of the vernacular verse composed in England from the seventh century to the Norman Conquest It is a studied reappraisal of Old English verse by the light of modern critical scholarship      The Oxford Handbook of Medieval Latin Literature Ralph Hexter,David Townsend,2012-01-20 The twenty eight essays in this handbook represent the best current thinking in the study of Latin language and literature in the Middle Ages Contributing authors both senior scholars and gifted younger thinkers among them not only illuminate the

field as traditionally defined but also offer fresh insights into broader questions of literary history cultural interaction world literature and language in history and society Their studies vividly illustrate the field's complexities on a wide range of topics including canonicity literary styles and genres and the materiality of manuscript culture At the same time they suggest future possibilities for the necessarily provisional and open ended work essential to the pursuit of medieval Latin studies The overall approach of The Oxford Handbook of Medieval Latin Literature makes this volume an essential resource for students of the ancient world interested in the prolonged after life of the classical period's cultural complexes for medieval historians for scholars of other medieval literary traditions and for all those interested in delving more deeply into the fascinating more than millennium long passage between the ancient Mediterranean world and what we consider modernity **Carnegie**

**Institution of Washington Publication**, 1908 **War and the Making of Medieval Monastic Culture** Katherine Smith, Katherine Allen Smith, 2013-09-19 An extremely interesting and important book makes an important contribution to the history of medieval monastic spirituality in a formative period whilst also fitting into wider debates on the origins development and impact of ideas on crusading and holy war Dr William Purkis University of Birmingham Monastic culture has generally been seen as set apart from the medieval battlefield as those who prayed were set apart from those who fought However in this first study of the place of war within medieval monastic culture the author shows the limitations of this division Through a wide reading of Latin sermons letters and hagiography she identifies a monastic language of war that presented the monk as the archetypal soldier of Christ and his life of prayer as a continuous combat with the devil indeed monks' claims to supremacy on the spiritual battlefield grew even louder as Church leaders extended the title of soldier of Christ to lay knights and crusaders So while medieval monasteries have traditionally been portrayed as peaceful sanctuaries in a violent world here the author demonstrates that monastic identity was negotiated through real and imaginary encounters with war and that the concept of spiritual warfare informed virtually every aspect of life in the cloister It thus breaks new ground in the history of European attitudes toward warfare and warriors in the age of the papal reform movement and the early crusades Katherine Allen Smith is Assistant Professor of History University of Puget Sound **Text and Transmission in Medieval Europe** Chris Bishop, 2008-12-18 Scholars of the Middle Ages are familiar with the notion of text as an inscribed document whether that inscription occurs upon stone metal vellum or textiles but the concept of inscription and therefore of text can be extended to cover a range of evidence Thus one might speak of archaeological remains land use patterns traditional stories remnant practices and revenant beliefs as constituting texts in their own right Broadly defined then text is the means by which we engage with the historical subject The medievalist however faces particular constraints in interpreting these texts through the agencies of their transmission Questions such as who authored these texts when and why intersect with problems of transcription translation and redaction to inform a complex discourse The majority of the chapters in this book started life as papers presented at a conference entitled Text and Transmission in Early Medieval

Europe and the title of this book ultimately derives from that theme The subjects these chapters deal with range in geography from Ireland through to Byzantium and cover almost a millennium of European history but they are united in their effort to prise from their subjects some truths about texts transmission and the critical literacies needed to interpret both
