## Saga Of 54 Or More:

In Search of the Culprit Lukas Rösli, Stefanie Gropper, 2021-12-06 Despite various poststructuralist rejections of the idea of a singular author genius the question of a textual archetype that can be assigned to a named author is still a common scholarly phantasm The Romantic idea that an author created a text or even a work autonomously is transferred even to pre modern literature today This ignores the fact that the transmission of medieval and early modern literature creates variances that could not be justified by means of singular authorships The present volume offers new theoretical approaches from English German and Scandinavian studies to provide a historically more adequate approach to the question of authorship in premodern literary cultures Authorship is no longer equated with an extra textual entity but is instead considered a narratological inner and intertextual function that can be recognized in the retrospectively established beginnings of literature as well as in the medial transformation of texts during the early days of printing The volume is aimed at interested scholars of all philologies especially those dealing with the Middle Ages or Early Modern Period      **The War Against**

**Rommel's Supply Lines, 1942-1943** Alan Levine, 1999-06-30 An exciting account of a little known yet vital part of World War II the Allied effort to blockade Axis forces in North Africa with a relatively small number of planes and submarines included some of the war's most spectacular air battles and opened the way to the attack on Fortress Europe from the south This is the first book length treatment of the crucial struggle to cut Axis supply lines in the Tunisian campaign of 1942-1943 a battle often ignored or played down even by official historians The campaign marked the first big U S victory against the Axis powers and served as a proving ground for several top Allied commanders This study fills an important gap in the history of the war reevaluating the development of Allied airpower and the role of Italy in the campaign Allied success in interdiction was a critical factor in the greatest Allied victory in the Mediterranean campaign a victory which left the enemy so weakened that it could not stop the subsequent invasion of Europe from the south Despite initial disorganization and early disappointments the British waged one of only two successful submarine campaigns ever fought This study describes some of the war's most amazing air battles notably Operation Flax against the enemy's air transport fleet and attacks on convoys all interwoven with the events of the ground war in the desert and comparisons with the Pacific effort It details the struggle to reorganize and improve the Allied effort the belated success of sea sweeps against enemy ships and the final victory in the spring of 1943 in which an air blockade was clamped on the sea and sky approaches to Tunisia      **Youth and Age in the**

**Medieval North** Shannon Lewis-Simpson, 2008 This interdisciplinary volume explores social cultural and biological definitions of youth and age specific to the medieval north and changing mentalities towards youth and age as a result of political cultural and religious transformations in the north      **Landmark Cases in EU Law, Volume 2** Paul Craig, Robert Schütze, 2025-07-10 From Van Gend en Loos and Costa v ENEL to Cassis de Dijon and Consten and Grundig Landmark Cases

in EU Law explores the most important and well known EU law cases in two volumes These volumes show how the European

Court of Justice has played a fundamental role in the construction of the European Union in the past 70 years. Many EU landmark cases have been controversial yet no one can deny that they have been essential in defining the Union legal order as we find it today. Volume 2 explores the substantive cases that have shaped the Union's internal market, its competition law as well as its internal and external policies. Each of the twenty cases within this volume is placed in its historical and doctrinal context and each chapter also presents the history of its reception by the Court and academia.

**History of the Literature of the Scandinavian North from the Most Ancient Times to the Present** Frederik Winkel Horn, 1883

**The Poetic Genesis of Old Icelandic Literature** Mikael Males, 2019-12-16

This book assesses the importance of poetry for the Old Icelandic literary flowering of c. 1150-1350. It addresses the apparent paradox that an extremely conservative form of literature, namely skaldic poetry, was at the core of the most innovative literary and intellectual experiments in the period. The book argues that this cannot simply be explained as a result of strong local traditions as in most previous scholarship. Thus, for instance, the author demonstrates that the mix of prose and poetry found in kings sagas and sagas of Icelanders is roughly contemporary to the written sagas. Similarly, he argues that treatises on poetics and mythology, including Snorri's Edda, are new to the period, not only in their textual form but also in their systematic mode of analysis. The book contends that what is truly new in these texts is the method of the authors, derived from Latin learning but applied to traditional forms and motifs as encapsulated in the skaldic tradition. In this way, Christian Latin learning allowed for its perceived opposite, vernacular oral literature of pagan extraction, to reach full fruition and to largely replace the very literature which had made this process possible in the first place.

**Flesh and Word** Sarah Künzler, 2016-08-22

Bodies and their role in cultural discourse have been a constant focus in the humanities and social sciences in recent years, but comparatively few studies exist about Old Norse/Icelandic or early Irish literature. This study aims to redress this imbalance and presents carefully contextualised close readings of medieval texts. The chapters focus on the role of bodies in medially discourse in various contexts, that of identity in relation to ideas about self and other, of inscribed and marked skin, and of natural bodily matters such as defecation, urination, and menstruation. By carefully discussing the sources in their cultural contexts, it becomes apparent that medieval Scandinavian and early Irish texts present their very own ideas about bodies and their role in structuring the narrated worlds of the texts. The study presents one of the first systematic examinations of bodies in these two literary traditions in terms of body criticism and emphasises the ingenuity and complexity of medieval texts.

**New Studies in the Manuscript Tradition of Njáls saga** Svanhildur Óskarsdóttir, Emily Lethbridge, 2018-10-22

Njáls saga is the best known and most highly regarded of all medieval Icelandic sagas, and it occupies a special place in Icelandic cultural history. The manuscript tradition is exceptionally rich and extensive. The oldest extant manuscripts date to only a couple of decades after the saga's composition in the late 13th century, and the saga was subsequently copied by hand continuously up until the 20th

century even alongside the circulation of printed text editions in latter centuries The manuscript corpus as a whole has great socio historical value showcasing the myriad ways in which generations of Icelanders interpreted the saga and took an active part in its transmission the manuscripts are also valuable sources for evidence of linguistic change and other phenomena The essays in this volume present new research and a range of interdisciplinary perspectives on the Nj ls saga manuscripts Many of the authors took part in the international research project The Variance of Nj ls saga which was funded by the Icelandic Research Council from 2011-2013

**An Arena for Higher Powers** Olof Sundqvist, 2015-11-16 In *An Arena for Higher Powers* Olof Sundqvist investigates ceremonial buildings and religious ruler strategies in Late Iron Age Scandinavia i e AD 550-1050-1100 The author offers here an account of the role played by religion in political undertakings among the pre-Christian ruling elites at halls and cultic buildings Sundqvist applies a regional approach so as to be able to account for the specific historical cultural and social contexts The focus is mainly on three regions the Lake Mälaren area in Sweden Trøndelag in Norway and Iceland Since the political structure and other contextual aspects partly differed in the three regions the religious strategies for gaining legitimacy and authorization at the sanctuaries also varied to some extent in these areas

**BOOK JACKET** Old Norse-Icelandic Philology and National Identity in the Long Nineteenth Century, 2021-11-01 For centuries the literary heritage preserved in Icelandic medieval manuscripts has played a vital role in the self image of the Icelandic nation From the late eighteenth century Icelandic scholars had better opportunities than previously to study and publish this material on their own terms Throughout the long nineteenth century they were intensely engaged in philological work on it This coincided with an increasing awareness among Icelanders of a separate nationality and their growing demand for autonomy What was the connection between the two developments This literature was also important for the shaping of identities among other Northern European nations The twelve chapters of this collection explore the interplay between various national discourses that characterized the scholarly reception of this heritage during the period Contributors are Alderik H Blom Clarence E Glad Matthew James Driscoll Gylfi Gunnlaugsson Simon Halink Hjalti Snorrarsson Jon Gunnar Jorgensen Annette Lassen and Ragnheiur Madsen

*Masculinities in Old Norse Literature* Gareth Lloyd Evans, Jessica Clare Hancock, 2020 Compared to other areas of medieval literature the question of masculinity in Old Norse Icelandic literature has been understudied This is a neglect which this volume aims to rectify The essays collected here introduce and analyse a spectrum of masculinities from the sagas of Icelanders contemporary sagas kings sagas legendary sagas chivalric sagas bishops sagas and eddic and skaldic verse producing a broad and multifaceted understanding of what it means to be masculine in Old Norse Icelandic texts A critical introduction places the essays in their scholarly context providing the reader with a concise orientation in gender studies and the study of masculinities in Old Norse Icelandic literature This book's investigation of how masculinities are constructed and challenged within a unique literature

is all the more vital in the current climate in which Old Norse sources are weaponised to support far right agendas and racist ideologies are intertwined with images of vikings as hypermasculine This volume counters these troubling narratives of masculinity through explorations of Old Norse literature that demonstrate how masculinity is formed how it is linked to violence and vulnerability how it governs men s relationships and how toxic models of masculinity may be challenged

Clover,John Lindow,2019-06-30 The current revival of interest in the rich and varied literature of early Scandinavia has prompted a corresponding interest in its background its origins social and historical context and relationship to other medieval literatures Even readers with a knowledge of Old Norse and Icelandic have found these subjects difficult to pursue however for up to date reference works in any language are few and none exist in English To fill the gap six distinguished scholars have contributed ambitious new essays to this volume The contributors summarize and comment on scholarly work in the major branches of the field Eddic and skaldic poetry family and kings sagas courtly writing and mythology Taken together their judicious and attractively written essays each with a full bibliography make up the first book length survey of Old Norse literature in English and a basic reference work that will stimulate research in these areas and help to open up the field to a wider academic readership

**The Christianization of Iceland** Orri Vesteinsson, 2000-05-18 In this first historical study of High Medieval Iceland to be published in English, Dr Vesteinsson investigates the influence of the Christian Church on the formation of the earliest state structures in Iceland from the conversion in 1000 to the union with Norway in 1262. In the history of mankind, states and state structures have usually been established before the advent of written records. As a result, historians are rarely able to trace with certainty the early development of complex structures of government. In Iceland, literacy and the practice of native history writing had been established by the beginning of the twelfth century, whereas the formation of a centralised government did not occur until more than a hundred years later. The early development of state-like structures has therefore been unusually well chronicled in the Icelandic Sagas and in the historical records of the twelfth and thirteenth centuries. Based on this wealth of material, The Christianization of Iceland is an important contribution to the discussion on the formation of states.
