## **Salmon Without Rivers:**

*Salmon Without Rivers* Jim Lichatowich, 1999-08 Throughout Lichatowich argues that the dominant worldview of our society a worldview that denies connections between humans and the natural world has created the conflict and controversy that characterize the recent history of salmon The author argues that unless this worldview is challenged and changed there is little hope for recovery BOOK JACKET To Think Like a Mountain Niels Sparre Nokkentved, 2021-06-22 In the West shortsighted human self interest has resulted in devastating environmental losses The fur trade decimated beaver populations and streams and wetland ecosystems deteriorated Though most mining ceased by the late 1920s water running from the Pacific Mine nearly a century later still carried ten times the lead level standard set by the federal Clean Water Act Where grazing depleted native bunchgrasses fire prone cheatgrass grew in its place Migrating from Idaho streams salmon once reached the ocean in ten to fourteen days Now it takes fifty or more In 2016 a snowstorm blew a flock of snow geese off course They landed on contaminated water and about three thousand died Author Niels S Nokkentved takes a fresh look at environmental challenges affecting Northwest residents His essays examine cultural conflicts over resource extraction threats to watersheds from abandoned mines wolf recovery in the northern Rocky Mountains the lingering effects of livestock grazing on western rangelands and the rapidly disappearing sage grouse They discuss the importance of forest fires the value of beavers the failed promises of salmon hatcheries the reasons behind the decline of the timber industry in the Pacific Northwest and how unlikely allies learned to set aside their differences in order to resolve long standing disputes Nokkentved s goal is to encourage people to think like a mountain in other words to consider the long term consequences He shares his connection to each concern as well as his own evidence based perspective He believes that it most profits society collectively and as individuals when people respect the balance of nature and he wants to draw others to the same conclusion

**The Tragedy of the Commodity** Stefano B. Longo, Rebecca Clausen, Brett Clark, 2015-06-25 Winner of the 2017 Paul Sweezy Marxist Sociology Book Award from the American Sociological Association Although humans have long depended on oceans and aquatic ecosystems for sustenance and trade only recently has human influence on these resources dramatically increased transforming and undermining oceanic environments throughout the world Marine ecosystems are in a crisis that is global in scope rapid in pace and colossal in scale In *The Tragedy of the Commodity* sociologists Stefano B Longo Rebecca Clausen and Brett Clark explore the role human influence plays in this crisis highlighting the social and economic forces that are at the heart of this looming ecological problem In a critique of the classic theory the tragedy of the commons by ecologist Garrett Hardin the authors move beyond simplistic explanations such as unrestrained self interest or population growth to argue that it is the commodification of aquatic resources that leads to the depletion of fisheries and the development of environmentally suspect means of aquaculture To illustrate this argument the book features two fascinating case studies the thousand year history of the bluefin tuna fishery in the Mediterranean and the massive Pacific salmon fishery Longo Clausen

and Clark describe how new fishing technologies transformations in ships and storage capacities and the expansion of seafood markets combined to alter radically and permanently these crucial ecosystems In doing so the authors underscore how the particular organization of social production contributes to ecological degradation and an increase in the pressures placed upon the ocean The authors highlight the historical political economic and cultural forces that shape how we interact with the larger biophysical world A path breaking analysis of overfishing The Tragedy of the Commodity yields insight into issues such as deforestation biodiversity loss pollution and climate change H. Bruce Franklin,2007-04-01 In this brilliant portrait of the oceans unlikely hero H Bruce Franklin shows how menhaden have shaped America s national and natural history and why reckless overfishing now threatens their place in both Since Native Americans began using menhaden as fertilizer this amazing fish has greased the wheels of U S agriculture and industry By the mid 1870s menhaden had replaced whales as a principal source of industrial lubricant with hundreds of ships and dozens of factories along the eastern seaboard working feverishly to produce fish oil Since the Civil War menhaden have provided the largest catch of any American fishery Today one company Omega Protein has a monopoly on the menhaden reduction industry Every year it sweeps billions of fish from the sea grinds them up and turns them into animal feed fertilizer and oil used in everything from linoleum to health food supplements The massive harvest wouldn t be such a problem if menhaden were only good for making lipstick and soap But they are crucial to the diet of bigger fish and they filter the waters of the Atlantic and Gulf coasts playing an essential dual role in marine ecology perhaps unmatched anywhere on the planet As their numbers have plummeted fish and birds dependent on them have been decimated and toxic algae have begun to choke our bays and seas In Franklin s vibrant prose the decline of a once ubiquitous fish becomes an adventure story an exploration of the U S political economy a groundbreaking history of America s emerging ecological consciousness and an inspiring vision of a growing alliance between environmentalists and recreational anglers **Adaptive Governance** Ronald D. Brunner,2005 Drawing case studies the authors of this work examine how adaptive governance breaks the gridlock in natural resource policy Unlike scientific management which relies on science as the foundation for policies made through a central authority adaptive governance integrates other types of knowledge into the decision making process The authors emphasize the need for open decision making recognition of multiple interests in questions of natural resource policy and an integrative interpretive science to replace traditional reductive experimental science Effective Conservation Science Peter M. Kareiva,Michelle Marvier,Brian R. Silliman,2018 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book s principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters

discuss how to guard against confirmation bias The overall goal is that this book will lead to greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results

**Unlikely Alliances** Zoltán Grossman,2017-06-20 Often when Native nations assert their treaty rights and sovereignty they are confronted with a backlash from their neighbors who are fearful of losing control of the natural resources Yet when both groups are faced with an outside threat to their common environment such as mines dams or an oil pipeline these communities have unexpectedly joined together to protect the resources Some regions of the United States with the most intense conflicts were transformed into areas with the deepest cooperation between tribes and local farmers ranchers and fishers to defend sacred land and water Unlikely Alliances explores this evolution from conflict to cooperation through place based case studies in the Pacific Northwest Great Basin Northern Plains and Great Lakes regions during the 1970s through the 2010s These case studies suggest that a deep love of place can begin to overcome even the bitterest divides **The**

*Stock Enhancement and Sea Ranching* Kenneth M. Leber,Shuichi Kitada,H. L. Blankenship,Terje Svasand,2008-04-15 The collapse of many of the World's fisheries continues to be of major concern and the enhancement of fish stocks through techniques such as ranching is of huge importance and interest across the globe This important book which contains fully peer reviewed and carefully edited papers from the 2nd International Symposium in Stock Enhancement and Sea Ranching is broadly divided into sections covering the following areas The present situation of stock enhancement Seed quality and techniques for effective stocking Health management of hatchery stocks Methods for evaluating stocking effectiveness Population management in stock enhancement and sea ranching Management of stocked populations Ecological interactions

with wild stocks Genetic management of hatchery and wild stocks Socio economics of stock enhancement Case studies Stock Enhancement and Sea Ranching has been written and edited by some of the world s foremost authorities in fisheries science and related areas and is essential reading for all fisheries scientists throughout the World Fish biologists marine and aquatic scientists environmental biologists ecologists conservationists aquaculture personnel and oceanographers will all find much of use and interest within this book All libraries within universities and research establishments where these subjects are studied and taught should have copies of this book on their shelves

**The Wired Northwest** Paul W. Hirt, 2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region s first century of electrification Paul Hirt s new study reveals how the region s citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage *The Wired Northwest* helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future

**Born of Fire and Rain** Hoda Barakat, 2024-10-29 Go

beyond the scenery of the Pacific temperate rainforest to witness how complex ecosystems survive in a world of upheavals If you live on a rapidly changing planet you d be wise to learn how it works The giant old forests on a skinny stretch of land on the far west coast of North America have a lot to say about living in a twitchy world In this engaging book science writer M L Herring takes readers into the Pacific temperate rainforest at the tumultuous edge of a shifting continent in a precarious moment of time Readers peek behind the magnificent scenery into a forest of ancient trees exploding mountains disappearing owls tsunamis megafires and ten million people to learn what it means to be a forest in a world of upheavals Through Herring s words and pictures readers drift into the canopy through masses of ferns and lichens burrow into soil through hair thin threads of fungi and plunge headlong through a watershed flushed with rain and snowmelt Readers experience the temperate rainforest through science and art as it faces a shifting climate and the shifting priorities of a constantly changing society The book journeys beyond the grid of latitude and longitude and into places only one s imagination can fit to discover what it means to be human in an ecological world

**Death of Celilo Falls** Katrine Barber,2011-07-01 For thousands of years Pacific Northwest Indians fished bartered socialized and honored their ancestors at Celilo Falls part of a nine mile stretch of the Long Narrows on the Columbia River Although the Indian community of Celilo Village survives to this day as Oregon s oldest continuously inhabited town with the construction of The Dalles Dam in 1957 traditional uses of the river were catastrophically interrupted Most non Indians celebrated the new generation of hydroelectricity and the easy navigability of the river highway created by the dam but Indians lost a sustaining center to their lives when Celilo Falls was inundated Death of Celilo Falls is a story of ordinary lives in extraordinary circumstances as neighboring communities went through tremendous economic environmental and cultural change in a brief period Katrine Barber examines the negotiations and controversies that took place during the planning and construction of the dam and the profound impact the project had on both the Indian community of Celilo Village and the non Indian town of The Dalles intertwined with local concerns that affected the entire American West treaty rights federal Indian policy environmental transformation of rivers and the idea of progress

**The Natural World of Lewis and Clark** David A. Dalton,2008 Dalton reexamines many of Lewis and Clark s discoveries and their identification of new plants and animals in the light of modern science to show their lasting biological significance In clear readily accessible terms he relates the Expedition s observations to principles of ecology genetics physiology and animal behavior Provided by publisher

**Kayaking Alone** Mike Barenti,2008 Kayaking Alone is a narrative of man and nature one on one but also of man and nature writ large In the stories of the river guides and rangers biologists and ranchers American Indians and dam workers he meets along the way the rich and complicated life of the river emerges in a striking often painfully clear panorama Through his journey the ecology history and politics of Pacific salmon unfold in fascinating detail and with this firsthand knowledge and experience the reader gains a new and personal sense of the nature that unites and divides us

**The Perfect Protein** Andy Sharpless,Suzannah

Evans,2013-05-28 The planet will be home to more than 9 billion people by 2050 and we re already seeing critical levels of famine around the world mirrored by growing obesity in developed nations In The Perfect Protein Andy Sharpless maintains that protecting wild seafood can help combat both issues because seafood is the healthiest cheapest most environmentally friendly source of protein on earth While the conservation community has taken a simplistic save the whales approach when it comes to oceans Sharpless contends that we must save the world s seafood not just to protect marine life and biodiversity but to stave off the coming humanitarian crisis With high demand for predator species like tuna and salmon wealthy nations like the U S convert reduction species such as anchovies mackerel and sardines into feed for salmon and other farmed animals even though these overlooked fish are packed with health boosting Omega 3 fatty acids and could feed millions By establishing science based quotas protecting wild habitats and reducing bycatch and treating anchovies and their like as food not feed Sharpless believes that effective ocean stewardship can put healthy sustainable seafood on the table forever To that end Oceana has tapped 20 plus chefs including Mario Batali Eric Ripert and Jose Andres for recipes that give us all a role to play in this revolutionary mission to save the fish so that we can eat more fish

**Rationality and the Ideology of Disconnection** Michael Taylor,2006-07-24 A powerful and provocative critique of the foundations of Rational Choice theory and the economic way of thinking about the world written by a former leading practitioner The target is a dehumanizing ideology that cannot properly recognize that normal people have attachments and commitments to other people and to practices projects principles and places which provide them with desire independent reasons for action and that they are reflective creatures who think about what they are and what they should be with ideals that can shape and structure the way they see their choices The author s views are brought to bear on the economic way of thinking about the natural environment and on how and when the norm of fair reciprocity motivates us to do our part in cooperative endeavors Throughout the argument is adorned by thought provoking examples that keep what is at stake clearly before the reader s mind **Newhall Ranch Resource Management and Development Plan and Spineflower Conservation Plan ,2009**
