Reclamation Managing Water in the West, The Bureau of Reclamation: Origins and Growth to 1945, Vol. 1, 2006, 2006

**American Environmental History**  
Carolyn Merchant, 2007-10-31 By studying the many ways diverse peoples have changed shaped and conserved the natural world over time environmental historians provide insight into humanity's unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis Beginning with the precolonial land use practice of Native Americans and concluding with our twenty first century concerns over our global ecological crisis American Environmental History addresses contentious issues such as the preservation of the wilderness the expulsion of native peoples from national parks and population growth and considers the formative forces of gender race and class Entries address a range of topics from the impact of rice cultivation slavery and the growth of the automobile suburb to the effects of the Russian sea otter trade Columbia River salmon fisheries the environmental justice movement and globalization This illustrated reference is an essential companion for students interested in the ongoing transformation of the American landscape and the conflicts over its resources and conservation It makes rich use of the tools and resources climatic and geological data court records archaeological digs and the writings of naturalists that environmental historians rely on to

conduct their research The volume also includes a compendium of significant people concepts events agencies and legislation and an extensive bibliography of critical films books and Web sites *Border Oasis* Evan R. Ward, 2016-12-15 The environmental history of the Colorado River delta during the past century is one of the most important and most neglected stories of the U S Mexico Borderlands Thanks to entrepreneurs such as William E Smythe the surrounding desert in Arizona California Sonora and Baja California has been transformed into an agricultural oasis but not without significant ecological political economic and social consequences Evan Ward explores the rapid development of this region examining the ways in which regional politics and international relations created a garden in the Mexicali Yuma and Imperial Valleys while simultaneously threatening the life of the Colorado River Tracing the transformation of the delta by irrigated agribusiness through the twentieth century he draws on untapped archival resources from both sides of the border to offer a new look at one of the world s most contested landscapes *Border Oasis* tells how two very different nations developed the delta into an agricultural oasis at enormous environmental cost Focusing on the years 1940 to 1975 including the disastrous salinity crisis of the 1960s and 1970s it combines Mexican Native American and U S perspectives to demonstrate that the political and diplomatic influences on the delta played as much a part in the region s transformation as did irrigation Ward reveals how mistrust among political and economic participants has been fueled by conflict between national and local officials on both sides of the border by Mexican nationalism and by a mutual recognition that water is the critical ingredient for regional economic development With overemphasis on development in both nations leading to an ecological breaking point Ward demonstrates that conflicting interests have made sound binational management of the delta nearly impossible By weaving together all of these threads that have produced the fabric of today s lower Colorado his study shows that the environmental history of the delta must be understood as a whole not from the standpoint of only one of many competing interests

**Cornerstone at the Confluence** Jason A. Robison, 2022-11-08 Signed on November 24 1922 the Colorado River Compact is the cornerstone of a proverbial pyramid an elaborate body of laws colloquially called the Law of the River that governs how human beings use water from the river system dubbed the American Nile No fewer than forty million people have come to rely on the Colorado River system in modern times a river system immersed in an unprecedented unrelenting megadrought for more than two decades Attempting to navigate this new normal policymakers are in the midst of negotiating new management rules for the river system a process coinciding with the compact s centennial that must be completed by 2026 Animated by this remarkable confluence of events *Cornerstone at the Confluence* leverages the centennial year to reflect on the compact and broader Law of the River to envision the future It is a volume inviting dialogue about how the Colorado River system s flows should be apportioned given climate change what should be done about environmental issues such as ecosystem restoration and biodiversity protection and how long standing issues of water justice facing Native American communities should be addressed In one form or another all these topics touch on the concept of equity embedded

within the compact a concept that tees up what is perhaps the foundational question confronted by Cornerstone at the Confluence Who should have a seat at the table of Colorado River governance

*Inland Fishes of the Greater Southwest* W. L. Minckley, Paul C. Marsh, 2009 This comprehensive new book replaces and substantially expands upon the landmark *Fishes of Arizona* which has been the authoritative source since it was first published in 1973 *Inland Fishes of the Greater Southwest* is a one volume guide to native and non native fishes of the lower Colorado River basin downstream from the Grand Canyon and of the northern tributaries of the Sea of Cortez in the United States and Mexico In all there are in depth accounts of more than 165 species representing 30 families The book is not limited to the fish It provides insights into their aquatic world with information on topography drainage relations climate geology vegetational history aquatic habitats human made water systems and conservation A section of the book is devoted to fish identification with keys to native and non native families as well as family keys to species The book is illustrated with more than 120 black and white illustrations 47 full color plates of native fishes and nearly 40 maps and figures Many native fish species are unique to the Southwest They possess interesting and unusual adaptations to the challenges of the region able to survive silt laden floods as well as extreme water temperatures and highly fluctuating water flows ranging from very low levels to flash floods However in spite of being well adapted many of the fish described here are threatened or endangered often due to the acts of humans who have altered the natural habitat For that reason *Inland Fishes of the Greater Southwest* presents a vast amount of information about the ecological relationships between the fishes it describes and their environments paying particular attention to the ways in which human interactions have modified aquatic ecosystems and to how humans might work to ensure the survival of rapidly disappearing native species

*Middle of Nowhere* Sara M. Patterson, 2016-02-15 Pilgrims travel thousands of miles to visit Salvation Mountain a unique religious structure in the Southern California desert Built by Leonard Knight 1931-2014 variously described as a modern day prophet and an outsider artist Salvation Mountain offers a message of divine love for humanity In *Middle of Nowhere* Sara M Patterson argues that Knight was a spiritual descendant of the early Christian desert ascetics who escaped to the desert in order to experience God more fully Like his early Christian predecessors Knight received visitors from all over the world who were seeking his wisdom In Knight's wisdom they found a critique of capitalism a challenge to religious divisions and a celebration of the common person Recounting the pilgrims stories *Middle of Nowhere* examines how Knight and the pilgrims constructed a sacred space one that is now crumbling since

the death of its creator
