**Where the Rivers Meet** Carly A. Dokis,2015-07-01 Oil and gas companies now recognize that industrial projects in the Canadian North can only succeed if Aboriginal communities are involved in decision making processes Are Aboriginal concerns appropriately addressed through current consultation and participatory processes Where the Rivers Meet is an ethnographic account of Sahtu Dene involvement in the environmental assessment of the Mackenzie Gas Project a massive pipeline that if completed would have unprecedented effects on Aboriginal communities in the North Carly A Dokis reveals that while there has been some progress in establishing avenues for Dene participation in decision making the structure of participatory and consultation processes fails to meet the expectations of local people by requiring them to participate in ways that are incommensurable with their experiential knowledge and understandings of the environment Ultimately Dokis finds that the evaluation of such projects remains rooted in non local beliefs about the nature of the environment the commodification of land and the inevitability of a hydrocarbon based economy Men and Bears

AA.VV.,2020-01-23 The time of Carnival represents a wild time at the end of winter and pointing to the beginning of a new season It is characterized by the irruption of border figures animal masks characters which recall the world of the dead and which bring within themselves the germ of a vital force of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops This wild domain shows itself under the shapes of a contiguity between human and animal the costumes the masks refer to a world in which the characteristics of the human and those of the animal are fused and intertwined Among these figures in particular emerge those of the Wild Man the human being who takes on animal like attributes and aspects and of the Bear the animal that more than all the others gets as close as possible to the human and seems to reflect a deformed image of it Such symbolic images come from far off times and places to tell a story that belongs to our common origins The bear assumes attributes and functions alike in very different cultural contexts such as the S mi of Finland or North American hunter gatherers and represents a boundary between the world of nature and the human world between the domain of animals and the difficult construction of humanity a process continued for centuries perhaps millennia and which cannot still be said complete

**Decolonising Medieval Fennoscandia** Solveig Marie Wang, 2023-03-20 The interdisciplinary study investigates the relationship between Norse and Saami peoples in the medieval

period and focuses on the multifaceted portrayal of Saami peoples in medieval texts. The investigative analysis is anchored in postcolonial methodologies and argues for the inherent need to decolonise the medieval source material as well as recent historiography. This is achieved by presenting the historiographic and political background of research into Norse Saami relations before introducing an overview of textual sources discussing Saami peoples from the classical period to the late 1400s, an analysis of the textual motifs associated with the Saami in medieval literature, their relevance and prevalence, geo-political affairs, trading relations, personal relations, and Saami presence in the south. By using decolonising tools to read Norse Saami relations in medieval texts influenced by archaeological material and postcolonial frameworks, the study challenges lingering colonial assumptions about the role of the Saami in Norse society. The current research episteme is re-adjusted to offer alternative readings of Saami characters and emphasis is put on agency, fluidity, and the dynamic realities of the Saami medieval pasts.

Anthropology and Nature Kirsten Hastrup, 2013-08-15. On the basis of empirical studies, this book explores nature as an integral part of the social worlds conventionally studied by anthropologists. The book may be read as a form of scholarly edgework resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making. The present interest in the natural world is partly a response to large-scale natural disasters and global climate change and to a keen sense that nature matters to society at many levels ranging from the microbiological and genetic framing of reproduction over co-species development to macro-ecological changes of weather and climate. Given that the human footprint is now conspicuous across the entire globe in the oceans as well as in the atmosphere, it is difficult to claim that nature is what is given and permanent while people and societies are ephemeral and simply derivative features. This implies that society matters to nature and some natural scientists look towards the social sciences for an understanding of how people think and how societies work. The book thus opens up a space for new forms of reflection on how natures and societies are generated.

**Sámi Musical Performance and the Politics of Indigeneity in Northern Europe** Thomas Hilder, 2014-10-16. The Sámi are Europe's only recognized indigenous people living across regions of Norway, Sweden, Finland, and the Russian Kola peninsula. The subjects of a history of Christianization, land dispossession, and cultural assimilation, the Sámi have, through their self-organization since World War II, worked towards Sámi political self-determination across the Nordic states and helped forge a global indigenous community. Accompanying this process was the emergence of a Sámi music scene in which the revival of the distinct and formerly suppressed unaccompanied vocal tradition

of joik was central Through joiking with instrumental accompaniment incorporating joik into forms of popular music performing on stage and releasing recordings S mi musicians have played a key role in articulating a S mi identity strengthening S mi languages and reviving a nature based cosmology Thomas Hilder offers the first book length study of this diverse and dynamic music scene and its intersection with the politics of indigeneity Based on extensive ethnographic research Hilder provides portraits of numerous S mi musicians studies the significance of S mi festivals analyzes the emergence of a S mi recording industry and examines musical projects and cultural institutions that have sought to strengthen the transmission of S mi music Through his engaging narrative Hilder discusses a wide range of issues revival sovereignty time environment repatriation and cosmopolitanism to highlight the myriad ways in which S mi musical performance helps shape notions of national belonging transnational activism and processes of democracy in the Nordic peninsula S mi Musical Performance and the Politics of Indigeneity in Northern Europe will not only appeal to enthusiasts of Nordic music but by drawing on current interdisciplinary debates will also speak to a wider audience interested in the interplay of music and politics Unearthing the challenges contradictions and potentials presented by international indigenous politics Hilder demonstrates the significance of this unique musical scene for the wider cultural and political transformations in twenty first century Europe and global modernity
