Shane Thompson Making A Subtropical Architecture:

Images of the Art Museum Eva-Maria Troelenberg, Melania Savino, 2017-02-06 In recent years the emerging field of museum studies has seen rapid expansion in the critical study of museums and scholars started to question the institution and its functions To contribute differentiated viewpoints to the currently evolving meta discourse on the museum this volume aims to investigate how the institution of the museum has been visualized and translated into different kinds of images and how these images have affected our perception of these institutions In this interdisciplinary collection scholars from a variety of academic backgrounds including art history heritage museums studies and architectural history explore a broad range of case studies stretching across the globe The volume opens up debate about the epistemological and historiographical significance of a variety of different images and representations of the Art Museum including the transformation or adaptation of the image of the art museum across periods and cultures In this context this volume aims to develop a new theoretical framework while proposing new methodological tools and resources for the analysis of museological representations on a global scale

Architecture and Urban Design in Brisbane Graham De Gruchy, 2012 This Volume is from 1989 to 2011 In this second expanded edition the buildings built in the twenty four years since Expo 88 are presented as Book 2 which in time will also become part of the history of our great city
