Shape Memory Effects in Alloys Jeff Perkins, 2012-12-06 The International Symposium on Shape Memory Effects and Applications was held at the University of Toronto on May 19-20, 1975 in four sessions over two days as part of the regular 1975 Spring Meeting of The Metallurgical Society of AIME sponsored by the Physical Metallurgy Committee of The Metallurgical Society. This was the first symposium on the subject, the only previous meeting at all related being the 1968 NOL Symposium on TiNi and Associated Compounds. One of the major intentions of this Symposium was to provide a forum for cross communication between workers in the diverse metallurgical areas pertinent to shape memory effects areas such as martensitic transformation, crystallography and thermodynamics, mechanical behavior, stress induced transformation, lattice stability and alloy development. Authors were encouraged to place an emphasis on delineation of general controlling factors and mechanisms and on comparison of shape memory effect alloy systems with systems not exhibiting SME. *Shape memory effects in alloys*, 1975

Shape Memory Alloys M. Fremond, S. Miyazaki, 2014-05-04 This book consists of two chapters. The first chapter deals with the thermomechanical macroscopic theory describing the transformation and deformation behavior of shape memory alloys. The second chapter deals with the extensive and fundamental review of the experimental works which include crystallography, transformations and mechanical characteristics in Ti-Ni-Cu base and ferrous shape memory alloys.

Shape Memory Alloys Dimitris C. Lagoudas, 2008-06-05 It all started with a trip to Red River. Coauthors, families and colleagues enjoy a working vacation in the Sangre de Cristo Mountains of New Mexico. March 2006. As technical conversations on modeling, characterization and applications of shape memory alloys (SMAs) were blending with the view of the white snowy peaks surrounding Red River, New Mexico, it became clear to our research group that a consistent and comprehensive text on SMAs would be very helpful to future students interested in performing research in this field. Many communication barriers could be eliminated and access to the substantial body of research discussed in the literature would be increased. In this way, a working

vacation became the motivating factor behind a challenging research project This book has been written with contributions from three of my current Ph D students Luciano Machado Parikshith Kumar and Darren Hartl and three former Ph D students Pavlin Entchev Peter Popov and Bj orn Kiefer These latter three coauthors were still members of the Shape Memory Alloy Research Team SMART or in close proximity when we started the project of writing this book more than a year and a half ago The work of a seventh former Ph D student Siddiq Qidwai is also included in this book The task of putting forth a sequence of topics on shape memory alloys SMAs that VIII Preface forms a coherent learning path seemed natural given the diversity of topics covered by their Ph D work
