Shaping Of Social Organization Social Rule System Theory With Applications:

The Shaping of Social Organization Tom R Burns, Helena Flam, 1987-07 The Shaping of Social Organization introduces a new social theory social rule system theory and shows how it can provide fresh insights into the major institutions of modern social life The book advances a distinctive approach to the study of actor structure dynamics placing itself in a rich scholarly tradition developed by major thinkers such as Weber Lindblom Giddens and Goffman It presents social rule system theory as a framework with which to investigate social institutions and clarifies the principles behind their formation maintenance and transformation Drawing on a wide range of case studies the authors also demonstrate the relevance of the theory for research programs As a result they are able to provide a new perspective on the study of social life

Rule Systems Theory Helena Flam, Marcus Carson, 2008 Explaining the complexity of social life remains the central challenge of the social sciences This book offers a variety of theoretical empirical explorations and applications inspired by an important neo institutional approach to tackling this complexity the rule systems theory Its point of departure is the assumption that institutions and cultural formations possess causal powers and relative autonomy constraining and enabling people's social actions and interactions Structural and cultural properties of society are carried by transmitted and reformed by human agents whose interactions generate reproduce elaborate and transform structures The contributors are highly accomplished economists sociologists and political scientists who come from the US and several European countries The book is meant as a Festschrift for Tom Burns a central figure in the development of the rule systems theory

The Shaping of Social Organization Tom R. Burns, Helena Flam, 1987

The Shaping of Socio-Economic Systems (RLE Social Theory) Thomas Baumgartner, Tom Burns, Philippe De Ville, 2014-08-07 Actor systems dynamics is an innovative multidisciplinary methodology for investigating and analyzing social struggles over economic resources and the related interplay between economic and socio political institutions and processes The authors sociologists and economists offer a systemic perspective on contemporary socio economic issues such as economic crisis unemployment inflation economic democracy and development in their analyses they identify several of the key factors that drive people to interact to initiate change and transformation as well as to resist such change Major underlying themes in the book are Conflict over the distribution of economic resources and economic policies and institutions the structural bases of economic inequality and conflict the shaping and reshaping of socio economic institutions and the contradictions conflicts and instabilities evoked by such developments the failure of orthodox economic theories including Keynesianism in the face of recurrent economic crises and instabilities the development and application of an open dynamic actor oriented systems theory grounded in the social sciences addressing complex socio economic phenomena in ways diverging substantially from conventional economics All in all the papers collected here deal on the one hand with social power conflict and struggle concerning economic resources and institutions and on the other hand the structural and other factors which drive powering initiatives conflict and social innovation and transformation The book is addressed to a broad spectrum of social and

managerial scientists concerned with socio economic issues institutions and development , The Social Organization of Disease Jochen Kleres,2017-07-06 Empirically this book is a case study analysis of dissolution processes in German AIDS organizations Indeed why is it that civic organizers start out with a commitment to a cause but end up dissolving their organization This question is exactly what Kleres seeks to tackle within The Social Organization of Disease Focusing on the emotional bases of dissolved German AIDS organizations to develop a typology of civic action and organizing Kleres presents a perspective on non profit organizations that analyses organizational development through the emotional sense making of individual organizers within the light of larger political processes and cultural contexts To this end this volume develops and applies a new methodology for researching emotions empirically expanding the scope of narrative analysis However parallel to this The Social Organization of Disease also explores how shifting discursive processes establish emotional climates and thus impact on state policies and the evolution of AIDS organizing The book would appeal to sociologists and political scientists working in the field of social movements and non profit organisations but it would also appeal to those who are interested in the sociology of emotions It would potentially be of interest to non profit scholars who consider community based organizations volunteerism and advocacy and secondarily to medical sociologists interested in AIDS service organizations Sociology International relations Social Work Political Science May be of interest for NGO activists and or employees and leadership

Rough-Neural Computing Sankar Kumar Pal,Lech Polkowski,2012-12-06 Soft computing comprises various paradigms dedicated to approximately solving real world problems e g in decision making classification or learning among these paradigms are fuzzy sets rough sets neural networks genetic algorithms and others It is well understood now in the soft computing community that hybrid approaches combining various paradigms are very promising approaches for solving complex problems Exploiting the potential and strength of both neural networks and rough sets this book is devoted to rough neuro computing which is also related to the novel aspect of computing based on information granulation in particular to computing with words It provides foundational and methodological issues as well as applications in various fields

Information Systems in the Political World K. V. Andersen,1995 This text investigates the nature of impacts of information systems on the political world in the First World countries The overall aim is to provide a framework on how to analyze implications of information technology IT on the political world and vice versa This is illustrated by a study of economic modelling at the central and local levels of government

Gender Development & Globalization Terry Blackwell,2018-06-18 Gender Development and Globalization is the leading primer on global feminist economics and development Gender is a development issue because social considerations are not easily incorporated into institutions such as policies regulations markets and organizations This process is often referred to as the mainstreaming of gender in development institutions Women are often in a disadvantaged position in terms of access to assets services information and formal decision making status Gender equality is considered a critical element in achieving Decent Work for All Women and

Men in order to effect social and institutional change that leads to sustainable development with equity and growth Gender equality refers to equal rights responsibilities and opportunities that all persons should enjoy regardless of whether one is born male or female Gender developmental scientists are concerned with age related changes in gender typing and more broadly with many issues about the emergence and patterning of gendered behaviors and thinking Description of these changes is vitally important as it informs theoretical approaches to gender development Using a broad lens on age related changes provides important information describing how development occurs but shorter time frames are also useful for identifying processes that may underlie developmental patterns Gender has been increasingly acknowledged as a critical variable in analysis and development planning Gender is an expression of power in social relationship between men and women The book will be very useful to academicians researchers planners students NGOs civil societies and all those who are interested in women studies in general and gender issues in contexts in particular Power At Work Marcel van der Linden, Nicole Mayer-Ahuja, 2023-07-04 Between working men and women which may include free wage earners chattel slaves indentured labourers sharecroppers domestic servants and many others and those employing them there has always been a constant mostly silent but sometimes overt struggle concerning employers discretionary power and over the interpretation of formal and informal rules There is a constantly shifting frontier of control that is an ongoing struggle for control in the workplace with managers and supervisors trying to increase their power over their subordinates and their subordinates in reaction trying to maintain and increase their relative autonomy The detailed case studies in this volume span three centuries and cover different parts of the world Still they speak to each other in many ways highlighting the fact that power at work whether on the shopfloor or beyond results from a wide range of complex interrelations Between technological innovations and the ways in which they are actually implemented Between the division of labour at the site of production or service provision and changing standards of social segmentation beyond the premises of the company which can be reinforced or weakened by management strategies of utilizing labour power as well as workers reaction to these strategies And finally between politics in production which shape the relations between capital and labour on the shopfloor and state politics of production which cannot be understood without reference to broader developments in economy and society **The Transition to Smart Mobility** Leander Kauschke, 2023-10-19 Most contemporary notions of the fairly recent concept smart mobility portray an imminent transition of similar socio economic consequences as the shift from horses to automobiles did 100 years ago Present book thus offers an in depth look at the variables involved in the equation of smart mobility acceptance 1 and envisaged institutional change 2 Both views are embedded in the Multi Level Perspective Study 1 develops a structural equation model in SmartPLS Use cases cover eBikes N 537 mobility as a service N 531 and fully automated vehicles N 558 Based on the results acceptance relies on five factors performance expectancy facilitating conditions social influence habit and hedonic motivation Study 2 applies the Institutional Role Model IRM to better

understand system dynamics Thus the smart mobility ecosystem is mapped in a structured manner It identifies nine institutions as well as four technical and four economic roles Results of interviews with experts N 8 support the IRM s significance as a vision provider for a new mobility regime In the end these two perspectives amalgamate This opens a sophisticated space for public debate about the commencing transition to smart mobility

Institutional Diversity and Political Economy Paul Dragos Aligica,2014-02 This book discusses some of the most challenging ideas emerging out of the research program on institutional diversity associated with the 2009 co recipient of 2009 Nobel Prize in economics Elinor Ostrom while outlining a set of new research directions and an original interpretation of the significance and future of this program

Climate Change and the Crisis of Capitalism Mark Pelling,David Manuel-Navarrete,Michael Redclift,2012-08-21 Are established economic social and political practices capable of dealing with the combined crises of climate change and the global economic system Will falling back on the wisdoms that contributed to the crisis help us to find ways forward or simply reconfigure risk in another guise This volume argues that the combination of global environmental change and global economic restructuring require a re thinking of the priorities processes and underlying values that shape contemporary development aspirations and policy This volume brings together leading scholars to address these questions from several disciplinary perspectives environmental sociology human geography international development systems thinking political sciences philosophy economics and policy management science The book is divided into four sections that examine contemporary development discourses and practices It bridges geographical and disciplinary divides and includes chapters on innovative governance that confront unsustainable economic and environmental relations in both developing and developed contexts It emphasises the ways in which dominant development paths have necessarily forced a separation of individuals from nature but also from society and even from self These three levels of alienation each form a thread that runs through the book There are different levels and opportunities for a transition towards resilience raising questions surrounding identity governance and ecological management This places resilience at the heart of the contemporary crisis of capitalism and speaks to the relationship between the increasingly global forms of economic development and the difficulties in framing solutions to the environmental problems that carbon based development brings in its wake Existing social science can help in not only identifying the challenges but also potential pathways for making change locally and in wider political economic and cultural systems but it must do so by identifying transitions out of carbon dependency and the kind of political challenges they imply for reflexive individuals and alternative community approaches to human security and wellbeing

Climate Change and the Crisis of Capitalism contains contributions from leading scholars to produce a rich and cohesive set of arguments from a range of theoretical and empirical viewpoints It analyses the problem of resilience under existing circumstances but also goes beyond this to seek ways in which resilience can provide a better pathway and template for a more sustainable future This volume will be of interest to both undergraduate and postgraduate students studying Human

Geography Environmental Policy and Politics *Mafia Organizations* Maurizio Catino, 2019-02-07 How do mafias work How do they recruit people control members conduct legal and illegal business and use violence Why do they establish such a complex mix of rituals rules and codes of conduct And how do they differ Why do some mafias commit many more murders than others This book makes sense of mafias as organizations via a collative analysis of historical accounts official data investigative sources and interviews Catino presents a comparative study of seven mafias around the world from three Italian mafias to the American Cosa Nostra Japanese Yakuza Chinese Triads and Russian mafia He identifies the organizational architecture that characterizes these criminal groups and relates different organizational models to the use of violence Furthermore he advances a theory on the specific functionality of mafia rules and discusses the major organizational dilemmas that mafias face This book shows that understanding the organizational logic of mafias is an indispensable step in confronting them **Dynamics of Interorganisational Collaborative Relationships** Sandra Schruijer, 2020-11-13 In all spheres of life relationships among public and private organizations are built in order to deal with complex societal problems and to address economic challenges that cannot be dealt with by single organizations Because of the interdependencies interorganizational collaboration is essential yet working across organizational boundaries is far from simple It involves a multitude of different organizations each having its own interests perspectives and identities while also varying in power and size Further the societal problems that are dealt with are often severe This volume focuses on the relational complexities of interorganizational collaboration captured by the term dynamics referring to a the social and psychological processes that occur when organizations and their representatives interact to engage in cross boundary or collaborative work e g trust and distrust intergroup stereotyping and conflict conflict avoidance inclusion and exclusion of stakeholders power dynamics as well as b the development of these processes over time in view of external and internal events and or as a consequence of deliberate interventions to enhance collaborative success The perspective put forward is largely psychological and sociological both in terms of understanding the group and intergroup processes as well as efforts to intervene to develop collaborative relationships based on action research and an organizational development approach *Governance Networks in the Public Sector* Erik Hans Klijn, Joop Koppenjan, Wouter Spekkink, Rianne Warsen, 2025-04-21 Governance Networks in the Public Sector presents a comprehensive study of governance networks and the management of complexities in network settings Public private and non profit organisations are increasingly faced with complex wicked problems when making decisions developing policies or delivering services in the public sector These activities take place in networks of interdependent actors guided by diverging and sometimes conflicting perceptions and strategies As a result these networks are dominated by cognitive strategic and institutional complexities Dealing with these complexities requires sophisticated forms of coordination network management This book provides a conceptual framework and analytical tools to study the complexities involved in handling wicked problems in governance networks in the public sector The book also discusses

strategies and management recommendations for government business and third sector organisations operating in and governing networks This second edition of the book is a truly revised edition incorporating recent developments in network governance theory and practice such as the influences of traditional and social media on network governance processes This volume is an essential text for advanced students of public management public administration public policy and political science and for public managers and policymakers The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Management Motifs Scott Grills, Robert Prus, 2018-07-24 This book examines management and management related activities as a feature of everyday life Any person or group that attempts to influence or shape the behaviors or experiences of others may be understood as engaging in management activities The study of management involves the study of achieving understanding providing direction and coordinating activities with others across an endless array of humanly engaged terrains Management Motifs provides a research agenda for an interactionist approach to the study of management activities Moving well beyond more organizationally based understandings of managers and management it examines the pragmatic accomplishment of management activities and the generic social processes that accompany them This work addresses diverse issues related to management such as holding and doing office pursuing cooperation developing policy envisioning and advocating for missions establishing teams and generating team identities sustaining team endeavors and managing self By attending to management related concerns as a generic feature of human group life the authors develop and articulate a research framework for the study of managing and management

Organizational Decision Making Zur Shapira, 2002-03-25 Decision making in organizations is often pictured as a coherent and rational process in which alternative interests and perspectives are considered in an orderly manner until the optimal alternative is selected Yet as many members of organizations have discovered from their own experience real decision processes in organizations only seldom fit such a description This book brings together researchers who focus on cognitive aspects of decision processes on the one hand and those who study organizational aspects such as conflict incentives power and ambiguity on the other It draws from the tradition of Herbert Simon who studied organizational decision making's pervasive use of bounded rationality

and heuristics of reasoning These multiple perspectives may further our understanding of organizational decision making Organizational Decision Making is particularly well suited for students and faculties of business psychology and public administration
