Understanding Actors and Processes Shaping Transgender Subjectivities Zhanar Sekerbayeva, 2023-01-01 This book introduces the policies surrounding legal gender recognition of trans people in Kazakhstan Generally the research in this sphere focuses on medical professions described as gatekeepers or judges deciding who fit the prescriptions of being a woman or a man and on trans people themselves who are often portrayed as victims However this process is more complex than only describing the interaction of these two groups or by labelling them either as gatekeepers or victims The project provides a critical approach and attempts to expand our understanding of the process the dynamics and the actors involved This study will be of interest to scholars of contemporary Kazakhstan and of feminism and LGBTQ activism more generally

How Industry Analysts Shape the Digital Future Neil Pollock, Robin Williams, 2016 Industry analysts are in the business of shaping the technological and economic future They attempt to predict what will become the next big thing to spot new emerging trends and paradigms to decide which hi tech products will win out over others and to figure out which technology vendors can deliver on their promises In just a few short years they have developed a surprising degree of authority over technological innovation Yet we know very little if anything about them This book seeks to explain how this was achieved and on what this authority rests Who are the experts who increasingly command the attention of vendor and user communities What is the nature of this new form of technical and business knowledge How Industry Analysts Shape the Digital Future offers the first book length study into this rarely scrutinized form of business expertise Contributions to this volume show how from a small group of mainly North American players which arose in the 1970s Gartner Inc has emerged as clear leader of a 6 billion industry that involves several hundred firms worldwide Through interviews and observation of Gartner Inc and other industry analyst firms the book explores how these firms create their predictions market classifications and rankings as well as with how these outputs are assessed and consumed The book asks why many social scientists have ignored the proliferation of these new forms of management and technical expertise In some cases scholars have deflated this kind of business acumen portraying it as arbitrary knowledge whose methods and content do not deserve enquiry The valuable exception here has been the path breaking work on the performativity of economic financial or accounting knowledge Drawing upon recent performativity arguments the book argues the case for a Sociology of Business Knowledge

Acta Academiae Internationalis Historiae Medicinae, Vol. 17, 2020-01-29 As periodical of the International Academy of the History of Medicine this Clio Medica volume contains 12 papers *The Changing Shape of Nursing Practice* Davina Allen, 2002-01-04 Bringing together sociological theories and nursing practice this text develops a dynamic conceptualisation of the nursing role which is rooted in the work setting It looks at the factors which have shaped nursing work in the past and those which are likely to shape it in the future Nurses work is changing in two respects the place nursing occupies in the health care division of labour and the routine shifting of work boundaries that nurses

experience in their daily work Drawing on her detailed observations of the reality of nursing work in a district general hospital Davina Allen explores these linked themes focussing on five key work boundaries nurse doctor nurse manager nurse support worker nurse patient nurse nurse The text provides new insight into many of the tensions and dilemmas nurses routinely face and the processes and constraints through which their work is fashioned It offers a new way of thinking about the nursing role which is particularly relevant at a time when the scope of nursing practice is expanding and when the integrated approach to health and social care is seen as the key to provision and improved services *The Shape of Spectatorship* Scott Curtis,2015-09-22 Scott Curtis draws our eye to the role of scientific medical educational and aesthetic observation in shaping modern spectatorship Focusing on the nontheatrical use of motion picture technology in Germany between the 1890s and World War I he follows researchers teachers and intellectuals as they negotiated the fascinating at times fraught relationship between technology discipline and expert vision As these specialists struggled to come to terms with motion pictures they advanced new ideas of mass spectatorship that continue to affect the way we make and experience film Staging a brilliant collision between the moving image and scientific or medical observation visual instruction and aesthetic contemplation *The Shape of Spectatorship* showcases early cinema s revolutionary impact on society and culture and the challenges the new medium placed on ways of seeing and learning *Wounded Profession* Arnold Birenbaum,2002-10-30 This important new study explores how American health care evolved in the 1990s as well as the changes in public support and policy Birenbaum examines where the interests of consumers and professionals have dovetailed and where they differ He considers the health care system s future and suggested ways the system must be adjusted to provide better and wider coverage at reasonable costs This volume is essential reading for scholars students and professionals in the medical field as well as general readers concerned with health care issues The 90s saw the country moving toward a realization that health care had become unaffordable or an enormous financial burden for people with otherwise adequate incomes Health care providers and consumers alike worried that the problem was becoming uncontrollable Doctors saw their autonomy and control eroded employers saw their costs rising significantly the costs began shifting to employees and alternative approaches to cost containment were explored **School of Bio and Chemical Engineering : Introduction to Biomedical Engineering Principles** Mr. Rohit Manglik,2024-04-20 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels *Surgically Shaping Children* Erik Parens,2006-05-06 Winner of an Honorable Mention in the Clinical Medicine category of the Professional and Scholarly Publishing Awards given by the Association of American Publishers At a time when medical technologies make it ever easier to enhance our minds and bodies a debate has arisen about whether such efforts promote a process of normalization which

makes it ever harder to tolerate the natural anatomical differences among us The debate becomes especially complicated when it addresses the surgical alteration or shaping of children This volume explores the ethical and social issues raised by the recent proliferation of surgeries designed to make children born with physical differences look more normal Using three cases surgeries to eliminate craniofacial abnormalities such as cleft lip and palate surgeries to correct ambiguous genitalia and surgeries to lengthen the limbs of children born with dwarfism the contributors consider the tensions parents experience when making such life altering decisions on behalf of or with their children The essays in this volume offer in depth examinations of the significance and limits of surgical alteration through personal narratives theoretical reflections and concrete suggestions about how to improve the decision making process Written from the perspectives of affected children and their parents health care providers and leading scholars in philosophy sociology history law and medicine this collection provides an integrated and comprehensive foundation from which to consider a complex and controversial issue It takes the reader on a journey from reflections on the particulars of current medical practices to reflections on one of the deepest and most complex of human desires the desire for normality Contributors Priscilla Alderson Adrienne Asch Cassandra Aspinall Alice Domurat Dreger James C Edwards Todd C Edwards Ellen K Feder Arthur W Frank Lisa Abelow Hedley Eva Fedder Kittay Hilde Lindemann Jeffery L Marsh Paul Steven Miller Sherri G Morris Wendy E Mouradian Donald L Patrick Nichola Rumsey Emily Sullivan Sanford Tari D Topolski **The Corporate Transformation of Health Care** J.
