

SHAPING THINGS

THIS BOOK IS ABOUT CREATED OBJECTS and the environment, which is to say, ~~it's a book about everything.~~ Seen from sufficient distance, this is a small topic.

The ideal readers for this book are those ambitious young souls (of any age) who want to constructively intervene in the process of technosocial transformation. That is to say, this book is for designers and thinkers, engineers and scientists, entrepreneurs and financiers, and anyone else who might care to understand why things were once as they were, why things are as they are, and what things seem to be becoming.

Shaping Things Mediaworks Pamphlets:

Shaping Things Bruce Sterling, 2005-10-07 A guide to the next great wave of technology an era of objects so programmable that they can be regarded as material instantiations of an immaterial system Shaping Things is about created objects and the environment which is to say it s about everything writes Bruce Sterling in this addition to the Mediawork Pamphlet series He adds Seen from sufficient distance this is a small topic Sterling offers a brilliant often hilarious history of shaped things We have moved from an age of artifacts made by hand through complex machines to the current era of gizmos New forms of design and manufacture are appearing that lack historical precedent he writes but the production methods using archaic forms of energy and materials that are finite and toxic are not sustainable The future will see a new kind of object we have the primitive forms of them now in our pockets and briefcases user alterable baroquely multi featured and programmable that will be sustainable enhanceable and uniquely identifiable Sterling coins the term spime for them these future manufactured objects with informational support so extensive and rich that they are regarded as material instantiations of an immaterial system Spimes are designed on screens fabricated by digital means and precisely tracked through space and time They are made of substances that can be folded back into the production stream of future spimes challenging all of us to become involved in their production Spimes are coming says Sterling We will need these objects in order to live we won t be able to surrender their advantages without awful consequences The vision of Shaping Things is given material form by the intricate design of Lorraine Wild Shaping Things is for designers and thinkers engineers and scientists entrepreneurs and financiers and anyone who wants to understand and be part of the process of technosocial transformation
