## **Shapiro Radiation Protection Paper:**

**Classic Papers in Modern Diagnostic Radiology** Adrian M.K. Thomas, Arpan K. Banerjee, Uwe Busch, 2005-09-02 I am very pleased to have been asked to write the foreword to this book The technical advances in diagnostic radiology in the last few decades have transformed clinical practice and have been nothing short of astonishing The subject of diagnostic radiology is now very large and radiology departments are involved in all areas of modern patient care The defining event in modern radiology and arguably the most significant development in radiology since Wilhelm Röntgen discovered X rays was the invention of the CT scanner in the 1970s The CT scanner introduced modern cross sectional imaging and also digital imaging We now have MRI and ultrasound and these techniques are replacing many traditional X ray procedures The developments in radiology have been the result of a fruitful interaction between the basic sciences clinical medicine and the manufacturers This can be seen by looking at the various sources of these publications Change is produced by the interactions between the various disciplines The editors have had a very difficult task in selecting the key discoveries and descriptions The radiological literature is very large Medical imaging continues to develop rapidly and these papers are the foundations of our current practice **Radiation Protection Management**, 1999 Lees' Loss Prevention in the Process Industries Frank

Lees, 2005-01-25 Over the last three decades the process industries have grown very rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport Plants have become larger and are often situated in or close to densely populated areas Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough Bhopal Chernobyl Three Mile Island the Phillips 66 incident and Piper Alpha to name but a few The field of Loss Prevention is and continues to be of supreme importance to countless companies municipalities and governments around the world because of the trend for processing plants to become larger and often be situated in or close to densely populated areas thus increasing the hazard of loss of life or property This book is a detailed guidebook to defending against these and many other hazards It could without exaggeration be referred to as the bible for the process industries This is THE standard reference work for chemical and process engineering safety professionals For years it has been the most complete collection of information on the theory practice design elements equipment regulations and laws covering the field of process safety An entire library of alternative books and cross referencing systems would be needed to replace or improve upon it but everything of importance to safety professionals engineers and managers can be found in this all encompassing reference instead Frank Lees world renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world's chief experts in this field Sam Mannan is professor of chemical engineering at Texas A principles practice codes standards data and references needed by those practicing in the field
