Handbook of Research on Advancing Teaching and Teacher Education in the Context of a Virtual Age Zimmerman, Aaron Samuel, 2022-12-28. The possibilities of the virtual age can provide many valuable resources and opportunities for teachers, preservice teachers, and teacher educators. However, in order to utilize these resources responsibly and productively, the researchers and practitioners of teaching and teacher education must better understand the new potentials and pitfalls related to teaching and learning that are present within the virtual age. The **Handbook of Research on Advancing Teaching and Teacher Education in the Context of a Virtual Age** focuses on the recent innovations in teaching and teacher education as well as innovations in the curriculum and pedagogy of teacher education. It deepens discussions related to how teacher education can address educational possibilities within this digital age. Covering topics such as learning material adaptation, teacher talent pipelines, and metaverse, this major reference work is a comprehensive resource for administrators and educators of both K-12 and higher education: teacher educators, pre-service teachers, government officials, librarians, researchers, and academicians.

America's New Map Thomas P.M. Barnett, 2023-09-26. Three tectonic and inevitable shifts have left the world at a crossroads. North America is poised to either re-emerge as a global leader or turn back in time, ceding power and influence to competitors. The 21st century unleashed unprecedented changes across the globe: to its climate, to the demographic makeup of its nations, and to the very nature of allegiance in the digital age. With its global influence waning, America must reevaluate its approach to globalization if it wishes to remain a leader. In **America's New Map: Restoring Global Leadership in an Era of Climate Change and Demographic Collapse**, Thomas P.M. Barnett, bestselling author of *The Pentagon's New Map: War and Peace in the Twenty-First Century* and acclaimed geo-strategist, offers seven throughlines to frame and redefine the ambitions and posture of these United States, setting our Union on a bold but entirely familiar national trajectory. In these pages, Barnett offers a deep yet accessible dive into the three shifts that have led us to this point. As climate change ravages countries closest to the equator, global dynamics are shifting from an East-West emphasis to North-South in the greatest geopolitical transformation our world has

yet experienced and the Western Hemisphere is far better positioned to exploit this radical reorientation than the East. Aging demographics worldwide favor more slowly aging nations including the US while challenging rapidly aging nations like China. Incentivizing countries best to delay that transition by integrating younger faster growing populations into their ranks. In combination these two tectonic forces collide with a third the exploding consumption of an expanding and now majority global middle class the bulk of whom reside along the increasingly unstable North South frontier. Taking every variable of these unique circumstances into account America's New Map charts a path toward a bigger and better United States. We will all be living in somebody's world come mid century this book tells Americans how to make sure it is one we can recognize as our own.

Kyle, 2019-05-16 This book is an attempt to address two struggles for theistic educators e.g. those who approach their educational vocation from a religious perspective whether they are working in secular or faith based institutions The first struggle is that while numerous guidelines on teaching excellence have been compiled the resulting checklists can contain more than a hundred criteria to consider This book therefore identifies the evidence based guidelines that are likely to have the highest impact on student achievement thereby empowering educators to focus their efforts in more substantial ways The second struggle is related to the lack of resources which can help educators to view and approach their vocation from a theistic perspective While there are texts that discuss the relationship of spirituality and or theology to education few to date have sought to bring evidence based educational literature into dialogue with the western Christian tradition and thereby develop a bottom up theology of

education This book addresses this historical and theological gap Overall this book is therefore intended to not only provide theistic educators with high impact guidelines that can significantly improve the quality of education in their school systems but it also strives to do so from a thoroughly theistic perspective
