Helping Children Live With Death and Loss Dinah Seibert, 2003 Digital Life Together David I. Smith, Kara Sevensma, Marjorie Terpstra, Steven McMullen, 2020-05-05 Digital technologies loom large in the experience of today's students. However, parents, teachers, and school leaders have only started to take stock of the ramifications for teaching learning and faith. Based on a three-year in-depth study of Christian schools, *Digital Life Together* walks educators, school leaders, and parents through some of the big ideas that are hidden in our technology habits, going beyond general arguments for or against digital devices to address the nuanced realities of Christian education in a twenty-first century context.

The standards and guidelines would be incorporated into eight BLM resources management plans (RMP) that cover approximately 13.5 million acres. In addition, for each alternative, there are existing land use decisions that are in conformance with the standards. These decisions would be changed to bring them into conformance. poles with all the tension between them mark Rousseau's work vision and challenge the challenge of 21st century democracy

Missing Us Ryan LaMothe, 2013-05-09 In *Missing Us* Re-Visioning Psychoanalysis from the Perspective of Community Ryan LaMothe questions the ways in which psychoanalytic and psychodynamic theorists and clinicians have historically relied principally on a two person psychology to understand psychosocial development and practice While this has many benefits two person perspectives often overlook a central need and struggle in human life namely community The concept of community and its cognate communion expand and deepen psychoanalytic theories of development as well as reframe in part psychoanalytic concepts processes and aims In *Missing Us* LaMothe relying on the

Life / Afterlife Suzanne Lye, 2024 Life Afterlife Revolution and Reflection in the Ancient Greek Underworld from Homer to Lucian explores the mechanics function and impact of ancient Greek Underworld scenes a unique and ancient form of embedded storytelling appearing across time and genres This book approaches Underworld scenes as a special register of language that acts as a narrative space outside of chronological time to reflect on important themes and issues in a frame narrative This book argues that Underworld scenes use hypertextual poetics to embed authorial commentary by creating networks of texts that act as para narratives which provide additional information to engage audiences in the interpretative process of a given work Life Afterlife traces the development evolution and application of Underworld scenes through the works of such authors as Homer Hesiod Pindar Aeschylus Aristophanes Plato Vergil and Lucian to show how each used afterlife depictions featuring mythic and historical figures as commentaries to communicate a call to action for their audiences in response to cultural religious and political changes in their worlds Using the network of Underworld scenes authors could reinforce and challenge traditional religious and cultural beliefs and practices by presenting the long term cosmic effect of actions in life on an individual's post death experience From ancient to modern times Underworld scenes have helped authors and audiences define the essential qualities of a good life for different social political and religious groups and their societies

Imposed Rationality and Besieged Imagination Gustavo Pereira, 2019-10-24 Social pathologies are social processes that hinder how individuals exercise their autonomy and freedom In this book Gustavo Pereira offers an account of such phenomena by defining them as a cognitive failure that affects the practical imagination thus negatively interfering with our practical life This failure of the imagination is the consequence of the imposition of a type of practical rationality on a practical context alien to it caused by a non conscious transformation of the individuals set of beliefs and values The research undertaken provides an innovative explanation in terms of microfoundations based on the mechanism of availability heuristic by which the diminished exercise of the imagination turns the intuitively available or prevailing rationality into the one that regulates behaviour in inappropriate contexts Additionally this incorrect regulation results in a progressive distortion of the shared sense of the affected practical contexts which becomes institutionalized Consumerism bureaucratism moralism juridification some forms of corruption and the particular Latin American case of malinchism can be interpreted as social

pathologies insofar as they imply such distortion This way of conceptualizing social pathologies integrates the traditional sociological macro explanation manifested through the negative consequences of the processes of social rationalization with a micro explanation articulated around the findings of cognitive psychology such as availability heuristic Understanding social pathologies as a cognitive failure allows us to identify the introduction of normative friction as the main way to counteract their effects One of the potential effects of normative friction as a specific form of cognitive dissonance is the intense exercise of the imagination thus operating as a condition of possibility for the exercise of autonomy and reflection Democratic ethical life understood as a shared democratic culture as well as social institutions and narratives are the privileged social spaces and means to trigger reflective processes that can counteract social pathologies through a reflective reappropriation of the meaning of the shared practical context An extraordinary contribution by a Critical Theorist to the return of the concept of imagination today It takes up the challenge once taken by Kant to think about imagination as the pivotal activity not only of knowledge and experience but above all for action The author claims that imagination makes criticism possible pathologies and it allows us to envision alternative views into the path for social transformation Without imagination nothing is possible Mar a P a Lara Universidad Aut noma Metropolitana Iztapalapa Mexico *Essays on the Doctrinal Study of Law* Aulis Aarnio,2011-07-10 *Essays on the Doctrinal Study of Law* is a summary of the author s 40 years of research in the fields of civil law and the philosophy of law The main focus is on the two main tasks in the doctrinal study of law the interpretation and systematisation of legal norms In this regard Professor Aarnio deals with the theory of argumentation as well as with its foundations i e with the ontology epistemology and methodology of legal thinking and develops the ideas that were first presented in *The Rational as Reasonable* Kluwer 1987 in all of these dimensions The work includes an updated discussion on the writings of Robert Alexy J rgen Habermas Ronald Dworkin and Alf Ross A focal point of view concerns the distinction between positivism and non positivism in which the core of the criticism focuses on Scandinavian realism

academic enquiry and theory but also provides a narrative through which the movement can be understood by the more general interested reader **A Different Touch** Judith A. Merkle, 1998 A Different Touch speaks of the challenges of religious life today where the essentials of Christian living and union with God are still sought via a different touch The book looks at the relationship of Christian lifestyle and the place of religious life in the matrix of Christian living and then comments individually on the traditional vows of religious life A section on new times for poverty obedience and celibacy relates each vow to current cultural and socio political issues *Representation and Reality in Humans, Other Living Organisms and Intelligent Machines* Gordana Dodig-Crnkovic, Raffaella Giovagnoli, 2017-08-29 This book enriches our views on representation and deepens our understanding of its different aspects It arises out of several years of dialog between the editors and the authors an interdisciplinary team of highly experienced researchers and it reflects the best contemporary view of representation and reality in humans other living beings and intelligent machines Structured into parts on the cognitive computational natural sciences philosophical logical and machine perspectives a theme of the field and the book is building and presenting networks and the editors hope that the contributed chapters will spur understanding and collaboration between researchers in domains such as computer science philosophy logic systems theory engineering psychology sociology anthropology neuroscience linguistics and synthetic biology **Encyclopedia of Social Work** , 1965
