Shared Decision Making In The Patientphysician Relationship Challeng

**Dennis John Mazur, American College
of Physician Executives**

Shared Decision Making In The Patientphysician Relationship Challeng:

Shared Decision Making in the Patient-physician Relationship Dennis John Mazur,American College of Physician Executives,2001-01-01 **The New Medical Conversation** Dennis John Mazur,2003 The New Medical Conversation succinctly and effectively brings together a range of relevant perspectives It outlines the tensions and opportunities that exist for physicians who seek to discuss risk matters effectively with their patients It explores the current contexts of patient safety individual rights to treatments or information the legal requirements of informed consent the ethical perspectives and the constraints on patients and professionals in seeking to achieve greater shared understanding about treatments and care choices Mazur explores the way physicians can effectively discuss relevant information with their patients using appropriate information messages being aware of the pitfalls of framing manipulations and seeking to enhance both global and specific areas of understanding In so doing Dr Mazur is showing how we can meet the requirements of modern consumerist health care and yet also maintain the essential and supportive qualities of physicians conversing with their patients Adrian Edwards University of Wales College of Medicine Llanedeyrn Health Center **Collaborative Decision Making: Perspectives and Challenges** P. Zaraté,J.P. Belaud,G. Camilleri,2008-06-13 This publication presents the latest innovations and achievements of academic communities on Decision Support Systems DSS These advances include theory systems computer aided methods algorithms techniques and applications related to supporting decision making The aim is to develop approaches for applying information systems technology to increase the effectiveness of decision making in situations where the computer system can support and enhance human judgements in the performance of tasks that have elements which cannot be specified in advance Also it is intended to improve ways of synthesizing and applying relevant work from resource disciplines to practical implementation of systems that enhance decision support capability The resource disciplines include information technology artificial intelligence cognitive psychology decision theory organizational theory operations research and modeling Researchers come from the Operational Research area but also from Decision Theory Multicriteria Decision Making methodologies Fuzzy sets and modeling tools Based on the introduction of Information and Communication Technologies in organizations the decisional process is evolving from a mono actor to a multi actor situation in which cooperation is a way to make the decision Ethical Challenges in Oncology Colleen Gallagher,Michael Ewer,2017-06-23 Ethical Challenges in Oncology Patient Care Research Education and Economics covers a wide variety of topics and viewpoints about ethical issues that arise in oncology throughout the full cancer care continuum This book provides a holistic view on oncology ethics incorporating the knowledge and expertise of authors from various departments and oncology specialties within the University of Texas MD Anderson Cancer Center The first section focuses on the ethical issues associated with treating cancer patients Next the ethical challenges associated with oncology research including funding regulation subject selection and the big picture are explored The third section covers ethical issues associated with education in oncology as it reflects

both past and future trends in developing proficient health care providers patients and even executives Final sections concentrate on the ethical dilemmas associated with the economic repercussions of oncology offering thoughts on how to alleviate the ethical consequences that can arise from the global effects of cancer and cancer treatment Each chapter includes discussion topics answers pertinent questions and provides an ethical framework for problem solving in each scenario The topics uncover the ethical apprehensions and problems associated with oncology research and practice in order to determine best practices as well as provide guidance for all parties involved Offers a diverse range of topics and viewpoints about ethical issues that arise in oncology Provides direction by bringing real issues to the forefront Contains a truly ethical approach on problems as broad as research finance appropriateness of care and professional education

Responsibility, Ethics, and Biases Johnson, Christen D.,Robertson, Michael John,2025-04-11 Addressing health disparities in medical education is crucial to ensuring equitable patient care and reducing systemic biases in healthcare Traditional teaching methods often unintentionally reinforce stereotypes which can perpetuate inequities rather than dismantle them By incorporating frameworks that promote introspection and cultural responsibility educators can help future healthcare professionals recognize and address their implicit biases This approach fosters a more inclusive and ethical medical practice ultimately improving health outcomes for historically marginalized communities Cases on Physician Cultural Responsibility Ethics and Biases provides material for instructors utilizing Physician Cultural Responsibility PCR within the classroom It encompasses cases around multiple different areas of identity equitable care ethical issues and the impact of physician

burnout Covering topics such as gender and sexual orientation patient physician relationships and stigma this book is an excellent resource for physicians medical professionals social justice advocates professionals researchers scholars academicians and more *Challenges and Solutions in Patient-Centered Care* Judith Belle Brown, Wayne Weston, Moira Stewart, 2018-08-11 Series Editors Moira Stewart Judith Belle Brown and Thomas R Freeman The application of the patient centered clinical method has received international recognition This book introduces and fully examines the patient centered clinical method and illustrates how it can be applied in primary care It presents case examples of the many problems encountered in patient doctor interactions and provides ideas for dealing with these more effectively It covers a wide range of topics and issues including palliative care abuse dying patients ethical challenges and the role of self awareness Many narratives originate from patients and family members experiences providing perspectives of great power and value The Patient Centered Care series is of great value to all health professionals teachers and students in primary care **Artificial Intelligence in Clinical Practice** Chayakrit Krittanawong, 2023-09-13 Artificial Intelligence in Clinical Practice How AI Technologies Impact Medical Research and Clinics compiles current research on Artificial Intelligence within medical subspecialties helping practitioners with diagnosis clinical decision making disease prediction prevention and the facilitation of precision medicine The book defines the basic concepts of big data and AI in medicine and highlights current applications challenges ethical issues and biases Each chapter discusses AI applied to a specific medical subspecialty including primary care preventive medicine general internal medicine radiology pathology infectious disease gastroenterology cardiology hematology oncology dermatology ophthalmology mental health neurology pulmonary critical care rheumatology surgery and OB GYN This is a valuable resource for clinicians students researchers and members of medical and biomedical fields who are interested in learning more about artificial intelligence technologies and their applications in medicine Provides the history and overview of the various modalities of AI and their applications within each field of medicine Discusses current AI based medical research including landmark trials within each field of medicine Addresses the current knowledge gaps that clinicians commonly face that prevent the application of AI based research to clinical practice Encompasses examples of specific cases and discusses challenges and biases associated with AI Ethical Challenges for Healthcare Practices at the End of Life: Interdisciplinary Perspectives Anna-Henrikje Seidlein, Sabine Salloch, 2022-01-18 This book presents a collection of exclusively selected manuscripts on current ethical controversies related to professional practices from an interprofessional perspective Insights are provided into the diversity of practices and viewpoints from different countries are merged in a unique way The book contributes to the debate on social and legal issues regarding end of life practices such as organ donation medically assisted dying and advance care planning In addition joint international author groups contributed exclusive chapters about European comparisons on end of life topics The focus on country and culture specific aspects broadens the view on key issues and makes the book attractive for an international readership The variety of approaches and

methods used informs and inspires the development of new research and best practice projects

Compelling Ethical Challenges in Critical Care and Emergency Medicine Andrej Michalsen, Nicholas Sadovnikoff, 2020-07-22 This book addresses the ethical problems that physicians have to face every day while caring for critically ill patients Advances in medical technology ageing societies worldwide and their increased demands on health care systems have on the one hand led to better care and remarkable longevity in many parts of the world On the other hand however improved treatments in many medical fields amongst others in emergency and critical care have resulted in more patients surviving with reduced quality of life This entails tradeoffs for many patients their families and the teams caring for them At the same time health care expenditures have risen dramatically and have to be balanced against costs for other public goods Finally the humane aspects of care have often failed to keep pace with the remarkable technological strides made in recent years In this book experts in their respective fields describe compelling ethical challenges resulting from these discrepancies and discuss potential solutions The book is primarily intended for clinicians who care for two of the most vulnerable patient subpopulations those being treated in ambulances or emergency rooms and those being treated at intensive care units due in part to the fact that they may be temporarily or permanently incapacitated Core medical skills such as diagnosis and predicting outcomes as well as implementing treatment remain challenging However without adequate communication and collaboration both within the inter professional treatment teams and between the teams and the patients their families delivering excellent care is difficult at best Therefore the so called soft skills are given the attention they deserve in order to overcome the gap between technological progress and interpersonal standstill

[Handbook of Health Decision Science](#) Michael A. Diefenbach, Suzanne Miller-Halegoua, Deborah J.
