Shared Lives:

Shared Lives Roy McConkey, John Dunne, Nick Blitz, 2009-01-01 Written by three authors who combine a wealth of expertise as researchers clinicians and practitioners this challenging book presents a renewed vision for the support of people with intellectual disabilities Its primary focus is the positive contributions that people with an intellectual disability can make to the lives of others and to their wider communities if given the opportunity Many real life examples are given Central to this is the nurturing of mutual relationships between people and their supporters be they paid workers community volunteers or family members Also explored is how people can come together in supportive communities that enrich and extend their experiences of life The building of alliances and the creation of partnership working across different organisations are essential to this The emphasis is on the role of the paid supporter which is still critical in the lives of many people but smaller community based networks of support with a shared vision of inclusive societies are seen to be the hallmark of modern service systems This book is refreshingly different and has a remarkable feel good quality It is essential reading for those striving to build person centred services

Shared Housing, Shared Lives Sue Heath, Katherine Davies, Gemma Edwards, Rachael Scicluna, 2017-10-25 With a growing population rising housing costs and housing providers struggling to meet demand for affordable accommodation more and more people in the UK find themselves sharing their living spaces with people from outside of their families at some point in their lives Focusing on sharers in a wide variety of contexts and at all stages of the life course Shared Housing Shared Lives demonstrates how personal relationships are the key to whether shared living arrangements falter or flourish Indeed this book demonstrates how issues such as finances domestic space and daily routines are all factors which can impact upon personal relationships and wider understandings of the home and privacy By directing attention towards people and relationships rather than bricks and mortar Shared Housing Shared Lives is essential reading for students and researchers in fields such as sociology housing studies social policy cultural anthropology and demography as well as for researchers and practitioners working in these areas

Shared Lives of Humans and Animals Tuomas Räsänen, Taina Syrjämaa, 2017-04-21 Animals are conscious beings that form their own perspective regarding the lifeworlds in which they exist and according to which they act in relation to their species and other animals In recent decades a thorough transformation in societal research has taken place as many groups that were previously perceived as being passive or subjugated objects have become active subjects This fundamental reassessment first promoted by feminist and radical studies has subsequently been followed by spatial and material turns that have brought non human agency to the fore In human animal relations despite a power imbalance animals are not mere objects but act as agents They shape our material world and our encounters with them influence the way we think about the world and ourselves This book focuses on animal agency and interactions between humans and animals It explores the reciprocity of human animal relations and the capacity of animals to act and shape human societies The chapters draw on examples from

the Global North to explore how human life in modernity has been and is shaped by the sentience autonomy and physicality of various animals particularly in landscapes where communities and wild animals exist in close proximity It offers a timely contribution to animal studies environmental geography environmental history and social science and humanities studies of the environment more broadly **Foreign Echoes: Exploring New Worlds and Shared Lives** Pasquale De

[Adult social care](#) Great Britain: Law Commission, 2011-05-11 This report on Adult Social Care recommends the most far reaching reforms of adult social care law seen for over 60 years Under the proposals older people disabled people those with mental health problems and carers will for the first time be clear about their legal rights to care and support services And local councils across England and Wales will have clear and concise rules to govern when they must provide services Since the National Assistance Act 1948 adult social care law has been the subject of countless piecemeal reforms including new Acts of Parliament and a constant stream of regulations circulars directions approvals and guidance The proliferation of law has led to inefficiency in the system Complex law also has the effect of stifling innovation and make it difficult to promote flexibility and new policy approaches in practice The report is divided into twelve Parts Part 2 defines adult social care and Part 3 the structure of reform adopted Parts 4 through to 8 set out core recommendations Part 4 considers the role of statutory principles in providing an overall framework for decision making Part 5 covers the role of community care assessments in determining a person's needs Part 6 considers eligibility for services Part 7 explores the equivalent assessment and eligibility processes for carers and Part 8 considers the provision of services Part 9 considers local authority adult protection functions Finally Parts 10 to 12 consider other issues including ordinary residence and portability areas where adult social care overlaps with other areas of law and other outstanding issues *A New Health and Care System* Alex Fox, 2018-02-28 How do we find sustainable and human ways to care for people with long term needs This book reveals the ways in which public services squander the potential of people with long term support needs and the creativity and caring capacity of front line workers Drawing on the ethos practices and economics of human focused initiatives such as Shared Lives this book outlines a new model for public services to replace the invisible asylum This approach focused on achieving and maintaining wellbeing rather than on reacting to crisis or attempting to fix people would both ask of us and offer us more Responsibilities resources and risks would be more fairly and transparently shared The book offers steps which we all citizens front line services and government could take to achieve this vision [A-Z of Learning Disability](#) Angela Olsen, Dan Redfearn, Andrea Pepe, 2017-09-16 If you are looking for an incisive overview of current thinking and practice in the field of learning disabilities then this is the book for you Written by a highly experienced team of authors this handy pocket sized guide succinctly captures the fundamental ideas in policy and practice that currently dominate the field of learning disabilities With a strong grounding in ethics and values the book focuses on the experience of people with learning disabilities through examination of topics such as discrimination communication and assistive technology as well as

Global Aging and Its Challenge to Families Vern L. Bengtson, Ariela Lowenstein, The recent explosion in population aging across the globe represents one of the most remarkable demographic changes in human history There is much concern about population aging and its consequences for nations for governments and for individuals It has often been noted that population aging will inevitably affect the economic stability of most countries and the policies of most state governments What is less obvious but equally important is that population aging will profoundly affect families Who will care for the growing numbers of tomorrow s very old members of societies Will it be state governments The aged themselves Their families The purpose of this volume is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future Four remarkable social changes during the past fifty years are highlighted

- 1 Extension of the life course A generation has been added to the average span of life over the past century
- 2 Changes in the age structures of nations Most nations today have many more elders and many fewer children than fifty years ago
- 3 Changes in family structures and relationships Some of these differences are the result of trends in family structure notably higher divorce rates and the higher incidence of childbearing to single parents
- 4 Changes in governmental responsibilities In the last decade governmental responsibility appears to have slowed or reversed as states reduce welfare expenditures How will families respond to twenty first century problems associated with population aging Will families indeed be important in the twenty first century or will kinship and the obligations across generations become increasingly irrelevant replaced by personal communities This volume goes a considerable distance to answer these critical issues for the twenty first century

Vern L Bengtson is an AARP University Chair in Gerontology and Professor of Sociology University of Southern California Ariela Lowenstein is associate professor and head Department of Aging Studies University of Haifa Israel

The Five Health Frontiers Christopher Thomas, 2022-01-20 A brilliant expos Danny Dorling Covid 19 has exposed the limits of a neoliberal public health orthodoxy But instead of imagining radical change the left is stuck in a rearguard action focused on defending the NHS from the wrecking ball of privatisation Public health expert Christopher Thomas argues that we must emerge from Covid 19 on the offensive with a bold new vision for our health and care He maps out five new frontiers for public health and imagines how we can move beyond safeguarding what we have to a radical expansion of the principles put forward by Aneurin Bevan the founder of the NHS over 70 years ago Beyond recalibrating our
