Sharing Power Grazia Borrini-Feyerabend, M. Taghi Farvar, Yves Renard, Michel Pimbert, Ashish Kothari, Yves Renard with Hanna Jaireth, Marshall Murphree, Vicki Pattemore, Ricardo Ramírez, Patrizio Warren, 2013-09-13 The collaborative orco management of natural resources whether between states and local communities or amongst and within communities themselves is a process of collective understanding and actions to bring about negotiated agreements on roles rights and responsibilities for decentralized governance of natural resources At heart co management is about sharing power one of the most difficult but rewarding experiences in personal and social life The book is designed for professionals and people involved in practical co management processes and distils a wealth of experience and innovative approaches learned by doing It begins by offering a variety of vistas from historical analyses to a clear grasp of key concepts Illustrated in detail is the understanding accumulated in recent decades on starting points for co management conditions and methods for successful negotiations ideas to manage conflicts and types of agreements and co management institutions emerging from the negotiation tables Simple tools such as checklists distilled from different situations and contexts are offered throughout Examples and insights from experience highlight the importance of participatory democracy the enabling contexts where sharing power is ultimately possible and successful Published with IIED and IUCN *Sharing Power?* Patrick Porter, 2013 The subject of U S grand strategy has been getting increasing attention from the policy and academic communities However too often the debate suffers from being too reductionist limiting America s choices to worldwide hegemony or narrow isolation There is a wide spectrum of choices before Washington that lie somewhere in the middle Frequently not enough thought is given to how such alternative strategies should be designed and implemented The future cannot be known and earlier predictions of American decline have proven to be premature However there is a shift in wealth and power to the extent that America may not be able to hold on to its position as an unrivaled unipolar superpower Therefore it is worth thinking about how the United States could shape and adjust to the changing landscape around it What is more there are a number of interlocking factors that mean such a shift would make sense transnational problems needing collaborative efforts the military advantages of defenders the reluctance of states to engage in unbridled competition and hegemony fatigue among the American people Alternative strategies that are smaller than global hegemony but bigger than narrow isolationism would be defined by the logic of concerts and balancing in other words some mixture of collaboration and competition Can the United States adjust to a concert balance grand strategy that made space for other rising powers without sacrificing too much of its forward military presence without unleashing too much regional instability and without losing the domestic political will It is not certain that a cumulative shift to a new grand strategy would necessarily succeed since other powers might turn down the chance to cooperate But with soaring budget deficits and national debt increasing burdens on social security and possible agonizing choices in the future between guns and butter it is surely worth a try

Peacebuilding in Crisis Tobias Debiel,Thomas Held,Ulrich Schneckener,2016-01-29 The 1990s saw a constant increase in international peace missions predominantly led by the United Nations whose mandates were more and more extended to implement societal and political transformations in post conflict societies However in many cases these missions did not meet the high expectations and did not acquire a sufficient legitimacy on the local level Written by leading experts in the field this edited volume brings together liberal and post liberal approaches to peacebuilding Besides challenging dominant peacebuilding paradigms the book scrutinizes how far key concepts of post liberal peacebuilding offer sound categories and new perspectives to reframe peacebuilding research It thus moves beyond the liberal post liberal divide and systematically integrates further perspectives paving the way for a new era in peacebuilding research which is theory guided but also substantiated in the empirical analysis of peacebuilding practices This book will be essential reading for postgraduate students and scholar practitioners working in the field of peacebuilding By embedding the subject area into different research perspectives the book will also be relevant for scholars who come from related backgrounds such as democracy promotion transitional justice statebuilding conflict and development research and international relations in general *GIST OF NCERT Polity Classwise Class 6-12 (9 Books in 1)* Mocktime

Handbook of Africa's International Relations Tim Murithi, 2013-09-05 Africa's international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day In the aftermath of colonialism the Cold War became a dominant paradigm that defined the nature of the continent's relationship with the rest of the world The contemporary forces of globalization are now exerting an undue influence and impact upon Africa's international relations Increasingly the African continent is emerging as a vocal and in some respects an influential actor in international relations There is a paucity of analysis and research on this emerging trend This timely book proposes to fill this analytical gap by engaging with a wide range of issues with chapters written by experts on a variety of themes The emerging political prominence of the African continent on the world stage is predicated on an evolving internal process of continental integration In particular there are normative and policy efforts to revive the spirit of Pan Africanism the 21st century is witnessing the evolution of Pan Africanism notably through the constitution and establishment of the African Union AU Given the fact that there is a dearth of analysis on this phenomenon this volume will also interrogate the notion of Pan Africanism through various lenses notably peace and security development the environment and trade The volume will also engage with the emerging role of the AU as an international actor e.g. with regard to its role in the reform of the United Nations Security Council climate change the International Criminal Court ICC the treaty establishing Africa as a nuclear free zone Internally Displaced Persons the Millennium Development Goals MDGs international trade the environment public health issues security and development issues This book will assess how the AU's role as an international actor is

complicated by the difficulty of promoting consensus among African states and then maintaining that consensus in the face of often divergent national interests This book will in part assess the role of the AU in articulating collective and joint policies and in making interventions in international decision and policy making circles The Handbook will also assess the role of African social movements and their relationship with global actors The role of African citizens in ameliorating their own conditions is often underplayed in the international relations discourse and this volume will seek to redress this oversight Throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization
