Sharing The World Sustainable Living And Global Equity In The 21st Century:

Sharing the World Michael Carley, Phillipe Spapens, 2017-09-25 This work proposes a framework based on the concept of a fair distribution of environmental space to include the diverse needs of North and South Drawing on research in 38 countries it aims to give an equitable basis for global development in order to achieve sustainable consumption by the year 2050 The environmental space approach seeks to explain the limitations of the global market economy as a tool of development and to give us the means to alter it in order to achieve a genuine quality of life rather than simple economic growth In addition this book seeks to urge all countries and peoples to consider and evaluate the environmental space approach and to join in a movement towards sustainable production and consumption for the 21st century **Sustainable Cities Revisited - 7055** **ied** International Institute for Environment & Development, 1998 The Environment and Social Policy Michael Cahill, 2018-10-24 Focusing on human welfare and the environment from a social policy perspective this text shows how environmental concerns are becoming increasingly central to policy making and discusses the roles of central and local government in relation to environmental issues The Environment and Social Policy covers the following contemporary topics sustainability Local Agenda 21 green ideas environmental health housing and urban development food work globalisation Each chapter starts with an overview of the topics and ends with a list of key points and a guide to further reading Core concepts are clearly explained and illustrated throughout this text which provides students with a concise and up to date summary of what they need to know *Ibss: Economics: 1999* Compiled by the British Library of Political and Economic Science, 2000-12-07 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences *Environment, Capitalism & Socialism* ,1999 Our planet is gripped by twin crises of the most fundamental nature social mass poverty austerity militarism etc and environmental In this document the Democratic Socialist Party argues that they spring from the same cause the capitalist system which places the ruthless pursuit of profit by the few before the needs of the vast majority of humanity Environment Capitalism and Socialism provides a comprehensive overview of the environmental crisis the various explanations advanced for it and the responses to it The document argues strongly for the need to build a mass popular movement to fight corporate planet wreckers and create a socialist order in which human beings will be in harmony with their environment Included here as an appendix is editor Dick Nichols thorough critique of so called green taxation often put forward as the answer to the crisis Provided by publisher City-Region 2020 Joe Ravetz, 2016-05-13 Based on analysis of the Manchester city region this book offers a vision of a sustainable urban future through integrated strategic management of the entire city region It translates principles into practice for achieving the necessary balance to ensure a higher standard of living and safe environment The text presents a 25 year horizon for the evolution and restructuring of the urban system a focus for linkages and synergies between economic social and

environmental sectors technical scenarios for land use energy and material flows spatial scenarios for each area and settlement type and lateral thinking on cultural information localization and globalization trends Also included are practical actions methods and tools such as sustainability indicators and appraisals that can be applied anywhere in the western world

Environment and Tourism , **The Oxford Handbook of U.S. Environmental Policy** Sheldon Kamieniecki, Michael Kraft, 2012-10-10 Prior to the Nixon administration environmental policy in the United States was rudimentary at best Since then it has evolved into one of the primary concerns of governmental policy from the federal to the local level As scientific expertise on the environment rapidly developed Americans became more aware of the growing environmental crisis that surrounded them Practical solutions for mitigating various aspects of the crisis air pollution water pollution chemical waste dumping strip mining and later global warming became politically popular and the government responded by gradually erecting a vast regulatory apparatus to address the issue Today politicians regard environmental policy as one of the most pressing issues they face The Obama administration has identified the renewable energy sector as a key driver of economic growth and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades The Oxford Handbook of U S Environmental Policy is a state of the art work on all aspects of environmental policy in America Over the past half century America has been the world s leading emitter of global warming gases However environmental policy is not simply a national issue It is a global issue and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level The book therefore focuses not only on the U S but on the increasing importance of global policies and issues on American regulatory efforts This is a topic that will only grow in importance in the coming years and this handbook serves as an authoritative guide to any scholar interested in the issue *Environment and Tourism* Andrew Holden, 2000 Considers the relationship that exists between tourism society and the environment It discusses how the tourism industry markets environments and suggests ways in which the economics of tourism can be adopted to aid conservation *Global change situations* Kirill I A Kovlevich Kondrat'ev, Ignacio Galindo, 2001 A bilingual edition of economic analysis of recent changes in a globalized world with focus on ecological trends and natural resources **Environmental Integration** Ton Bührs, 2009-04-09 The environmental challenges facing humankind can most effectively be met through environmental integration incorporating environmental considerations into everyday human thinking behavior and practices at both the individual and collective levels Increasingly people and organizations throughout the world are taking the environment into account but at the same time there is insufficient integration of attitudes policies and programs People and groups have different and often conflicting views and interpretations of what is desirable or required to protect the environment Environmental Integration looks at the ways that governments can play a crucial role in advancing promoting and shaping a singular integrated environmental policy **Scotland: the Challenge of Devolution** Alex Wright, 2018-02-06 This title was first published in

2000 Linking politics with culture and society this collection provides an overview of the Scottish Parliament and analyzes it in relation to UK European and global regionalization Land and Limits Susan Owens, Richard Cowell, 2011-03-17 The first edition of this seminal book was written at a time of rapidly growing interest in the potential for land use planning to deliver sustainable development and explored the connections between the two and implications for public policy In the decade since the book was first conceived environmental imperatives have risen still further up the political agenda and land use conflicts have intensified lending even greater importance to the authors research In a rigorous discussion of concepts policy instruments and contemporary planning dilemmas the authors challenge prevailing assumptions about planning for sustainability After charting the remarkable growth in expectations of planning they show how attempts to interpret sustainability must lead to fundamental moral and political choices **Environmental Justice** Paul Thompson, 2017-09-29 Environmental justice is one of the most controversial and important issues in contemporary social science Volume 8 of the Energy and Environmental Policy series challenges our understanding of environmental justice in a global context It includes theoretical investigations and case studies by leading authors in the field Global forces of technology and the development of global markets are transforming social life and the natural order These changes require a critical examination of nature society relations Increasingly modernization assigns the risks of modernity to those with the least power and greatest vulnerability to environmental harm Conventional environmentalism which focuses on critique of the effects of humanity against nature is inadequate to the challenges of globalization In particular it fails to explain sources of persistent patterns of social injustice that accompany escalating environmental exploitation As the capacity for environmental destruction expands broader concerns about environmental injustice have come to the fore including awareness of threats to whole cultures ways of life and entire ecologies The volume's authors consider the links between expanded patterns of environmental injustice and the structures and forces underlying and shaping the international political economy Environmental injustice is examined across a variety of cultures in the developed and developing world Through case studies of climate colonialism revolutionary ecology and environmental commodification the global and local dimensions of the problem are presented The latest volume in this important series demonstrates that environmental justice cannot be reduced to simple parables of indifference prejudice or appropriation It forges understanding of environmental injustice as a development of international political economy itself Likewise initiatives on behalf of environmental justice are seen as elements of broader movements to secure self determination in a globalizing world This book will be of interest to policymakers energy and environmental experts and all those interested in the environment and environmental law It provides new perspectives on the place of environmental justice in international political and economic conflict Tourism Planning and Development in Western Europe Konstantinos Andriotis, Carla Pinto Cardoso, Dimitrios Styliadis, 2022-03-11 For many decades Western European countries have undertaken diverse pathways in tourism development and planning Most have experienced fast or even

unlimited growth resulting in overtourism and now the introduction of policies that respect the limits of communities and the sustainability of their resources Focusing exclusively on tourism development planning and policy this book draws together new voices to discuss issues across Belgium Denmark Faroe Islands Finland France Germany Greenland Iceland Ireland Italy Malta Norway Portugal Spain Sweden and the UK An invaluable collection for policy makers researchers and academics this book is also an insightful source of engaging contemporary case studies for use in the classroom Integrating Environment and Economy Andrew Gouldson, Peter Roberts, 2002-01-22 Integrating Environment and Economy provides a detailed and accessible examination of how integrated approaches enable economic and social activities to support environmental objectives This is a key text for the many taught Masters courses covering the issues of environmental management and economic development Features of the book covers strong areas of undergraduate and postgraduate study detailed practice based case studies at both local and regional levels up to date theory using real life examples **Energy, Society and Environment** David Elliott, 2004-03 Uses global case studies to examine technological solutions to energy related environmental problems and suggests that social economic and political solutions may be needed to avoid serious future environmental damage Spaces of Mobility Sigurd Bergmann, Thomas A. Hoff, Tore Sager, 2014-12-18 Human mobility is dramatically on the rise globalization and modern technology have increased transportation and migration Frequent journeys over large distances cause huge energy consumption severely impact local and global natural environments and raise spiritual and ethical questions about our place in the world Spaces of Mobility presents an analysis of the socio political environmental and ethical aspects of mobility The volume brings together essays that examine why and how modern modes of transport emerge considering their effect on society The religious significance of contemporary travel is outlined namely its impact on pilgrimage Christology and ethics The essays examine the interaction between humans and their surroundings and question how increased mobility affects human identity and self understanding Spaces of Mobility will be of interest to students and scholars seeking to understand the impact of mobility on modern culture and society the ethics behind contemporary transport systems and the conditions of immigrants in a world of constant travel Land and Limits Richard Cowell, Susan Owens, 2005-07-05 In a new and critical analysis this book explores the impact of an influential idea sustainable development on the institutions and practices governing use of land It examines the paradox that in spite of increasing attention to sustainability land use conflict is as ubiquitous and intense as ever *Religion, Space, and the Environment* Sigurd Bergmann, 2017-07-05 Religions often nurture important skills that help believers locate themselves in the world Religious perceptions practices emotions and beliefs are closely interwoven with the environments from which they emerge Sigurd Bergmann s driving emphasis here is to explore religion not in relation to but as a part of the spatiality and movement within the environment from which it arises and is nurtured Religion Space and the Environment emerges from the author s experiences in different places and continents over the past decade At the book s heart lie the questions of how space place

and religion amalgamate and how lived space and lived religion influence each other Bergmann explores how religion and the memory of our past impact our lives in urban spaces how the sacred geographies in Mayan and northeast Asian lands compare to modern eco spirituality and how human images and practices of moving in with and through the land are interwoven with the processes of colonization and sacralising and the practices of power and visions of the sacred among other topics
