Expertise, Communication, and Organizing Jeffrey W. Treem,Paul M. Leonardi,2016-09-05 Expertise is an intriguing construct

Though it is highly desired it is commonly characterized by exclusivity or being something esoteric making it both seemingly difficult to acquire and understand This opaqueness surrounding the nature of expertise in organizational contexts is coupled with greater demands for specialized work and employees increased reliance on communication technologies to complete tasks trends that further complicate the evaluation of workers knowledge and abilities This volume draws upon original works from scholars of diverse backgrounds to explore how recent changes in the structure of organizational life have altered the nature of expertise Specifically this book aims to challenge the perspective that organizational expertise exists to be recognized and utilized and offers an alternative lens that views expertise as emergent and constituted in communication among organizing actors Examining the intersection of communication and expertise within and across different contexts of organizing offers new insights into the discursive material and structural influences that contribute to an understanding of expertise This book offers a comprehensive view of organizational expertise by presenting theoretical frameworks for the study of expertise providing reviews of how the study of expertise has evolved applying perspectives on expertise to different domains of organizational practice and presenting new directions for the study of the intersection of expertise communication and organizing The result is a treatment that considers expertise in diverse forms and across a variety of contexts of organizing and in doing so provides valuable content to researchers from multiple disciplinary backgrounds

Leading Issues in Social Knowledge Management

David Gurteen, 2012-01-01 Perhaps one of the most surprising if not actually unsettling things about the Internet and the Web is that there is always something new on the horizon and that it is very difficult to see where this new technology will take us When ICT was just about big computers and organisational systems it was pretty obvious where the technology was moving us We all knew about Moore's Law and that we were going to have greater capacity smaller and faster devices every year And during the 1990s and the first decade of the third millennium we all became used to what the Internet and the Web had to offer But Social Software in the form of Web 2.0 is different It has put technology in the hands of people who we would never have given it a second thought a few years ago Leading Issues in Social Knowledge Management contains leading edge research which addresses some of the main issues for those of us who want to use Social Software in a Knowledge Management context or who want to study it or research it There are 10 research papers as well as an introduction from David Gurteen who is a leading thinker in this field
